Systems Methodology In Social Science Research Recent Developments:

Systems Methodology in Social Science Research R. Cavallo, 2013-06-29 From the beginning the systems research movement has shown a high potential for offering a conceptual framework for the understanding of social systems Much of this potential has been realized but a major gap remains with regard to operational investigative aids Developments of the last ten years with a method ological orientation and emphasis seem finally to be filling this gap The purpose of this book is to describe the most advanced of these developments and to make them available to a wider audience The emphasis is on developments that are primarily oriented toward interaction with expertise in the social sciences and that thus hold the most promise for social systems investigation In particu lar attempts have been made to provide substantiation and illustration of three main points 1 the common motivation and essential integrability that systems research provides for developments and considerations along a very broad spec trum of interests 2 the very diverse nature of the types and forms of considera tions that may be meaningfully integrated and 3 the operational and usable nature that developments in systems methodology represent for research in the social sciences The book is divided into three parts with a generally increasing degree of specificity The first part Chapters 1 2 and 3 deals with foundational issues associated with modeling and methodology as areas worthy of study in their ix X PREFACE own right

The Role of Systems Methodology in Social Science Research R. Cavallo, 2012-12-06 While general systems research has had a considerable impact on research in the social sciences this impact has been mainly conceptual and has not served to provide the operational and methodological aids for research which are possible In addition many of those systems oriented directions and results which do impact social science research have developed inde pendentlly and in piecemeal fashion in recent decades The main develop ment of this book is a cohesive framework within which to integrate results of general systems research and which provides a means for the organiza tion of data and observations and operational procedures by which to proceed in the investigation and study of social and socio technical systems The book systematically develops in the first five chapters ail of the basic concepts and aspects which make up the framework showing wherever possible the main sources of these concepts and placing them in historical perspective The developments of the first five chapters are pulled together and integrated in the last chapter into a conceptual and operational general systems problem solving framework which extends the investiga tive capabilities of researchers of specific systems The last chapter also contains an example of an overall investigation which utilizes the frame work and which proceeds from system definition through the derivation of explanatory knowledge regarding the object system and which illustrates in detail most of the concepts and elements of the framework

Systems Methodology in Social Science Research R. Cavallo, 1982-04-30 From the beginning the systems research movement has shown a high potential for offering a conceptual framework for the understanding of social systems Much of this potential has been realized but a major gap remains with regard to operational investigative aids Developments of the last ten years with a method ological

orientation and emphasis seem finally to be filling this gap The purpose of this book is to describe the most advanced of these developments and to make them available to a wider audience The emphasis is on developments that are primarily oriented toward interaction with expertise in the social sciences and that thus hold the most promise for social systems investigation In particular attempts have been made to provide substantiation and illustration of three main points 1 the common motivation and essential integrability that systems research provides for developments and considerations along a very broad spectrum of interests 2 the very diverse nature of the types and forms of considerations that may be meaningfully integrated and 3 the operational and usable nature that developments in systems methodology represent for research in the social sciences The book is divided into three parts with a generally increasing degree of specificity The first part Chapters 1 2 and 3 deals with foundational issues associated with modeling and methodology as areas worthy of study in their own right

Soft Computing in Humanities and Social Sciences Rudolf Seising, Veronica Sanz González, 2011-11-05 The field of Soft Computing in Humanities and Social Sciences is at a turning point The strong distinction between science and humanities has been criticized from many fronts and at the same time an increasing cooperation between the so called hard sciences and soft sciences is taking place in a wide range of scientific projects dealing with very complex and interdisciplinary topics In the last fifteen years the area of Soft Computing has also experienced a gradual rapprochement to disciplines in the Humanities and Social Sciences and also in the field of Medicine Biology and even the Arts a phenomenon that did not occur much in the previous years The collection of this book presents a generous sampling of the new and burgeoning field of Soft Computing in Humanities and Social Sciences bringing together a wide array of authors and subject matters from different disciplines Some of the contributors of the book belong to

the scientific and technical areas of Soft Computing while others come from various fields in the humanities and social sciences such as Philosophy History Sociology or Economics Rudolf Seising received a Ph D degree in philosophy of science and a postdoctoral lecture qualification PD in history of science from the Ludwig Maximilians University of Munich He is an Adjoint Researcher at the European Centre for Soft Computing in Mieres Asturias Spain Veronica Sanz earned a Ph D in Philosophy at the University Complutense of Madrid Spain At the moment she is a Postdoctoral Researcher at the Science Technology and Society Center in the University of California at Berkeley Veronica Sanz earned a Ph D in Philosophy at the University Complutense of Madrid Spain At the moment she is a Postdoctoral Researcher at the Science Technology and Society Center in the University of California at Berkeley **Analytical Planning** Thomas L. Saaty, Kevin P.

Kearns, 2014-05-17 Analytical Planning The Organization of Systems deals with systems and planning and suggests a methodological tool for integrating the two This book presents the basic ideas behind complexity systems hierarchies and prioritization and describes planning as a unique form of decision making with illustrations of some prominent philosophical and methodological approaches It highlights some shortcomings of traditional approaches to planning and shows how these can be addressed by the systems approach This monograph consists of seven chapters and opens with a discussion on the nature of complexity and describes an approach that facilitates the use of creativity and experience to structure complex problems The next chapter explains the rationale for systems thinking and how reductionism works The Analytic Hierarchy Process is then considered along with its relationship to some of the properties of systems The remaining chapters focus on ways of thinking about planning and philosophies of planning strategic planning and the applicability of the Analytic Hierarchy Process to benefit cost analysis and resource allocation This book is intended for managers decision makers and planners as well as researchers and practitioners in applied mathematics and computer science Individual Development and Social Change John R. Nesselroade, Alexander Von Eye, 2013-09-24 Individual Development and Social Change

Explanatory Analysis represents a convergence of three lines of emphasis now visible in developmental research and theory building The three are 1 the life course as a focus for the study of development and social change and their interrelationships 2 the life span orientation to the study of individual development with its acknowledgment of the salience of contextual features for understanding development and 3 the growth of methodological innovations that provide more appropriate and powerful ways of exploiting data gathered to describe and explain developmental change processes The book opens with a study on how major cultural change originates and unfolds over time This is followed by separate chapters on the use of sequential designs for explanatory analyses evolutionary aspects of social and individual development the concepts of the theory of causal and weak causal regressive dependence and the concepts of age period and cohort from the perspective of developmental psychology Subsequent chapters examine development and aging as lifelong processes of historical populations the methodological integration of natural and cultural science perspectives in developmental psychology and
