Barents Region Kamrul Hossain, Dorothée Cambou, 2018-05-20 The Arctic Barents Region is facing numerous pressures from a variety of sources including the effect of environmental changes and extractive industrial developments The threats arising out of these pressures result in human security challenges This book analyses the formation and promotion of societal security within the context of the Arctic Barents Region It applies the human security framework which has increasingly gained currency at the UN level since 1994 UNDP as a tool to provide answers to many questions that face the Barents population today The study explores human security dimensions such as environmental security economic security health food water energy communities political security and digital security in order to assess the current challenges that the Barents population experiences today or may encounter in the future In doing so the book develops a comprehensive analysis of vulnerabilities challenges and needs in the Barents Region and provides recommendations for new strategies to tackle insecurity and improve the wellbeing of both indigenous and local communities This book will be a valuable tool for academics policy makers and students interested in environmental and human security sustainable development environmental studies and the Arctic and Barents Region in particular Environment and Society Stewart Barr, 2016-04-29 Environment and Society explores ways to promote the behavioural shifts necessary for creating a sustainable society Through a critical approach to the links between sustainability policy and citizen engagement the book argues that sustainability policy needs to move towards a positive perspective utilizing the well known techniques of segmentation and social marketing Such mainstreaming of sustainable lifestyles is likely to be the only effective means of engaging the majority of citizens in the environmental debate given the major influence of the consumer society on individual aspirations and beliefs Comprised of three substantive elements Environment and Society explores the context for behaviour change policy the approaches adopted by politicians and academic researchers and the application of such approaches using empirical data from two major research projects The book is richly illustrated using both theoretical and empirical data and provides an excellent companion to all researchers interested in sustainable lifestyles Institutions, Regulatory Styles, Society and Environmental Governance in China Carlos Wing-Hung Lo, Shui-Yan Tang, 2013-08-15 During the past three decades of rapid industrial growth China has suffered from devastating environmental degradation Most scholarly and popular publications have painted a rather pessimistic picture about the worrisome trend Yet a somewhat more optimistic view has emerged in the past decade given the Chinese government's increased commitment to fighting industrial pollution the public's increased concerns regarding the adverse effects of pollution and domestic and international civil society's increased involvement in promoting environmental protection in China Drawing on the authors extensive research on Guangdong Province and a few large cities in other provinces this book provides an in depth study on China's environmental governance and regulatory enforcement in the past two decades Section 1 examines various institutional constraints for environmental regulation enforcement at the local level and how governance reform efforts in the past decade have contributed to the lessening of

those constraints Section 2 draws on data derived from surveys and interviews conducted in multiple cities and times it examines the dominant regulatory enforcement styles of local environmental protection bureaus and how these styles vary across different regions and over time Section 3 examines how various stakeholders the general public environmental groups government entities and corporations affect the environmental governance process Overall the book presents a cautiously optimistic view on the evolution of environmental governance in China While highlighting many political institutional social and economic constraints it also documents many changes that have taken place including reform efforts from within the government administrative system increasingly societal concerns and actions and changing attitudes among corporate executives potentially paving the way for more effective environmental governance in the future
