## **The Germans Victims Of Geography:**

**The Germans** David B. Stenzel, 2001 Germany has acquired a widespread reputation as an aggressor But this is largely a case of historical myopia Certainly in the mid 20th Century Germany was guilty of major aggression under the leadership of the Nazis But during the 1000 years prior to Hitler the Germans were more often the victims of aggression rather than the perpetrators Settling in the middle of the North European Plain is like camping out in the middle of an inter state freeway The Germans have been attacked again and again usually from the West or the East but also from the North and the South They have no defensible natural borders except the Alps in the South and the seas in the North The once proud German Empire of the 13th Century was pummeled into a shattered collection of some 380 sovereign states by the 18th Century There really was no Germany from the 13th Century to 1871 This brief study is the author's reflection on German history after 30 years of university teaching It attempts to look at the tempestuous history of Germany in the perspective of 1000 years of history from Pepin the Short to Kohl the large This perspective reveals the Germans to be indeed victims of Geography They like the Poles have suffered from a tremendous geographic disadvantage

**Geographies of the Holocaust** Anne Kelly Knowles, Tim Cole, Alberto Giordano, 2014-09-19 A pioneering work Shed's light on the historic events surrounding the Holocaust from place space and environment oriented perspectives Rudi Hartmann PhD Geography and Environmental Sciences University of Colorado This book explores the geographies of the Holocaust at every scale of human experience from the European continent to the experiences of individual human bodies Built on six innovative case studies it brings together historians and geographers to interrogate the places and spaces of the genocide The cases encompass the landscapes of particular places the killing zones in the East deportations from sites in Italy the camps of Auschwitz the ghettos of Budapest and the intimate spaces of bodies on evacuation marches Geographies of the Holocaust puts forward models and a research agenda for different ways of visualizing and thinking about the Holocaust by examining the spaces and places where it was enacted and experienced An excellent collection of scholarship and a model of interdisciplinary collaboration The volume makes a timely contribution to the ongoing emergence of the spatial humanities and will undoubtedly advance scholarly and popular understandings of the Holocaust H HistGeog An important work and could be required reading in any number of courses on political geography GIS critical theory biopolitics genocide and so forth Journal of Historical Geography Both students and researchers will find this work to be immensely informative and innovative Essential Choice 1993 Patt Leonard, Rebecca Routh, 1996 Journal articles books book chapters book reviews dissertations and selected government publications on East Central Europe and the former Soviet Union published in the United States and Canada **A Geographical Guide to the Real and the Good** Robert Sack, 2016-05-06 First published in 2003

Routledge is an imprint of Taylor Francis an informa company **Education in Nazi Germany** Lisa Pine, 2010-12-01 Shaping the minds of the future generation was pivotal to the Nazi regime in order to ensure the continuing success of the

Third Reich Through the curriculum the elite schools and youth groups the Third Reich waged a war for the minds of the young Hitler understood the importance of education in creating self identity inculcating national pride promoting racial purity and building loyalty The author examines how Nazism took shape in the classroom via school textbook policy physical education and lessons on Nationalist Socialist heroes and anti Semitism Offering a compelling new analysis of Nazi educational policy this book brings to the forefront an often overlooked aspect of the Third Reich **The Nation, Europe, and the World** Hanna Schissler, Yasemin Nuhoglu Soysal, 2005-04-01 Textbooks in history geography and the social sciences provide important insights into the ways in which nation states project themselves Based on case studies of France Germany the Netherlands Spain Greece Turkey Bulgaria Russia and the United States this volume shows the role that concepts of space and time play in the narration of our country and the wider world in which it is located It explores ways in which in western European countries the nation is reinterpreted through European lenses to replace national approaches in the writing of history On the other hand in an effort to overcome Eurocentric views world history has gained prominence in the United States Yet again East European countries coming recently out of a transnational political union have their own issues with the concept of nation to contend with These recent developments in the field of textbooks and curricula open up new and fascinating perspectives on the changing patterns of the re positioning process of nation states in West as well as Eastern Europe and the United States in an age of growing importance of transnational organizations and globalization

*Colonial Geography* Matthew Unangst, 2022-06-29 Colonial Geography charts changes in conceptions of the relationship between people and landscapes in mainland Tanzania during the German colonial period In German minds colonial development would depend on the relationship between East Africans and the landscape Colonial Geography argues that the most important element in German imperialism was not its violence but its attempts to apply racial thinking to the mastery and control of space Utilizing approaches drawn from critical geography the book argues that the development of a representational space of empire had serious consequences for German colonialism and the population of East Africa Colonial Geography shows how spatial thinking shaped ideas about race and empire in the period of New Imperialism

**Prussians, Nazis and Peaceniks** Jens Steffek, Leonie Holthaus, 2020-03-16 In this book historians and political scientists show how radically external images of Germany changed over the 20th century from the Prussian military state to the bulwark of liberalism They also explore how such images of Germany affected the evolution of international relations theory at some critical junctures *Catalogue of the Central Lending Department, Ratcliff Place* Birmingham Free Libraries, 1885

*German Ways of War* Jaimey Fisher, 2022-08-12 German Ways of War explores the production of novel spaces and evocation of new affects in the war film genre between the 1910s and 2000s Beyond the conventional pairing of visibility and violence war films combine mobility landscape territory scales and topological networks into affective geographies that interweave narratively generated affect space and political processes *Alexander Von Humboldt* Nicolaas A.

Rupke,2008-06 Alexander von Humboldt is one of the most celebrated figures of late modern science famous for his work in physical geography botanical geography and climatology This volume traces Humboldt s biographical identities through Germany s collective past to shed light on the historical instability of our scientific heroes *Drunk on Genocide* Edward B. Westermann,2021-03-15 In *Drunk on Genocide* Edward B Westermann reveals how over the course of the Third Reich scenes involving alcohol consumption and revelry among the SS and police became a routine part of rituals of humiliation in the camps ghettos and killing fields of Eastern Europe Westermann draws on a vast range of newly unearthed material to explore how alcohol consumption served as a literal and metaphorical lubricant for mass murder It facilitated performative masculinity expressly linked to physical or sexual violence Such inebriated exhibitions extended from meetings of top Nazi officials to the rank and file celebrating at the grave sites of their victims Westermann argues that contrary to the common misconception of the SS and police as stone cold killers they were in fact intoxicated with the act of murder itself *Drunk on Genocide* highlights the intersections of masculinity drinking ritual sexual violence and mass murder to expose the role of alcohol and celebratory ritual in the Nazi genocide of European Jews Its surprising and disturbing findings offer a new perspective on the mindset motivation and mentality of killers as they prepared for and participated in mass extermination Published in Association with the US Holocaust Memorial Museum Contemporary Jewish Reality in Germany and Its Reflection in Film Claudia Simone Dorchain,Felice Naomi Wonenberg,2012-12-06 The notion of self and other and its representation in artwork and literature is an important theme in current cultural sciences as well as in our everyday life in contemporary Western societies Moreover the concept of self and other and its imaginary dichotomy is gaining more and more political impact in a world of resurfacing ideology ridden conflicts The essays deal with Jewish reality in contemporary Germany and its reflection in movies from the special point of view of cultural sciences political sciences and religious studies This anthology presents challengingly new insights into topics rarely covered such as youth culture or humor and finally discusses the images of Jewish life as realities still to be constructed Negotiating the Nazi Occupation of France Sandra Ott,2025-02-19 The French the Basques and the myriad of foreigners who lived in wartime France often developed clever strategies for negotiating the Nazi Occupation of 1940 1944 This sometimes entailed living in harmony and cooperating with the enemy accommodating to the Germans presence or rejecting them through various modes of resistance and hostility People so often simply tried to survive the Occupation as best as they could and contrary to early perceptions of the French people Most were neither bad nor good in a murky moral universe that was decidedly not black and white As this book argues that murky universe needs to be explored beyond the solely French or German experience By largely focusing on daily life the authors create a space in which to explore relations among people of varying ethnic religious regional and national identities They also engage with multiple disciplines anthropology history visual studies genocide studies as well as transnational memory and gender studies **Transcultural Memory and European Identity in Contemporary**

**German-Jewish Migrant Literature** Jessica Ortner, 2022 Examines how German Jewish writers from Eastern Europe who migrated to Germany during or after the Cold War have widened European cultural memory to include the traumas of the Gulag Preserving the memory of the Holocaust as a moral and ethical limit case is key to the European Union's attempt to construct a pan European identity But with the Eastern expansion of the EU new member states have challenged the Holocaust's singularity calling for the traumas of the Stalinist Gulag to be acknowledged much more explicitly Thus even though Europe has been unified politically it is divided by its diverging perceptions of the past Jessica Ortner argues that German Jewish writers from Eastern Europe and the GDR who migrated to Germany as refugees during or after the Cold War have responded critically to the need to widen European cultural memory to include the traumatic experiences of the East The writers focused on include Katja Petrowskaja Olga Grjasnowa Lena Gorelik Vladimir Vertlib and Barbara Honigmann A central focus of the book is the traveling of memories from Eastern Europe and the GDR to Western Germany and Austria Introducing the term literature of mnemonic migration Ortner asserts that these authors writings negotiate the mnemonic divide between East and West They criticize the normative memory politics of both Germany and the Soviet Union and address not only the politically explosive question of how to remember both National Socialism and Communism but also the status of Jews in contemporary Germany

Holocaust City Tim Cole, 2013-10-18 Drawing from the ideas of critical geography and based on extensive archival research Cole brilliantly reconstructs the formation of the Jewish ghetto during the Holocaust focusing primarily on the ghetto in Budapest Hungary one of the largest created during the war but rarely examined Cole maps the city illustrating how spaces cafes theaters bars bathhouses became divided in two Throughout the book Cole discusses how the creation of this Jewish ghetto just like the others being built across occupied Europe tells us a great deal about the nature of Nazism what life was like under Nazi occupation and the role the ghetto actually played in the Final Solution

*German Literature of the Twentieth Century* Ingo Roland Stoehr, 2001 Traces literary developments in the German speaking countries from 1900 to the present This study of German literature in the past hundred years sets its subject clearly in the artistic and political context of developments in Western Europe during the century It begins with the turn of the century aestheticism and visions of decay led by Schnitzler Hofmannsthal and other Austrian writers and the quite different explosion of new artistic energy in the Expressionist and Dada movements These movements are succeeded by the rise of Modernism culminating in the inter war years the poetry of Rilke Brecht's epic theatre and novels by Thomas Mann Kafka Hesse Musil Döblin and Broch the influence of Nazism on literary production is considered The study of developments after 1945 reflects the struggle to establish a post Holocaust literature and to deal with the questions posed by the political division of Germany Finally the convergence of East and West German literature after unification is addressed Ingo R Stoehr teaches literature at Kilgore College Texas and is editor of the bilingual journal of German literature in English translation *Dimension2*

*Coping with the Nazi Past* Philipp Gassert, Alan E. Steinweis, 2007 These essays examine how the collective

memory of Nazism and the Holocaust influenced and was influenced by politics and culture in West Germany in the 1960s. They explore wide ranging issues including prosecution for war crimes, student politics and restitution.

**A Companion to the Holocaust** Simone Gigliotti, Hilary Earl, 2020-04-14. Provides a cutting edge nuanced and multi disciplinary picture of the Holocaust from local transnational continental and global perspectives. The text incorporates new language geographies and approaches to address the precursors of the Holocaust and examine its global consequences. A team of international contributors provides insightful and sophisticated analyses of current trends in Holocaust research that go far beyond common conceptions of the Holocaust's causes, unfolding and impact. Scholars draw on their original research to interpret current agenda setting historical and historiographical debates on the Holocaust. Six broad sections cover wide ranging topics such as new debates about Nazi perpetrators, arguments about the causes and places of persecution of Jews in Germany and Europe and Jewish and non Jewish responses to it, the use of forced labor in the German war economy, representations of the Holocaust witness and many others. A masterful framing chapter sets the direction and tone of each section's themes. Comprising over thirty essays, this important addition to Holocaust studies offers a remarkable compendium of systematic comparative and precise analyses. Covers areas and topics not included in any other companion of its type. Examines the ongoing cultural, social and political legacies of the Holocaust. Includes discussions on non European and non Western geographies, inter ethnic tensions and violence. A Companion to the Holocaust is an essential resource for students and scholars of European, German, genocide, colonial and Jewish history as well as those in the general humanities.

**Mapping Morality in Postwar German Women's Fiction** Michelle Mattson, 2010. Christa Wolf 1929, Ingeborg Drewitz 1923-1986 and Grete Weil 1906-1999 occupy very different positions in postwar German literature yet all three challenge readers to consider how individuals understand their roles in history and how they negotiate their personal responsibilities based on those roles. These three are of course by no means the only German writers to have dealt with such questions in the wake of the Third Reich. But Wolf, Drewitz and Weil ground their projects in the family, an institution often left out of such inquiries, giving them a different starting point for moral reflection.
