Society Against The State Essays In Political Anthropology:

Society Against the State Pierre Clastres, 2020-09-29 In this seminal founding work of political anthropology Pierre Clastres takes on some of the most abiding and essential questions of human civilization What is power What is society How among all the possible modes of political organization did we come to choose the monolithic State model and its accompanying regimes of coercion As Clastres shows other and different regimes do indeed exist and they existed long before ours regimes in which power though it manifests itself everywhere is nonetheless noncoercive In such societies political culture and cultural practices generally are not only not submissive to the State model but they actively avert it rendering impossible the very conditions in which coercive power and the State could arise How then could our own societies of the State ever have arisen from these rich and complex stateless societies and why Clastres brilliantly and imaginatively addresses these questions meditating on the peculiar shape and dynamics of so called primitive societies and especially on the discourses with which civilized i e political economic literate peoples have not ceased to reduce and contain them He refutes outright the idea that the State is the ultimate and logical density of all societies On the contrary Clastres develops a whole alternate and always affirmative political technology based on values such as leisure prestige and generosity Through individual essays he explores and deftly situates the anarchistic political and social roles of storytelling homosexuality jokes ruinous gift giving and the torturous ritual marking of the body placing them within an economy of power and desire very different from our own one whose most fundamental goal is to celebrate life while rendering the rise of despotic power impossible Though power itself is shown to be inseparable from the richest and most complex forms of social life the State is seen as a specific but grotesque aberration peculiar only to certain societies not least of which is our own Not for sale in the U K and British Commonwealth South Africa Burma Jordan and Iraq **Against History, Against State** Shail

Mayaram, 2003 A reassessment of conventional South Asian historiography from a subaltern perspective and a unique look at how conceptions of history and community clash This incisive study explores the Meo community through their oral literature revealing sophisticated modes of collective memory and self government while telling a story that radically diverges from most accepted Indian histories **Reproducing the State** Jacqueline Stevens, 2020-12-08 People are said to acquire their

affiliations of ethnicity race and sex at birth Hence these affiliations have long been understood to be natural independent of the ability of political societies to define who we are Reproducing the State vigorously challenges the conventional view as well as post structuralist scholarship that minimizes state power Jacqueline Stevens examines birth based theories of membership and group affiliations in political societies ranging from the Athenian polis to tribes of Australia to the French republic to the contemporary United States The book details how political societies determine the kinship rules that are used to reproduce political societies Stevens analyzes the ways that ancestral and territorial birth rules for membership in political societies pattern other intergenerational affiliations She shows how the notion of ethnicity depends on the implicit or explicit

invocation of a past present or future political society She also shows how geography is used to represent political regions including continents as the seemingly natural underpinning for racial taxonomies perpetuated through miscegenation laws and birth certificates And Stevens argues that sex differences are also constituted through membership practices of political societies In its chronological and disciplinary range *Reproducing the State* will reward the interest of scholars in many fields including anthropology history political science sociology women s studies race studies and ethnic studies *The Routledge Companion to Social and Political Philosophy* Gerald Gaus,Fred D'Agostino,Ryan Muldoon,2024-11-26 The Routledge Companion to Social and Political Philosophy Second Edition is a comprehensive definitive reference work providing an up to date survey of the field charting its history and key figures and movements and addressing enduring questions as well as contemporary research Features unique to the Companion are as follows Extensive coverage of the history of social and political thought including separate chapters on the development of political thought in the Islamic world India and China as well as in modern Germany France and Britain A focus on the core concepts and the normative foundations of social and political theory A section devoted exclusively to distributive justice the central issue of political philosophy since Rawls Theory of Justice Several chapters on global justice and international issues The Companion s 74 commissioned chapters by leading scholars from throughout the world are divided into eight thematic sections The History of Social and Political Theory Political Theories and Ideologies Normative Foundations Distributive Justice The National State and Beyond Political Concepts Approaches and Issues in Social and Political Philosophy Expanded updated and revised throughout this Second Edition includes new chapters on Politics Philosophy and Economics PPE Political Epistemology Race and Ethnicity Power Foucault and New Diversity Theory **Constituent Power** Arvidsson Matilda Arvidsson,2020-08-18 With a strong focus on constitutional law this book examines the legal as well as the political power of the people in constitutional democracies Bringing together an international range of contributors from the USA Latin America the UK and continental Europe it explores the complex relationship between constitutional democracy and the people from the angles of constitutional law legal theory political theory and history Contributors explore this relationship through the lens of radical democracy engaging with the work of key figures such as Hannah Arendt Carl Schmitt Claude Lefort and Jacques Ranciere

Inventing Western Civilization Thomas C. Patterson,1997 In this wonderful book Thomas Patterson effectively dethrones the concept of civilization as an abstract good transcending human society Martin Bernal Drawing on his extensive knowledge of early societies Thomas C Patterson shows how class sexism and racism have been integral to the appearance of civilized societies in Western Europe He lays out clearly and simply how civilization with its designs of civilizing and being civilized has been closely tied to the rise of capitalism in Western Europe and the development of social classes

Automatic Society, Volume 1 Bernard Stiegler,2018-03-15 In July 2014 the Belgian newspaper Le Soir claimed that France Belgium the United Kingdom Italy Poland and the United States may lose between 43 and 50 per cent of their jobs

within ten to fifteen years Across the world integrated automation one key result of the so called data economy is leading to a drastic reduction in employment in all areas from the legal profession to truck driving from medicine to stevedoring In this first volume of a new series the leading cultural theorist Bernard Stiegler advocates a radical solution to the crisis posed by automation and consumer capitalism more generally He calls for a decoupling of the concept of labour meaningful intellectual participation from employment dehumanizing banal work with the ultimate aim of eradicating employment altogether By doing so new and alternative economic models will arise where individuals are no longer simply mined for labour but also actively produce what they consume Building substantially on his existing theories and engaging with a wide range of figures from Deleuze and Foucault to Bill Gates and Alan Greenspan Automatic Society will appeal to students and scholars across the social sciences and humanities as well as anyone concerned with the central question of the future of work

Crisis of the State Bruce Kapferer, Bjørn Enge Bertelsen, 2009-04-01 Analyzing both historical contexts and geographical locations this volume explores the continuous reformation of state power and its potential in situations of violent conflict The state otherwise understood as an abstract and transcendent concept in many works on globalization in political philosophy is instead located and analyzed here as an embedded part of lived reality This relationship to the state is exposed as an integral factor to the formation of the social whether in Africa the Middle East South America or the United States Through the examination of these particular empirical settings of war or war like situations the book further argues for the continued importance of the state in shifting social and political circumstances In doing so the authors provide a critical contribution to debates within a broad spectrum of fields that are concerned with the future of the state the nature of sovereignty and globalization
