An Introduction to the Psychology of Paranormal Belief and Experience Tony Jinks,2011-11-08 When someone admits to a strange experience such as witnessing an unidentified flying object having telepathic hunches or seeing angels or ghosts listeners usually explain it away as mistaken perception intoxication ignorance or even mental illness Though these unsympathetic psychology based explanations remain the most popular responses to claims of the supernatural those who use them often have little understanding of what such dismissive solutions actually entail This study offers a balanced and accessible analysis of various explanations for the paranormal By providing insight into how these theories are applied or misapplied to inquiry into the paranormal it clarifies the relationship between the field of psychology and the supernatural Instructors considering this book for use in a course may request an examination copy here

The Immortal Mind Ervin Laszlo,2014-10-09 Scientific evidence for the continual presence of consciousness with or without connection to a living organism Examines findings on the survival of consciousness beyond life including near

death experiences after death communication and reincarnation Explains how this correlates precisely with cutting edge physics theories on superstrings information fields and energy matrices Reveals how consciousness manifests in living beings to continue its evolution Evidence now points to consciousness existing beyond the brain such as when the brain is temporarily incapacitated as well as to the survival of consciousness after death Conventional science prefers to dismiss these findings because they cannot be accommodated by a materialist view of reality Spirituality and religion embrace the continuity of consciousness and ascribe it to a nonmaterial spirit or soul that is immortal As such spirituality religion and science continually find conflict in their views But what if there truly is no conflict Based on a new scientific paradigm in sync with experience based spirituality Ervin Laszlo and Anthony Peake explore how consciousness is continually present in the cosmos and can exist without connection to a living organism They examine the rapidly growing body of scientific evidence supporting the continuity of consciousness including near death experiences after death communication reincarnation and neurosensory information received in altered states They explain how the persistence of consciousness beyond the demise of the body means that in essence we are not mortal we continue to exist even when our physical existence has come to an end This correlates precisely with cutting edge physics which posits that things in our plane of time and space are not intrinsically real but are manifestations of a hidden dimension where they exist in the form of superstrings information fields and energy matrices With proof that consciousness is basic to the cosmos and immortal in its deeper nonmanifest realm Laszlo and Peake reveal the purpose of consciousness is to manifest in living beings in order to continuously evolve

Psychics, Sensitives and Somnambules Rodger I. Anderson, 2015-01-27 Claimants of paranormal abilities have always attracted controversy and fascination and sometimes rigorous study by scientists Charles Bailey an Australian medium was seemingly able to materialize different objects animate and inanimate under conditions which made it difficult to conceive how they could have been normally produced Sumitra Singh a woman of Northern India who in 1984 became

subject to epileptic type seizures claimed to be possessed by spirits of the dead Franck Kluski was a Polish poet banker and physical medium who specialized in both human and animal materializations This biographical dictionary contains profiles of 330 psychics worldwide from Tony Agpaoa to Elenor Zugun each accompanied by a bibliography listing the primary sources consulted The primary focus is on those claimed psychics who have figured prominently in the history of the subject though some lesser known figures are included to show how rich varied and colorful that history has been The aim throughout is to present each case as fairly and dispassionately as the facts allow with a particular eye for accuracy in details and presentation The approach is historical not apologetic or accusatory making the work ideally suited as a permanent reference

Spirits From The Electronic Realm Nathan Toulane, The eerie subject of Electronic Voice Phenomenon and Spiricom is the focus for Stephen Reid Fascinated by its scientific history he builds a machine to contact ghosts and journeys to its darkest realms Nevertheless are these paranormal beings benevolent or are they evil Hell bent on destroying him and all he holds dear The novel takes the reader on a roller coaster ride of uncertainty until a crescendo of blood chilling actions culminates in a terrifying climax A Practical Guide to Death and Dying White, John, 2004-04-01 In A Practical Guide to Death and Dying consciousness researcher John White provides a thorough compassionate look at death and explores the biology psychology and metaphysics of one's own demise In addition to recounting the personal stories of those who have developed a healthy attitude toward death White also offers a program for personal action *The Déjà Vu Enigma* Marie D. Jones, Larry Flaxman, 2010-06-20 A deep dive into one of the most widely reported mysteries of the mind both the scientific and paranormal theories from the authors of *The Grid* You feel like you've done something before even as you do it for the very first time You engage in a conversation and suddenly realize you've spoken those same words before to the very same person Yet you're positive it's the first time you've ever met Déjà vu is the eerie sensation of remembering an experience or situation that never occurred Scientific research into déjà vu has revealed intriguing theories ranging from short term memory misfires to neurophysiological disorders Yet other theories suggest more paranormal causes for déjà vu such as glimpses into parallel realities Perhaps the true explanation lies somewhere in between But déjà vu is only one of the many mysteries of the mind *The Déjà Vu Enigma* also explores Memory lapses missing time and fugue states The brain as both receiver and transmitter of reality Altered states of perception and consciousness from hallucinations to religious visions Contagious thought curses demonic possession and mass hysteria Dream states lucid dreaming and precognitive dreams *The Grid* and parallel universes as travel routes for mind trips brain flips and time slips Come journey through a world as vast and uncharted as the Cosmos A journey through the Inner Universe the human mind From the dynamic team of Marie D Jones Larry Flaxman who have brought us some many wonderful books on fringe subject matter a completely thought provoking study HorrorNews.net **Channeling** Jon Klimo, 1998-04-17 In this study of channeling earlier called spirit communication or mediumship Klimo who teaches at Rosebridge Graduate School in the San Francisco Bay Area writes with clarity about the

communication of information to or through a physically embodied human being from a source on some other level or dimension of reality other than the physical as we know it He profiles recent channels and their sources goes back to preliterate societies and the advent of monotheism and identifies as channels such figures as Moses Solomon Muhammad Merlin Nostradamus Swedenborg and Edgar Cayce He discusses the sorts of people who are channels kinds of information channeled sources of information channeled and varieties of channeling like clairvoyance and automatic writing According to Klimo few people tap into their abilities to perform channeling and for those who think they can he serves as guide

Quantum Shift in the Global Brain Ervin Laszlo, 2008-02-27 The shift from scientific materialism to a multidimensional worldview in harmony with the world's great spiritual traditions Articulates humanity's critical choice to be the last decade of an outgoing obsolete world or the first of a new and viable one Presents a new reality map to guide us through the environmental scientific and geopolitical upheavals we are experiencing Our world is in a Macroshift The reality we are experiencing today is a substantially new reality climate change global corporations industrialized agriculture challenging us to change with our rapidly changing world lest we perish In this book Ervin Laszlo presents a new reality map to guide us through the world shifts we are experiencing the problems opportunities and challenges we face individually as well as collectively in order to help us understand what we must do during this time of great transition Science's cutting edge now views reality as broader as multiple universes arising in a possibly infinite meta universe as well as deeper extending into dimensions at the subatomic level Laszlo shows that aspects of human experience that had previously been consigned to the domain of intuition and speculation are now being explored with scientific rigor and urgency There has been a shift in the materialistic scientific view of reality toward the multidimensional worldview of multiple interconnected realities long known by the world's great spiritual traditions By understanding the interconnectedness of our changing world as well as our changing map of the world we can navigate with insight wisdom and confidence **The Resonance Key** Marie D.

Jones, Larry Flaxman, 2009-08-01 What if the true nature of reality were like an onion made up of layer upon layer that when peeled back would reveal a creative self regenerating weblike core A center that could contain the whole of all that is was and will be As physicists search for a Theory of Everything those who dare explore the paranormal are similarly searching for a unifying theory to explain the vast unknown from UFOs ghosts and cryptoids to clairvoyance remote viewing and teleportation How do these things occur Where do they come from What triggers their manifestation in our simple three dimensional reality Scientists and paranormal researchers alike are looking to resonance as the theory that could bridge the gap between science and the supernatural and explain every facet of reality in between The Resonance Key dives into the most amazing new ideas theories and research that link vibration mind and matter including What ancient civilizations knew about resonance and the use of vibratory patterns found in art nature and science and how they incorporated resonance into their sacred temples megaliths and churches The most cutting edge research into the brain and human consciousness and
