Social Traps:

Social Traps and the Problem of Trust Bo Rothstein, 2005-10-06 A social trap is a situation where individuals groups or organisations are unable to cooperate owing to mutual distrust and lack of social capital even where cooperation would benefit all Examples include civil strife pervasive corruption ethnic discrimination depletion of natural resources and misuse of social insurance systems Much has been written attempting to explain the problem but rather less material is available on how to escape it In this book Bo Rothstein explores how social capital and social trust are generated and what governments can do about it He argues that it is the existence of universal and impartial political institutions together with public policies which enhance social and economic equality that creates social capital By introducing the theory of collective memory into the discussion Rothstein makes an empirical and theoretical claim for how universal institutions can be established Social Traps and Social Trust Michael A. Cowan, 2021-01-07 The articles in this special issue of the New England Journal of Public Policy are unusual in two respects First they reflect the practical wisdom of seasoned actors rather than the theoretical knowledge of academicians The typically unexamined assumption of the academy is that good practice in the world is simply the application of sound theory from the academy It does not take long in the public arena however to discover that leaders there are not applying theory from the academy to the decisions they face Rather they base their interventions on what they have learned about people organizations conflict race and politics in the rough and tumble of living in the world Their working understandings may be valuably leavened by theory but are not guided primarily by it Second the authors were not separate individuals working on isolated issues like children engaged in parallel play but rather partners in a fluid informal collaborative social action network operating in an environment of constantly shifting challenges and possibilities for change The authors are not a collection of Is they are a we They decided pragmatically to connect their power their political and financial and social capital at critical moments to accomplish shared goals The network grew more powerful in the process becoming more than the sum of its organizational parts This volume is ours as was the collective action out of which it emerged Like a choir s songs its articles give voice to a group s experiences Each is a part of a larger whole Whenever I speak about how Hurricane Katrina changed New Orleans an audience member invariably asks Would the changes you described have occurred without a hurricane The simple answer is no but a fuller response is required to do justice to the situation Nature can create temporary vacuums but it cannot fill them The coalition led public meetings action campaigns election fights and legislative lobbying recounted here and the transformations they caused might not have happened in the wake of the great storm But they did In these pages you will meet some of those whose practical wisdom courage and integrity drove those changes **Social Traps** John G. Cross, Melvin J. Guyer, 1980 **Social Dilemmas** Samuel S. Komorita, 2019-04-16 Emphasizing real world examples Komorita and Parks illustrate both the theoretical and the ecological relevance of social dilemmas focusing on exchange theory to explain how conflicts are resolved This book is appropriate for

Paradoxical Effects of Social Behavior A. Diekmann, P. Mitter, 2012-12-06 In the history of science paradoxes are not only amusing puzzles and challenges to the human mind but also driving forces of scientific development The notion of paradox is intimately related to the notion of contradiction Logical paradoxes allow for the derivation of contradictory propositions e.g. Russell's set of all sets not being members of themselves or the ancient problem with propositions like I am lying 1 normative paradoxes deal with contradictions among equally well accepted normative postulates Arrow's impossibility theorem Sen's Impossibility of a Paretian Liberal and factual paradoxes refer to conflicts between conventional opinion based on an accepted empirical theory and contradictory empirical evidence e.g. the St Petersburg paradox or the Allais paradox in decision theory 2 Paradoxes either logical normative or factual also contradict our intuitions The counter intuitive property which seems to be a common feature of all paradoxes plays an important part in the empirical social sciences particularly in the old research tradition of scrutinizing the unintended consequences of purposive actions Expectations based on naive theories ignoring interdependencies between individual actions are very often in conflict with surprising empirical evidence on collective results of social behavior Examples are numerous reaching from panic situations the individual struggle for status gains resulting in collective deprivation the less than optimal supply of collective goods etc to global problems of the armament race and mismanagement of common resources
