**South Asia: From Early Empires to the Nuclear Age: From Early Empires to the Nuclear Age** Graham Chapman,2018

*The Geopolitics of South Asia* Graham P. Chapman,2016-03-09 Anyone who is planning on carrying out research in South

Asia or indeed anyone who simply wishes to understand more about this cultural heartland should read this book. It shows how geological movements moulded the land of this unique cradle and how they still impact on it. Discussions are woven around the three major forces of integration. These are identitive forces: bonds of language, ethnicity, religion or ideology; utilitarian forces: bonds of common material interest and coercion; the institutional use or threat of physical violence. By studying these forces, Professor Chapman shows how the organization of territory has been central to the region's historic cultural, linguistic and economic development. In addition to the material on the Northwest frontier, Afghanistan and Kashmir, which was added for the second edition, the Northeastern borderlands are also now examined in this fully revised third edition. The current geopolitical state of the region is completely updated and greatly enhanced.

**South Asia from the Margins** Asad ur Rehman, Muhammad Shoaib Pervez, 2025-02-18. This edited volume brings together a group of scholars examining the effects of social change on the politics in South Asia. It cobbles an inductive analytical framework of South Asian margins to comparatively study the political transformations across the region. This book envisages politics encompassing interests, imaginations, activities and actions of numerous actors. Individual contributors analyze the collective choices made by national elites over the past few decades and their implications for development, democracy and security of their respective country and the region. The resulting analytical framework provides a comparative political matrix of analysis that prioritizes the margins over the center. The matrix compares different countries around the axis of 1. Political Contestations and Engagements, 2. Decoloniality and Populism, and 3. Policy Frames and Visions. It is a contrapuntal analysis that establishes margins as a legitimate place to approach social scientific study of South Asia. An important and timely contribution to the field, this book will be of interest to researchers studying Asian politics, comparative politics, area studies, in particular South Asia and Pakistan, and international relations.

**Geographic Realities in the Middle East and North Africa** George Joffé, Richard Schofield, 2020-10-25. Celebrating the work of Keith McLachlan, a well known and much admired geographer of the Middle East and North Africa, this book combines three interrelated topics that define the region. The Middle East has been integral to the growth of the global oil industry, an aspect of its evolution since 1908 which has had profound geopolitical implications as well. The territory was also the arena for the last European experiment in colonialism, a development that has left its legacy even today. And historically it has been the location of the great hydraulic civilisations of Egypt and Mesopotamia, yet is still dependent on the flow of its two major river systems, the Nile and the Tigris-Euphrates, in an era of impending climate crisis. These themes form the essence of the themes that are discussed in the chapters that follow. Keith McLachlan played a significant role in our understanding of these themes and of their effects in the contemporary world, as the comments of those who worked with him and have contributed towards this book reveal. Examining agriculture, oil and state construction, this volume offers an insight into how the contemporary Middle East was constructed after the collapse of the Ottoman Empire. It is a key resource for scholars and students interested in geopolitics and the geography of

the Middle East      **The Geopolitics of South Asia: From Early Empires to India, Pakistan and Bangladesh** Graham Chapman, 2018-02-06 This title was first published in 2000 This volume explores one of the world's greatest cultural heartlands the Indian sub continent It shows how geological movements moulded the land and how they still impact upon it how the culture of early settlers evolved to form Hinduism how its wealth and power attracted the attention of Islamic invaders who founded the Sultanate of Delhi and then the great Mogul Empire and how they were later usurped by the British Raj The story continues with the trauma of Partition and Independence in 1947 as India's unique form of Islam shook free from Nehru's secular India with the founding of Pakistan At different points in the story discussions are woven in on subjects such as caste or the management of water resources Much of the book is written in terms of the three major forces of integration These are identitive forces bonds of language ethnicity religion or ideology utilitarian forces bonds of common material interests and coercion the institutional use or threat of physical violence By studying these forces Professor Chapman shows how the organization of territory as states and empires as monarchic realms and as representative democracies has been central to the region's historic cultural linguistic and economic development In doing so he contends that the lynchpin of this region's story is a geopolitical one      Pentagon's South Asia Defence and Strategic Year Book 2010 Col. Harjeet Singh (Retd), 2010 Pentagon's South Asia Defence and Strategic Yearbook is now in its fourth year of publication It covers relevant issues of defence and security military affairs and military technology written by experts and academicians themselves These issues are important for defence services foreign ministers and security experts spread among defence units strategic think tanks government organisations public sector units national and international technology manufacturers and diplomats and bureaucrats The book has been extremely well received and its circulation has grown tremendously in the last three years It has been regularly reviewed in the USI Journal and other reputed journals and magazines As The Book Review has commented In comparison to the other yearbooks this book stands out due to the well documented opinion peices by the experienced people from the armed forces think tanks and academics It creates a space for dialogue on important topics      Dynamics of the Changing Global Security Order Lorenzo Fiorito, Nesrin Kenar, Senthana Selvarajah, 2023-10-16 Dynamics of the Changing Global Security Order Emerging Trends and Key Issues in Asia presents knowledge insights and understanding of why and how the US led unipolar world order is shifting more in a multipolar direction It demonstrates the influence of power contests involving economic and military weaponry on this new development It reveals the impact this transformation will have on international security and the challenges crises and risks that humanity faces This volume systematically explores its hypothesis through newly evolving theoretical positions such as geoeconomics socio economic political and cultural implications tensions at the national regional and global levels as well as debates trends policies practices and examples concerning power and international relations praxis      Confronting Metaphor in Use Mara Sophia Zanotto, Lynne Cameron, Marilda C. Cavalcanti, 2008-03-27 It is timely for researchers to approach metaphor as social and

situated as a matter of language and discourse and not just as a matter of thought Over the last twenty five years scholars have come to appreciate in depth the cognitive motivated and embodied nature of metaphor but have tended to background the linguistic form of metaphor and have largely ignored how this connects to its role in the discourses in which our lives are constructed and lived This book brings language and social dimensions into the picture offering snapshots of metaphor use in real language and in real lives across the very different cultures of Europe and Brazil and contributing to the theorizing of metaphor in discourse

Hubris, Self-Interest, and America's Failed War in Afghanistan Thomas P. Cavanna, 2015-07-22

This book describes the conduct of the US led post 9 11 war in Afghanistan Adopting a long term perspective it argues that even though Washington initially had an opportunity to achieve its security goals and give Afghanistan a chance to enter a new era it compromised any possibility of success from the very moment it let bin Laden escape to Pakistan in December 2001 and found itself locked in a strategic overreach Given the bureaucratic and rhetorical momentum triggered by the war on terror in America the Bush Administration was bound to deploy more resources in Afghanistan sooner or later despite its focus on Iraq The need to satisfy unfulfilled counter terrorism objectives made the US dependent on Afghanistan s warlords which compromised the country s stability and tarnished its new political system The extension of the US military presence made Washington lose its leverage on the Pakistan army leaders who aware of America s logistical dependency on Islamabad supported the Afghan insurgents their historical proxies more and more openly The extension of the war also contributed to radicalize segments of the Afghan and Pakistani populations destabilizing the area further In the meantime the need to justify the extension of its military presence influenced the US led coalition into proclaiming its determination to democratize and reconstruct Afghanistan While highly opportunistic the emergence of these policies proved both self defeating and unsustainable due to an inescapable collision between the US led coalition s inherent self interest hubris limited knowledge limited attention span and limited resources and on the other hand Afghanistan s inherent complexity As the critical contradictions at the very heart of the campaign increased with the extension of the latter s duration scale and cost America s leaders entrapped in path dependence lost their strategic flexibility Despite debates on troops resource allocation and more sophisticated doctrines they repeated the same structural mistakes over and over again The strategic overreach became self sustaining until its costs became intolerable leading to a drawdown which has more to do with a pervasive sense of failure than with the accomplishment of any noble purpose or strategic breakthrough

*Rights, Rivers and the Quest for Water Commons: The Case of Bangladesh* Imtiaz Ahmed, 2021-04-09

Right to water may sound novel and somewhat dramatic yet it has been central to the quest of human civilization for thousands of years One of the earliest references to water as common property can be found in the Jewish laws as early as 3000 BCE Similar views are also found in Islam In fact the Arabic word for Islamic law shari ah originally meant the place from which one descends to water Since water is a gift from the divine to all living beings sharing water is regarded as holy duty This is found across religions regions societies and communities from

New Zealand to Nigeria from Bangladesh to Brazil But then what transformed the divine sanction What led to the negation of the commons with sharing of the riverine water across territorial boundaries suffering the most The answer probably lies as much as in the politics of safeguarding one's personal or national interests as it is in the limitations imposed by our disciplinary understanding of things In this context a thorough reexamination even reconceptualization of some of the core issues is required Firstly the concept of water needs to be understood not as H<sub>2</sub>O as it is done in physical sciences but as H<sub>2</sub>O-P<sub>4</sub> That is the meaning of water in social sciences must include not only twice hydrogen plus oxygen but also four P's pollution power politics and profit This is not to discount the science in the conceptualization of water but rather to add elements central to social sciences Secondly the concept of river needs to be redefined and understood not as a carrier of water as assumed in most of the Western languages but as nadi a flow consisting of prana life shakti power and atman soul as etymologically defined in most of the South Asian languages This comes closer to what critical hydrologists would say WEBS that is a river consists of water energy biodiversity and sediment In this light any fragmentation of transboundary river water in the name of sharing becomes an unworkable option unless of course a mechanism is found to share the water of the river along with its energy biodiversity and sediment and that again without distorting and harming the life of the river Thirdly the subject of water commons needs to be approached from the standpoint of rights of both human and river This is to flag the notion that nature including rivers has rights just like humans although their manifestations may be different In fact empowered humans particularly those in control of the state have more responsibility than rights in dissuading themselves and others from creating conditions of human wrongs not only against fellow human beings but also against nature Finally if the rights of humans are to be ensured then there is an urgent need to reconceptualize and mainstream the human as a multiverse being This is because humans are not only political beings but also economic cultural ecological technological and psychological beings In this light if conflicts are to be contained then humans need to be empowered in all possible areas of life politics economics ecology culture technology and psychology This would certainly require empowering each and every person all at the same time receptive to nature in general and rivers in particular The book is designed to initiate a discourse on the civilizational quest for water commons indeed with the expectation that a discussion on rights and rivers would lead to a creative flow of ideas and practices
