The Geoarchaeology Of Whitewater Draw Arizona:

The Geoarchaeology of Whitewater Draw, Arizona Michael R. Waters, 1986 The Anthropological Papers of the University of Arizona is a peer reviewed monograph series sponsored by the School of Anthropology Established in 1959 the series publishes archaeological and ethnographic papers that use contemporary method and theory to investigate problems of anthropological importance in the southwestern United States Mexico and related areas

Principles of Geoarchaeology Michael R. Waters, 2022-02-22 Geoarchaeological studies can significantly enhance interpretations of human prehistory by allowing archaeologists to decipher from sediments and soils the effects of earth processes on the evidence of human activity While a number of previous books have provided broad geographic and temporal treatments of geoarchaeology this new volume presents a single author's view intended for North American archaeologists Waters deals with those aspects of geoarchaeology stratigraphy site formation processes and landscape reconstruction most fundamental to archaeology and he focuses on the late Quaternary of North America permitting in depth discussions of the concepts directly applicable to that research Assuming no prior geologic knowledge on the part of the reader Waters provides a background in fundamental geological processes and the basic tools of geoarchaeology He then proceeds to relate specific physical processes microenvironments deposits and landforms associated with riverine desert lake glacial cave coastal and other environments to archaeological site formation location and context This practical volume illustrates the contributions of geoarchaeological investigations and demonstrates the need to make such studies an integral part of archaeological research The text is enhanced by more than a hundred line drawings and photographs

The Archaeology of Ancient Arizona Jefferson Reid, Stephanie Whittlesey, 2016-10-01 Carved from cliffs

and canyons buried in desert rock and sand are pieces of the ancient past that beckon thousands of visitors every year to the American Southwest Whether Montezuma Castle or a chunk of pottery these traces of prehistory also bring archaeologists from all over the world and their work gives us fresh insight and information on an almost day to day basis Who hasn't dreamed of boarding a time machine for a trip into the past This book invites us to step into a Hohokam village with its sounds of barking dogs children's laughter and the ever present grinding of mano on metate to produce the daily bread Here too readers will marvel at the skills of Clovis elephant hunters and touch the lives of other ancestral people known as Mogollon Anasazi Sinagua and Salado Descriptions of long ago people are balanced with tales about the archaeologists who have devoted their lives to learning more about those who came before Trekking through the desert with the famed Emil Haury readers will stumble upon Ventana Cave his answer to a prayer With amateur archaeologist Richard Wetherill they will sense the peril of crossing the flooded San Juan River on the way to Chaco Canyon Others profiled in the book are A V Kidder Andrew Ellicott Douglass Julian Hayden Harold S Gladwin and many more names synonymous with the continuing saga of southwestern archaeology This book is an open invitation to general readers to join in solving the great archaeological puzzles of this part of the world Moreover it is the only up to date summary of a field advancing so rapidly that much of the material is new even to professional archaeologists Lively and fast paced the book will appeal to anyone who finds magic in a broken bowl or pueblo wall touched by human hands hundreds of years ago For all readers these pages offer a sense of adventure that you are there stir of excitement that comes only with making new discoveries about the distant past

White Mountain Redware Roy L. Carlson, 2022-02-08 A study of the styles of decoration found on the early southwestern pottery known as White Mountain Redware The White Mountain Redware tradition an arbitrary division of the Cibola painted pottery tradition is composed of those vessels which have a red slip and painted decoration in either black or black and white which when grouped into pottery types have a geographic locus within or immediately adjacent to the Cibola area and which share a number of other attributes indicative of close historical relationships

Evolving Complexity And Environmental Risk In The Prehistoric Southwest Joseph A. Tainter, 2018-05-04 This book explores how and why prehistoric Southwestern societies changed in complexity and offers important new perspectives on evolution of culture It discusses the factors that made prehistoric Southwesterners vulnerable to an arid environment and their strategies to lessen risk and stress

The Quality of the Archaeological Record Charles Perreault, 2019-09-16 Paleobiology struggled for decades to influence our understanding of evolution and the history of life because it was stymied by a focus on microevolution and an incredibly patchy fossil record But in the 1970s the field took a radical turn as paleobiologists began to investigate processes that could only be recognized in the fossil record across larger scales of time and space That turn led to a new wave of macroevolutionary investigations novel insights into the evolution of species and a growing prominence for the field among

the biological sciences In *The Quality of the Archaeological Record* Charles Perreault shows that archaeology not only faces a parallel problem but may also find a model in the rise of paleobiology for a shift in the science and theory of the field To get there he proposes a more macroscale approach to making sense of the archaeological record an approach that reveals patterns and processes not visible within the span of a human lifetime but rather across an observation window thousands of years long and thousands of kilometers wide Just as with the fossil record the archaeological record has the scope necessary to detect macroscale cultural phenomena because it can provide samples that are large enough to cancel out the noise generated by micro scale events By recalibrating their research to the quality of the archaeological record and developing a true macroarchaeology program Perreault argues archaeologists can finally unleash the full contributive value of their discipline

The Marana Community in the Hohokam World Suzanne K. Fish, Paul R. Fish, John Henry Madsen, 1992 This account of Classic Period settlement in the Tucson Basin between A D 1100 and 1300 is the first comprehensive description of the organization of territory subsistence and society in a Hohokam community of an outlying region Broad recovery of settlement patterns reveals in unique detail the developmental history of the Marana Community and its hierarchical structure about a central site with a platform mound Remains of diverse agricultural technologies demonstrate the means for supporting populations of previously unrecognized size

Lekson,2002-03 Salado is an enigma of the past One of the most spectacular cultures of the ancient Southwest its brilliant polychrome pottery has been subjected to varied interpretations from religious cult to artistic horizon Stephen Lekson now uses data from two Salado sites a large pueblo and a small farmstead to clarify long standing misconceptions about this culture By combining analysis of the large whole vessel collection at Dutch Ruin with the scientific excavation of Villareal II a picture of Salado emerges that enables Lekson to evaluate previous competing theories and propose that Salado represents a major fourteenth century migration of Pueblo peoples into the Chihuahuan deserts Lekson demonstrates that late short lived Salado farmsteads difficult to identify archaeologically in areas with larger Mimbres concentrations coexisted with larger Salado towns and he argues that Salado in the Upper Gila region appears as a substantial in migration of Mogollon Uplands populations into what was a vacant river valley Throughout the fourteenth century Salado communities in the Upper Gila were integrated into the larger Salado horizon and were closely connected to Casas Grandes as indicated by the export of serpentine to the city of Paquim and the occurrence of Casas Grandes pottery at Upper Gila Salado sites The book includes illustrations of 71 vessels from Dutch Ruin plus a full color frontispiece Through analysis of these two sites Lekson has taken a large step toward clearing up the mystery of Salado His work will be welcomed by all who study the movements of peoples in the prehispanic Southwest The Winged Kaitlyn Moore Chandler,Wendi Field Murray,María Nieves Zedeño,Samrat Miller Clements,Robert James,2016 Investigates social interactions between Native American groups and birds along the upper Missouri River in all their tangible and intangible expressions Provided by

publisher **Tracking Prehistoric Migrations** Jeffery J. Clark, 2001-02 This monograph takes a fresh look at migration in light of the recent resurgence of interest in this topic within archaeology The author develops a reliable approach for detecting and assessing the impact of migration based on conceptions of style in anthropology From numerous ethnoarchaeological and ethnohistoric case studies material culture attributes are isolated that tend to be associated only with the groups that produce them Clark uses this approach to evaluate Puebloan migration into the Tonto Basin of east central Arizona during the early Classic period A D 1200 1325 focusing on a community that had been developing with substantial Hohokam influence prior to this interval He identifies Puebloan enclaves in the indigenous settlements based on culturally specific differences in the organization of domestic space and in technological styles reflected in wall construction and utilitarian ceramic manufacture Puebloan migration was initially limited in scale resulting in the co residence of migrants and local groups within a single community Once this co residence settlement pattern is reconstructed relations between the two groups are examined and the short term and long term impacts of migration are assessed The early Classic period is associated with the appearance of the Salado horizon in the Tonto Basin The results of this research suggest that migration and co residence was common throughout the basins and valleys in the region defined by the Salado horizon although each local sequence relates a unique story The methodological and theoretical implications of Clark s work extend well beyond the Salado and the Southwest and apply to any situation in which the scale and impact of prehistoric migration are contested

The Late Archaic across the Borderlands Bradley J. Vierra, 2010-01-01 Why and when human societies shifted from nomadic hunting and gathering to settled agriculture engages the interest of scholars around the world One of the most fruitful areas in which to study this issue is the North American Southwest where Late Archaic inhabitants of the Sonoran and Chihuahuan Deserts of Mexico Arizona and New Mexico turned to farming while their counterparts in Trans Pecos and South Texas continued to forage By investigating the environmental biological and cultural factors that led to these differing patterns of development we can identify some of the necessary conditions for the rise of agriculture and the corresponding evolution of village life The twelve papers in this volume synthesize previous and ongoing research and offer new theoretical models to provide the most up to date picture of life during the Late Archaic from 3 000 to 1 500 years ago across the entire North American Borderlands Some of the papers focus on specific research topics such as stone tool technology and mobility patterns Others study the development of agriculture across whole regions within the Borderlands The two concluding papers trace pan regional patterns in the adoption of farming and also link them to the growth of agriculture in other parts of the world Mimbres Far from the Heartland Mary E. Whisenhunt, Patricia A. Gilman, 2025-08-19 This new work offers a unique investigation into the complexities of Mimbres identity and social dynamics beyond the traditional Mimbres Valley heartland Situated at the western edge of the Mimbres region the Powers Ranch site represents the only professionally excavated Classic period settlement in Arizona s Gila River Valley Through excavation and analysis of architecture and a rich

array of artifacts including ceramic sherds projectile points and shell artifacts the authors provide a detailed look at the lives of Mimbres people on the periphery This work compares findings from Powers Ranch with those from neighboring sites in the Gila River Valley and further east in the Mimbres Valley unraveling patterns of identity and affiliation that challenge previous understandings The study is guided by three key research questions the extent of affiliation between the community at the Powers Ranch site and Mimbres communities to the east patterns that suggest Powers Ranch was a habitation and not a limited activity site and whether the site was unique in comparison with Mimbres occupations situated to the south in the Gila River Valley Contributions from scholars M Steven Shackley Martin H Welker and Arthur W Vokes further enrich this volume ensuring a comprehensive and authoritative exploration of the Powers Ranch site Mimbres Far from the Heartland is an invaluable addition to Southwest archaeology shedding light on how people constructed unique identities in edge communities and how these identities were expressed through material culture and social networks Whisenhunt and Gilman's work significantly advances our understanding of Mimbres communities offering new insights into the social resilience and cultural affiliations of people living far from their cultural heartland The El Malpais Archeological Survey Robert P. Powers, Janet Dale Orcutt, 2005 **Alluvial Archaeology in Europe** Andrew J. Howard, M.G. Macklin, D.G. Passmore, 2003-01-01 This book documents and assesses over ten years of research in the field bringing together expertise and knowledge from the disciplines of archaeology and geomorphology and highlighting important recent advances discoveries and new directions Reflecting the wide scope of current research in this area the book contains over twenty papers focusing on various aspects of alluvial archaeology from the methodology of dating prospecting excavating etc to previously under analysed geographical areas such as intertidal wetlands Preliminary Investigations of the Archaic in the Region of Las Cruces, New Mexico Richard S. MacNeish, 1993 *Archaeology as Anthropology; a Case Study* William A. Longacre, 1970-06 This paper is important in the rapidly increasing preoccupation of American archeologists with the basic theories of their discipline An excellent example of how basic descriptive data can be used American Anthropologist
