Social Control in Nineteenth Century Britain A. P. Donajgrodzki, 1977 **Social control in nineteenth century Britain. Ed. by A.P. Donajgrodzki ,1977** **Social Classes and Social Relations in Britain 1850-1914** Alastair J. Reid, 1995-09-28 The analysis of social classes and social relations in the second half of the nineteenth century has caused major debates among social historians In this book first published in 1995 Alastair Reid provides a critical summary of the different approaches to the subject giving an account of how interpretations have developed since the 1960s and highlighting the strengths and weaknesses of each approach The author explains how the influence of social sciences in the 1960s led scholars to emphasise the rise to power of the bourgeoisie and the increasing subordination of the industrial working class Recently more detailed research has led to a return to the older historical emphasis on the persistence of aristocratic power the increasing independence of the working classes and the centrality of voluntary agreement in a social order based on consent The conclusion suggests new ways in which the subject might be approached A select bibliography allows the reader to pursue the topic in more detail *Social Control in Europe* Herman Roodenburg, 2004 This two volume collection of essays provides a comprehensive examination of the idea of social control in the history of Europe The uniqueness of these volumes lies in two main areas First the contributors compare methods of social control on many levels from police to shaming church to guilds Second they look at these formal and informal institutions as two way processes Unlike many studies of social control in the past the scholars here examine how individuals and groups that are being controlled necessarily participate in and shape the manner in which they are regulated Hardly passive victims of discipline and control these folks instead claimed agency in that process accepting and resisting and thus molding the controls under which they functioned In both volumes an introduction outlines the origins and the continuing value of the concept of social control The introductions are followed by two substantive sections The essays in part one of volume I focus on the interplay of ecclesiastical institutions and the emerging states those in part two of volume I look more explicitly at discipline from a bottom up perspective The essays in part one of volume 2 explore the various means by which communities generally working class communities in nineteenth and twentieth century Europe were subjected to forms of discipline in the workplace by the church and by philanthropic housing organizations It notes also how the communities themselves generated their own forms of internal control Part two of volume 2 focuses on various policing institutions exploring in particular the question of how liberal and totalitarian regimes differed in their styles of control repression and surveillance

Religion in Victorian Britain: Controversies Gerald Parsons, 1988 [The Cambridge Social History of Britain, 1750-1950](#) F. M. L. Thompson, 1990 Whilst in certain quarters it may be fashionable to suppose that there is no such thing as society historians have had no difficulty in finding their subject The difficulty rather is that the advance has occurred through such an outpouring of research and writing that it is hard for anyone but the specialist to keep up with the literature or grasp

the overall picture In these three volumes as is the tradition in Cambridge Histories a team of specialists has assembled the jigsaw of recent monographic research and presented an interpretation of the development of modern British society since 1750 from three complementary perspectives those of regional communities of the working and living environment and of social institutions Each volume is self contained and each contribution thematically defined contains its own chronology of the period under review Taken as a whole they offer an authoritative and comprehensive view of the manner and method of the shaping of society in the two centuries of unprecedented demographic and economic change

Combating London's Criminal Class Matthew Bach, 2020-07-09 The criminal class was seen as a violent immoral and dissolute sub section of Victorian London s population Making their living through crime and openly hostile to society the lives of these criminals were characterised by drunkenness theft and brutality This book explores whether this criminal class did indeed truly exist and the effectiveness of measures brought against it Tracing the notion of the criminal class from as early as the 16th century this book questions whether this sub section of society did indeed exist Bach discusses how unease of London s notorious rookeries the frenzy of media attention and a word deleted here panic among the general public enforced and encouraged the fear of the criminal class and perpetuated state efforts of social control Using the Habitual Criminals Bills this book explores how and why this legislation was introduced to deal with repeat offenders and assesses how successful its repressive measures were Demonstrating how the Metropolitan Police Force and London s Magistrates were not always willing tools of the British state this book uses court records and private correspondence to reveal how inconsistent and unsuccessful many of these measures and punishments were and calls into question the notion that the state gained control over recidivists in this period

The Church of England and the Durham Coalfield, 1810-1926 Robert Lee, 2007 A detailed survey of the Anglican mission to the coalfields in an era where rapid industrialisation crucially affected the old ecclesiastical structures In 1860 the Diocese of Durham launched a new mission to bring Christianity and specifically Anglicanism to the teeming population of

the Durham coalfield Over the preceding fifty years the Church of England had become increasingly marginalised as the coalfield population soared Parish churches that had been built to serve a scattered rural medieval population were no longer sufficiently close or relevant to the new industrial townships that were being constructed around the coalmines The post 1860 mission was a belated attempt to reach out to the new coalfield population and to rescue them from the forces of Methodism labour militancy and irreligion It was posited on the need to build new churches to delineate new parishes and to recruit a new type of clergyman working class and down to earth in origin and outlook and somebody who could make an empathetic connection with his new parishioners This book is a detailed exploration of the way in which the Church of England in Durham handled its mission It follows the Church's relationship with the coalfield which ranged from an early nineteenth century aloofness to an early twentieth century identification which many church leaders considered had gone too far and in so doing reveals how the Durham experience relates to national attempts to maintain Anglicanism's relevance and presence in an increasingly secular and sceptical society Dr ROBERT LEE lectures in History at the University of Teesside Middlesbrough
