Social Dilemmas Theoretical Issues And Research Findings:

Social Dilemmas Wim Liebrand, David Messick, Henk Wilke, 2015-07-01 This book describes the advances and insights made by social scientists from around the world into the understanding and resolution of social dilemmas Each chapter discusses its own research findings against the background of a more comprehensive view of social dilemmas **Resolving**

Social Dilemmas Margaret Foddy, Michael Smithson, Sherry Schneider, Michael A. Hogg, 2013-05-13 This book presents an accessible and state of the art survey of current research on social dilemmas A social dilemma arises when actions that are justifiable in terms of individual rationality e.g. over harvesting resources or using private instead of public transportation threaten the common good and in the long run the individual's own self interest as well The study of social dilemmas has important links with many areas in psychology as well as with cognate disciplines such as risk analysis environmental science political science and economics Accordingly the book should appeal not only to psychologists but also to a wider audience of scholars and researchers Contributors include both established authorities and recent innovators and the organization and contents of the book reflect the most recent trends in this exciting area Increased attention is given to modeling dynamics and processes in social dilemmas and greater emphasis placed on exploring structural solutions to dilemmas New findings and theoretical developments regarding group and inter group processes are highlighted and a move is made away from a heavy reliance on laboratory experiments and game theory to field studies and real world applications A scholarly prospective chapter at the beginning and an integrative concluding chapter provide useful overviews of the area and the contributions to the book *Frontiers in Social Dilemmas Research* Wim B.G. Liebrand, David M. Messick, 2012-12-06 Social

dilemmas are situations in which individuals groups or nations face a choice between their own short term interests and the longer term interests of all parties involved including themselves As a consequence in the end they all regret the way they have acted Examples of social dilemmas are easy to find depletion of vital resources arms races over production of hazardous substances and environmental pollutants information hoarding and the failure to provide and maintain public goods

Understanding the dynamics of social dilemmas constitutes a major challenge One prominent feature that distinguishes this book is the focus on computer simulations as a methodology for the exploration of the dynamic interplay of individual level processes and aggregate outcomes Cooperation in Modern Society Anders Biel, Mark Snyder, Tom R. Tyler, Mark Van

Vugt, 2012-12-06 Why do so many people volunteer to help others in need in society today What makes people give up the convenience of driving their car to benefit a better environment And why are citizens in general quite prepared to pay taxes to ensure adequate health care and support for the elderly and unemployed These are examples of a more fundamental question addressed in this book why do people cooperate for the welfare of their community state or organization

Cooperation in Modern Society is a unique collection of contributions from internationally reputed scholars across the social sciences *Theories of Communication Networks* Peter R. Monge, Noshir Contractor, 2003-03-27 Theories of Communication

Networks presents solutions to all five problems The authors develop a multi theoretical model that relates different social science theories with different network properties This model is multilevel providing a network decomposition that applies the various social theories to all network levels individuals dyads triples groups and the entire network The book then establishes a model from the perspective of complex adaptive systems and demonstrates how to use Blanche an agent based network computer simulation environment to generate and test network theories and hypotheses It presents recent developments in network statistical analysis the p family which provides a basis for valid multilevel statistical inferences regarding networks Finally it shows how to relate communication networks to other networks thus providing the basis in conjunction with computer simulations to study the emergence of dynamic organizational networks Social Agency Wojciech W. Gasparski, 2018-04-17 Praxiology deals with doing and working from the point of view of effectiveness It has three components analysis of concepts involving purposive actions critique of models of action from the viewpoint of efficiency and normative advisory aspects in recommendations for increasing human efficiency This fourth volume of the Praxiology series is devoted to the very special topic of social agency It focuses on two important praxiological concepts rationality and preparation as preconditions for human action to be effective and efficient The question of efficiency was raised by Anatol Rapoport over three decades ago in his lecture to the audience at the Praxiological Seminar in Warsaw in 1961 Social Agency begins with an article written by this same famous scholar on the topic of decision theory Social Dilemmas A Historical Overview Social dilemmas is the subject of the first part of this volume a question related to studies on human action guided by two types of rationality individual and collective rationality The intersection of the two in which individuals meet collectives creates the situation in which social agency emerges generating dilemmatic circumstances for the actors involved The articles collected in the second part explore praxiological dimensions of education aimed toward the knowledge society because of knowledge possessed and produced by educated persons Chapters and contributors to volume 4 include Five Questions on the Research on Social Dilemmas by Marek K Mlicki Psychological Processes Underlying Cooperation in Social Dilemmas by Paul A M Van Lange and David M Messick Designing a System for Design Learning Designers and or Learners by Arne Collen Creating an Evolutionary Image of New Systems of Learning and Human Development by Janet A Khan and A Study Program Design in Retrospect by Stig C Holmberg Social Agency continues the trend of original research done in a little known but important area Social scientists policymakers and educators will benefit from this work *The New Geo-Governance* Gilles Paquet, 2005-07-12 Over the last few decades the Westphalian nation state has lost its hegemonic position in the system of geo governance A dispersive revolution has led to the emergence of powerful newly networked business organizations new subsidiary focused governments and increasingly virtual elective and malleable communities This in turn has led to the crystallization of distributed governance regimes based on a wider variety of more fluid and always evolving groups of stakeholders In *The New Geo Governance* Gilles Paquet develops a general

conceptual framework to deal with the new evolving reality of global governance He uses this framework to critically examine the evolving territorial governance hemispheric governance meso innovation systems smart city regions and tackles the more complex governance challenges raised by sustainability and common property resources like oceans Paquet further explores the implications of this emerging polycentric geo governance on the new forms of stewardship and its impact on citizenship federalism and other technologies of coordination and reflects on the sort of subversive bricolage required if the missing mechanisms for effective coordination are to be put in place The New Geo Governance will be of great interest to students and scholars interested in governance organizational design international affairs and political studies Published in English

Emerging Media Xigen Li,2015-12-07 Emerging Media provides an understanding of media use in the expanding digital age and fills the void of existing literature in exploring the emerging new media use as a dynamic communication process in cyberspace It addresses emerging media dynamics during the second decade of online communication the Web 2 0 era after Mosaic and Netscape The current status of emerging media development calls for extended exploration of how emerging media are used in different patterns and contexts and this volume answers that call it is a comprehensive examination of emerging media evolution and concurrent social interaction This collection Provides a comprehensive analysis of digital media use and online communication with empirical data Contains both theoretical and empirical studies which not only test communication and related theories in the age of digital media but also provide new insights into important issues in digital media use and online communication with significant theoretical advances Spotlights studies that use a variety of research methods and approaches including surveys content analysis and experiments This volume will be invaluable to researchers of communication and new media and will serve advanced undergraduate and graduate students studying media and digital communication With an international scope it appeals to readers around the world in all areas that utilize new media technologies

Designing for Society Nynke Tromp,Paul Hekkert,2018-12-27 Our globalised world is encountering problems on an unprecedented scale Many of the issues we face as societies extend beyond the borders of our nations Phenomena such as terrorism climate change immigration cybercrime and poverty can no longer be understood without considering the complex socio technical systems that support our way of living It is widely acknowledged that to contend with any of the pressing issues of our time we have to substantially adapt our lifestyles To adequately counteract the problems of our time we need interventions that help us actually adopt the behaviours that lead us toward a more sustainable and ethically just future In Designing for Society Nynke Tromp and Paul Hekkert provide a hands on tool for design professionals and students who wish to use design to counteract social issues Viewing the artefact as a unique means of facilitating behavioural change to realise social impact this book goes beyond the current trend of applying design thinking to enhancing public services and beyond the idea of the designer as a facilitator of localised social change
