Sociological Methodology 1975:

Sociological Methodology 1975 David R. Heise, 1977 Sociological Methodology, 1975 David R. Heise, 1974 Toward the integration of content analysis and general methodology Cluster analysis Scaling replicated conditional rank order data Method for classifying interval scale and ordinal scale data Multiple indicators and the relationship between abstract variables On Durkheim's Rules of Sociological Method (Routledge Revivals) Mike Gane, 2010-11 This radical appraisal of Durkheim's method first published in 1988 argues that fundamental errors have been made in interpreting Durkheim Mike Gane argues that to understand The Rules it is necessary also to understand the context of the French society in which the book was written He explores the cultural and philosophical debates which raged in France during the period when Durkheim prepared the book and establishes the real and unsuspected complexity of Durkheim's position its formal complexity its epistemological complexity and its historical complexity *Methods of Social Research, 4th Edition* Kenneth Bailey, 2008-06-30 An introduction for undergraduates to every stage of sociological research showing how to deal effectively with typical problems they might encounter The book is fully updated to include examples from the LA riots and the 1992 presidential elections Toward a Structural Theory of Action Peter H. Rossi, 2013-10-22 Toward a Structural Theory of Action Network Models of Social Structure Perception and Action centers on the concept of social structure perceptions and actions as well as the strategies through which these concepts guide empirical research This book also proposes a model of status role sets as patterns of relationships defining positions in the social topology This text consists of nine chapters separated into three parts Chapter 1 introduces the goals and organization of the book Chapters 2-4 provide analytical synopsis of available network models of social differentiation and then use these models in describing actual stratification Chapter 5 presents a model in which actor interests are captured Subsequent chapter assesses the empirical adequacy of the two predictions described in this book Then other chapters provide a network model of constraint and its empirical adequacy This book will be valuable to anthropologists economists political scientists and psychologists *Sociological Methods & Research*, 1987 Methods of Social Research Kenneth D. Bailey, 1994 An introduction for undergraduates to every stage of sociological research showing how to deal effectively with typical problems they might encounter The book is fully updated to include examples from the LA riots and the 1992 presidential elections *Measurement in the Social Sciences* Richard A. Zeller, Edward G. Carmines, 1980-04-30 This textbook is designed to bridge the gap between the theorist and the methodologist by presenting an integrated approach to measurement By differentiating between random and systematic error it conveys both statistical techniques and their theoretical underpinnings essential to students of sociology and political science Rather than developing new technical methods of new theoretical structures Professors Zeller and Carmines provide thorough explanations of the assumptions limitations and interpretations of previously established techniques and theories Written at a level accessible to students of social science with some statistical training the book does not presume a

sophisticated mathematical background By concentrating on synthesizing the methodological and theoretical realms Zeller and Carmines demonstrate why measurement considerations are important to research and how measurement principles can be most effectively applied *Research in Social Stratification and Mobility* Kevin T Leicht,2003-12-03 Volume 20 of *Research in Social Stratification and Mobility* continues to remain at the forefront of the diverse group of social scientists who study social inequality and is now the official publication of the Social Stratification Research Group of the International Sociological Association RC 28 This issue features a comprehensive retrospective on the 40 years of contributions to social stratification research made by the late William Sewell and the Wisconsin Longitudinal Survey including an all inclusive bibliography of publications Other contributions address the growing differences between workers with full time jobs and various categories of the underemployed in Israel the United States and Germany social mobility in Korea and Sweden subjective responses to social inequality and the social consequences of status inconsistency and analyses of class consciousness and growing wealth inequality in the OECD *Social Dynamics Models and Methods* Nancy Brandon Tuma,1984-08-28 *Social Dynamics Models and Methods* focuses on sociological methodology and on the practice of sociological research This book is organized into three parts encompassing 16 chapters that deal with the basic principles of social dynamics The first part of this book considers the development of models and methods for causal analysis of the actual time paths of change in attributes of individual and social systems This part also discusses the applications in which the use of dynamic models and methods seems to have enhanced the capacity to formulate and test sociological arguments These models and methods are useful for answering questions about the detailed structure of social change processes The second part explores the formulation of the continuous time models of change in both quantitative and qualitative outcomes and the development of suitable methods for estimating these models from the kinds of data commonly available to sociologists The third part describes a stochastic framework for analyzing both qualitative and quantitative outcome of social changes This part also discusses the sociologists perspective on the empirical study of social change processes This text will be of great value to sociologists and sociological researchers
