Sociology And The Demystification Of The Modern World:

Sociology and the Demystification of the Modern World (RLE Social Theory) John Rex, 2014-08-21 Professor Rex's controversial book concerns not only those who are professional sociologists but all thinking people who live in the modern world. One of the objects of sociology is to give power to the people to make a contribution to the understanding of political problems. Rex writes from a deep conviction that sociology is a subject whose insights should be made available to the great mass of the people so that they may liberate themselves from the mystification of social reality that is continually and routinely presented to them through the media by those who exercise power and by those who have influence. The book is dedicated to St Augustine and Franz Fanon both of whom Rex points out were conscious of living in an age which was embarking on a new barbarism but had the courage to use their intellects to help understand the possibility of a better future. Rex continues in this tradition and his main preoccupations are reflected in the present book. It includes a discussion of the problem of social knowledge, an analysis of the basic problems of theory building and with the aid of concepts derived from Max Weber, an attempt to understand the major problems of the first, second and third worlds. The author also looks at social structures and moral perspectives and discusses the vocation of a sociologist in a collapsing civilisation. The book is certain to stimulate debate both in sociological and political fields and more generally and is also a serious contribution to the discussion of the methodology and purposes of sociology.

Justice as Sanctuary Herman Bianchi,2010-10-01 While many in the criminal justice system would agree that the present punitive system of crime control is ineffective unjust and malevolent there is little enthusiasm for talk about reforming the system or for a reexamination of its fundamental premises In Justice as Sanctuary noted Dutch criminologist Herman Bianchi details a new approach to crime control one that promises to reanimate debate and initiate real change He explores the cultural and religious roots of the current punitive system in search of new perspectives that can help create a more just and effective one In the ancient Hebrew notion of tzedeka justice or righteousness Bianchi finds the inspiration for a new model of crime control based on conflict resolution rather than punishment Because so many feel alienated from the criminal justice system he argues for new procedures that will enable people to experience law as supportive of their lives and their social interactions To complement the current punitive system Bianchi proposes a system that provides victims and offenders a chance to resolve their conflicts and offers them the opportunity to reach non punitive systems By incorporating the concept of liability Bianchi s model returns to offenders the responsibility for their acts while providing an active legal role for the victims of crime It adapts structures and models from civil and labor law for conflict resolution of nonviolent crimes and in the case of violent crimes and in the case of violent crimes proposes the creation of special sanctuaries that would protect the public while making it possible to effect true justice Startling in its implications Bianchi s system is not a utopian dream but a carefully considered set of proposals that could be acted upon today

Minorities in the Open Society Geoff Dench,2022-11-16 Minorities in the Open Society 1986 challenges optimistic assumptions regarding race relations in western nations namely that social justice will prevail without much effort It examines the interests behind public affirmations of commitment to integration and presents a range of contemporary and historical material which illustrate the double binds created for minorities by the dominant communities who offer equality with one hand while obstructing it with the other Individual members of minorities may be given the opportunity to achieve social prominence but only to carry out special jobs on behalf of the majority

Research Methods for Elite Studies George Moyser,Margaret Wagstaffe,2025-06-30 Elites are crucial groups of people in all but the very simplest societies Whether one is concerned with politics and government the economy or the wider culture and structure of society they are the people who occupy the central positions

of influence that in turn enable them to help shape the character and direction of the whole society But who exactly are they and how does one study them In sharp contrast to the ordinary citizenry the methodology for the study of elites was contentious and under developed at the time Originally published in 1987 Research Methods for Elite Studies provided a wide ranging survey of the techniques problems issues and practicalities of elite research These are explored through case studies conducted by a range of experts all personally involved in the field of elite research about which they write Methodology here is not divorced from substance but vividly set in its context by the researchers Research Methods for Elite Studies is directed to all social scientists who seek to understand the working of the powerful in society In particular those concerned with political power with the functioning of social and political institutions with economic enterprises and above all with the diverse variety of leaders in society will find the volume essential reading Critical Realism and Housing Research Julie M.
