Sociology And Religion**bociologie Et Religions:**

Sociologie Et Religions Liliane Voyé, Jaak Billiet, 1999 What are the relations between sociology and the different religions Christianity with its various branches Judaism Islam Oriental religions sects and New Religious Movements That is the question which this work conceived on the occasion of the XXVth Conference of the International Society for the Sociology of Religion Soci t Internationale de Sociologie des Religions SISr wishes to clarify The book retraces the varied and troubled history of these relations and also reveals how in opening up its research to other religions besides the Christian sociology is forced to redefine the very object of its field of study What is the religious This question which until recently was considered impertinent informs this book throughout It confronts the necessity of rethinking theories and methodological approaches which constructed in the context of 19th and early 20th century Western Europe prove to be rather inadequate for encompassing contemporary religious phenomena and religious manifestations in other contexts To these new theoretical and methodological demands is added for the sociologist a deontological imperative which takes on all the more importance today as the religious provokes passionate social debate **Religious Pluralism** Giuseppe Giordan, Enzo Pace, 2014-07-08

This volume illustrates both theoretically and empirically the differences between religious diversity and religious pluralism It highlights how the factual situation of cultural and religious diversity may lead to individual social and political choices of organized and recognized pluralism In the process both individual and collective identities are redefined incessantly moving along the continuum that ranges from exclusion to inclusion The book starts by first detailing general issues related to religious pluralism It makes the case for keeping the empirical the normative the regulatory and the interactive dimensions of religious pluralism analytically distinct while recognizing that in practice they often overlap It also underlines the importance of seeking connections between religious pluralism and other pluralisms Next the book explores how religious diversity can operate to contribute to legal pluralism and examines the different types of church state relations eradication monopoly oligopoly and pluralism The second half of the book features case studies that provide a more specific look at the general issues from ways to map and assess the religious diversity of a whole country to a comparison between Belgian French views of religious and philosophical diversity from religious pluralism in Italy to the shifting approach to ethnic and religious diversity in America and from a sociological and historical perspective of religious plurality in Japan to an exploration of Brazilian religions old and new The transition from religious diversity to religious pluralism is one of the most important challenges that will reshape the role of religion in contemporary society This book provides readers with insights that will help them better understand and interpret this unprecedented transition *The Quest* Mircea Eliade, 2013-11-22 In *The Quest* Mircea Eliade stresses the cultural function that a study of the history of religions can play in a secularized society He writes for the intelligent general reader in the hope that what he calls a new humanism will be engendered by a confrontation of modern Western man with unknown or less familiar worlds of meaning Each of these essays contains

insights which will be fruitful and challenging for professional students of religion but at the same time they all retain the kind of cultural relevance and clarity of style which makes them accessible to anyone seriously concerned with man and his religious possibilities Joseph M Kitagawa Religious Education Textual, Comparative, Sociological, and Cognitive Approaches Peter Antes, Armin W. Geertz, Randi R. Warne, 2008-12-19 Since its founding by Jacques Waardenburg in 1971 Religion and Reason has been a leading forum for contributions on theories theoretical issues and agendas related to the phenomenon and the study of religion Topics include among others category formation comparison ethnophilosophy hermeneutics methodology myth phenomenology philosophy of science scientific atheism structuralism and theories of religion From time to time the series publishes volumes that map the state of the art and the history of the discipline

Religious Education at Schools in Europe Martin Rothgangel, Robert Jackson, Martin Jäggle, 2014-05-14 The project Religious Education at Schools in Europe REL EDU which is divided up into six volumes Central Europe Western Europe Northern Europe Southern Europe South Eastern Europe Eastern Europe aims to research the situation with regard to religious education in Europe The second volume outlines the organisational form of religious education in the countries of Western Europe England Ireland Northern Ireland Scotland Wales Belgium France Luxembourg Netherlands This is done on the basis of thirteen key issues which allows specific points of comparison between different countries in Europe Thereby the volume focusses the comparative approach and facilitates further research into specific aspects of the comparison **The Salt of the Earth** Martyn Percy, 2016-10-06 This is a sparkling collection of essays by one of Britain's best known and acute commentators of the church scene and of contemporary religious life Martyn Percy explores new liberalism the churches and human rights in the European Union football and religion pilgrimage demonology common spirituality religious attitudes to nudity and the relationship between religion and advertising The argument running throughout this book is that despite claims and the appearance of increasing secularity the influence of religious themes and values on our everyday life remains pervasive **Bibliographie Internationale de L'histoire Des Religions**, 1954 *The Secularization Debate* William H.

Swatos (Jr.), 2000 Introduced to social scientific audiences by Max Weber the concept of secularization has had a major influence on the way in which religion has been understood in the West But at least since the late 1980s both the predictive and the descriptive adequacy of this concept have been seriously challenged In the face of this challenge The Secularization Debate offers a timely summary of the critical issues that have arisen over the past decade With its wide range of essays by prominent international scholars The Secularization Debate is sure to become a pivotal volume for anyone interested in the hotly contested concept of secularization and its continued relevance to the study of religion Introduction to the Social Sciences (RLE Social Theory) Maurice Duverger, 2020-09-10 Professor Duverger at last provides the student with an overall view of the methodology of the social sciences He briefly traces the origin of the notion of a social science showing how it emerged from social philosophy Its essential elements and pre conditions are described the splintering of social science into

specialist disciplines is explained and the need for a general sociology confirmed. The techniques of observation used by social scientists are dealt with in some detail and the unity of the social sciences is illustrated by examples of the universal application of these techniques. Documentary evidence in its various forms are described along with the basic analytical techniques including quantitative methods and content analysis. Other methods of gathering information through polls, interviews, attitude scales and participant observation are all described. Professor Duverger brings together the different kinds of analysis used to assess the information thus gathered. Arguing that observing and theorizing are not two different stages or levels of research, he examines the practical value and difficulties of general sociological theories, partial theories and models and working hypotheses. He both describes and assesses the limitations of experiment and the scope of comparative methods in the social sciences. He then gives elementary instructions for using and assessing the value of mathematical techniques. The possibilities of presenting social phenomena through graphs and charts are also explored. There are useful book lists and diagrams.

Gifts and Interests Antoon Vandevelde, 2000. According to a common understanding of economics, economists attempt to understand and explain societal reality in the light of individual self-interest. For them, a gift is no exception to this except for the slight and misleading veil of altruism which covers a purely egoistic motivation. On the other hand, theologians, philosophers and ethicists use a more normative concept of man. Man realises his best potential through deeds of selfless sacrifice that remain unknown to everyone. In reality, however, people are either entirely egoistic or altruistic. Marcel Mauss' model of the gift is interesting because it seems to escape the classical or rather modern egoism/altruism dichotomy. Gifts are not primarily motivated by the well-being of myself or the other but rather by the desire to bring about or maintain a certain kind of social relation between giver and receiver. Altruistic as well as egoistic motivations are an integral part of that relation. The role of gifts in the constitution of social relations and social cohesion explains why most kinds of gifts are reciprocal and even obligatory. In this book, anthropologists, sociologists and economists as well as philosophers focus on the question of the relevance of Mauss' work on the gift for the understanding of actual social phenomena.
