Jimmy Algie

Social Values, Objectives and Action

The Social Services have grown in size; their field of action is vast, touching nearly every aspect of living and affecting most citizens sooner or later. Yet fundamental questions remain unanswered.

Why do we need Social Services at all?
What social values should they reflect?
What objectives should they pursue?
How can objectives be realized in practical action?

These questions are addressed in this book. They daily become more urgent and difficult, as social values are challenged in every area of living and work.

A comprehensive programme is developed covering alternative social objectives of the Social Services. An attempt is made to bridge the gap between policy and practice, theory and action. Social values underlying political creeds, professional theories and community ideals are translated into specific targets for front-line workers. Conflicts emerge as various interest groups assert opposing values. Methods for resolving such conflicts are suggested. Implications for practice are reviewed in terms of how clients are affected, how social problems are tackled, how services are delivered, how scarce resources are allocated, how total effects may be evaluated. Methods implicit in management by objectives, planned programmed budgeting, and task-centred casework are developed and applied in new ways to form an integrated approach to planning and action.

This work is likely to provide essential material for all Social Services managers and students. More generally, it seeks to make some contribution to social planning and management studies, particularly in relation to public services and professional work.
