**The Globalisation of the Oceans** Frank Broeze,2017-10-18 This book maintains that container shipping is vital to the actualisation of globalisation and that without it, globalisation would remain a concept rather than reality. It argues that container shipping has been academically overlooked as a global business sector in favour of more prominent sectors such as oil or arms trade and aims to provide a complete history of containerisation from the 1950s to the turn of the millennium. This history explores the growth of the container industry due to prominent innovation in vessel design, early adoption of the internet, large international mergers and significant physical alterations to the global port system. With particular emphasis on the east-west trade, the chapters cover the growth and development of the container industry to the social changes experienced by seafaring labour forces, the cultural impact of the container bringing a domineering land presence to maritime activity, through to the environmental concerns surrounding the industry. The study is not a quantitative economic analysis of the industry, rather an updated history that strives to demonstrate the importance

of transport infrastructures to any consideration of global business sectors by providing evidence of the container industry's stimulation of the global economy     *Geographia Polonica* ,1975     *Issues in Transportation Research and Application: 2013 Edition* ,2013-05-01 *Issues in Transportation Research and Application 2013 Edition* is a ScholarlyEditions book that delivers timely authoritative and comprehensive information about Transport Geography The editors have built *Issues in Transportation Research and Application 2013 Edition* on the vast information databases of ScholarlyNews You can expect the information about Transport Geography in this book to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of *Issues in Transportation Research and Application 2013 Edition* has been produced by the world's leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is available at <http://www.ScholarlyEditions.com>
