volution en cours La France s'est dotée de champions nationaux en raison du rôle prépondérant de l'État depuis près d'un demi-siècle. Le rôle qui s'est accru pendant les premières années correspondant à l'arrivée de la Gauche au pouvoir. Mais le libéralisme a le vent en poupe et l'heure est au désengagement de l'État et la privatisation. Le pouvoir tout comme les entreprises doit tenir compte de l'insertion toujours plus grande de la France dans l'Union européenne et de la montée en puissance de pays nouvellement industrialisés. La France doit-elle rester présente dans tous les secteurs industriels ou en privilégier quelques-uns dont les activités de haute technologie ? Faut-il laisser les entreprises continuer de délocaliser leurs activités et perdre ainsi des emplois alors que le chômage est trop élevé ? La deuxième partie reprend ces thèmes travers l'étude de quelques grands secteurs d'activité. En tenant compte du poids des activités industrielles de leur sensibilité à la globalisation des marchés de la place de l'immatriel du rôle de la puissance publique nous avons retenu cinq activités industrielles majeures. La construction automobile est encore celle qui a le plus d'effets d'entraînement sur le reste de l'industrie. La place grandissante des industries de haute technologie est abordée dans les chapitres traitant des industries électroniques des industries aérospatiales et spatiales des activités de l'armement. Parmi les activités industrielles frappées le plus nettement par la crise nous avons retenu les industries de base en raison de la place tenue dans le pays. Enfin les industries du textile et de l'habillement constituent le meilleur exemple des effets dévastateurs de la montée des nouveaux producteurs parmi les pays qui bénéficient de coûts moins élevés.
