The Glassworkers Of Carmaux French Craftsmen And Political Action In A Nineteenth Century City:

The Glassworkers of Carmaux Joan Wallach Scott, 1974 This award winning study analyzes in close detail the experiences of glassworkers as mechanization transformed their trade from a highly skilled art to a semiskilled occupation Arguing that changes in the organization of work altered the lifestyle and political outlook of the glassworker Joan Scott uses local archival materials and demographic records to reconstruct the experience of ordinary workingmen Uncertain Victory James T. Kloppenberg, 1988-03-24 Between 1870 and 1920 two generations of European and American intellectuals created a transatlantic community of philosophical and political discourse Uncertain Victory the first comparative study of ideas and politics in France Germany the U S and Great Britain during these fifty years demonstrates how a number of thinkers from different traditions converged to create the theoretical foundations for new programs of social democracy and progressivism Kloppenberg studies a wide range of pivotal theorists and activists including philosophers such as William James Wilhelm Dilthey and T H Green democratic socialists such as Jean Jaur s Walter Rauschenbusch Eduard Bernstein and Beatrice and Sidney Webb and social theorists such as John Dewey and Max Weber as he establishes the connection between the philosophers challenges to the traditions of empiricism and idealism and the activists opposition to the traditions of laissez faire liberalism and revolutionary socialism By demonstrating a link between a philosophy of self conscious uncertainty and a politics of continuing democratic experimentation and by highlighting previously unrecognized similarities among a number of prominent 19th and 20th century thinkers Uncertain Victory is sure to spur a reassessment of the relationship between ideas and politics on both sides of the Atlantic Rural Society and French Politics Michael Burns, 2014-07-14 Michael Burns charts the rural impact of the two political watersheds of fin de siecle France Boulangism and the Dreyfus Affair Broadening our understanding of the early Third Republic he investigates its intricate village life and shows how the deindustrialization of the countryside both upset and solidified rural cultures Originally published in 1984 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Bowles And Gintis Revisited* Mike Cole, 2012-11-12 First Published in 1988 We live in reactionary times at the time of writing the hard right is established in the UK and America At the same time Britain has given birth to a number of progressive forces the left wing borough councils the anti nuclear movement including its impact at Greenham Common an established women s movement the miners strike the uprisings in the inner cities and the anti racist struggle while in America we have seen the advance of the Rainbow coalition and other progressive movements Whatever the way forward for the left there is a fundamental need for a re evaluation of basic Marxist scholarship but in the light of the

significance of these historical and current realities This book aims to play some small part in that process The central focus is of course education but the issues raised range far wider *The Modern World-system* Immanuel Maurice Wallerstein,1974 The Modern World System Immanuel Wallerstein s influential multivolume reinterpretation of global history traces the emergence and development of the modern world from the sixteenth century to the twentieth From publisher s description **The Modern World-System IV** Immanuel Wallerstein,2011-06-10 Centrist liberalism as ideology Constructing the liberal state 1815 1830 The liberal state and class conflict 1830 1875 The citizen in a liberal state Liberalism as social science The argument restated *Socialism and the Experience of Time* Julian Wright,2017-06-30 How do we make social democracy Should we seize the unknown possibilities offered by the future or does real change develop when we focus our attention on the immediate present The modern tradition of social revolution suggested that the present is precisely the time that needs to be surpassed but can society change without an intimate focus on today s experience of social injustice In *Socialism and the Experience of Time* Julian Wright asks how socialists in France from the mid nineteenth to the mid twentieth century tried to follow a democratic commitment to the present The debate about time that emerged in French socialism lay beneath the surface of political arguments within the left But how did this focus on the present relate to the tradition of revolution in France What did socialism have to say about social experience in the present and how did this discussion shape socialism as a movement Wright examines French socialism s fascination with modern history through a new reading of Jean Jaur s multi authored project to write a socialist history of France since 1789 Then in four interlocking biographical essays he analyses the reformist and idealist socialism of the Third Republic long side lined in the historical literature With a sometimes emotional focus on the present times of Beno t Malon Georges Renard Marcel Sembat and L on Blum a personal history unfolds that allows us to revisit the traditional narrative of French socialism This is not so much a story of the future hope for revolution as an intimate account of socialism intellectual engagement and the human present

Marxism at Work Robert Stuart,2002-05-02 This book examines the socialists who introduced Marxism to France in the decades before the First World War The Politics of Survival Steven M. Zdatny,1990 The problem of the general political inclinations of the petite bourgeoisie and especially its relationship to fascism is one of the major questions currently facing historians dealing with European society in the past one hundred years Independent artisans have at best been seen as an anachronism in the industrial age Often they are regarded as the social basis of the fascist movements of the 1920s and 30s because of their supposedly reactionary class interests Unfortunately such sweeping analyses by both Marxists and non Marxists alike have been based largely on one case that of Germany It is France however that has been considered the pre eminent nation of the petit bourgeois and fascism had only limited appeal there This is the central question Zdatny addresses in this book as he examines the social and political history of the archetypical petite bourgeois the self employed craftsmen of France **Rethinking Period Boundaries** Lucian George,Jade McGlynn,2022-03-21 Periodization is an ever present

feature of the grammar of history writing As with all grammatical rules the order it imposes can structure but also stifle historical interpretations Though few historians consider their period boundaries as anything more than useful guidelines heuristic artifice all too easily congeals into immovable structure blinkering the historical gaze In this cross disciplinary volume an international group of historians and cultural scholars considers different ways in which accepted period boundaries in modern European history and cultural studies can be challenged and rethought Alongside a theoretical introduction and epilogue the volume contains seven case studies exploring hitherto under researched continuities and discontinuities in the social cultural intellectual literary labour and art history of 19th and 20th century Europe with a particular focus on the continent's East Topics covered include French anti communism peasant memories of serfdom cosmopolitan art in a nationalist age the communist takeover of Poland Russian literary history and national day traditions in East Central Europe To problematize period boundaries the chapters in this volume adopt the perspective of social groups that standard periodization schemes have ignored shine a light on awkward actors who have appeared out of step with canonical understandings of their period consider how historical actors themselves divide up history and how this informs historical practice and explore the difficulties that the non synchronicity of different historical processes can pose for periodization

Logics of History William H. Sewell Jr., 2009-07-27 While social scientists and historians have been exchanging ideas for a long time they have never developed a proper dialogue about social theory William H Sewell Jr observes that on questions of theory the communication has been mostly one way from social science to history *Logics of History* argues that both history and the social sciences have something crucial to offer each other While historians do not think of themselves as theorists they know something social scientists do not how to think about the temporalities of social life On the other hand while social scientists treatments of temporality are usually clumsy their theoretical sophistication and penchant for structural accounts of social life could offer much to historians Renowned for his work at the crossroads of history sociology political science and anthropology Sewell argues that only by combining a more sophisticated understanding of historical time with a concern for larger theoretical questions can a satisfying social theory emerge In *Logics of History* he reveals the shape such an engagement could take some of the topics it could illuminate and how it might affect both sides of the disciplinary divide

Marriage and Fertility Theodore K. Rabb, Robert I. Rotberg, 2014-07-14 In this volume the articles are primarily on European history but their subject matter indicates the remarkable variety both of the marriage and fertility patterns of past societies and of the methods scholars have used to investigate them Originally published in 1981 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in

durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Empire and the Sun Alex Soojung-Kim Pang, 2002 Astronomy was a popular and important part of Victorian sciences and British astronomers carried telescopes to remote areas in India North America and Caribbean and Pacific islands to watch solar eclipses This book tells the full story of these expeditions the long periods of planning and financing and the day to day work of getting to field sites setting up camp and preparing observing and recording eclipses *The End of Labour History?* Marcel van der Linden, 1993 The essays in this 1994 book aim to integrate labour history within the broader discipline of social history and to demonstrate the continuing vitality and validity of the sub discipline Each essay is in itself a response to criticisms of the ways in which labour historians have approached their subjects Class Struggles Dennis L. Dworkin, 2014-05-22 In the 1960s and 1970s the study of history and sociology was heavily influenced by Marxism and theories of class But the collapse of Communism and significant changes in culture and society threw the study of class into crisis Its most basic premises were called into question More recently accelerating globalisation proliferating multinational corporations and unbridled free market capitalism have given the study of class a new significance and caused historians and sociologists to revisit the debate This book looks at the changes that caused the crisis in the study of class and shows how new vibrant theories have appeared that will drive forward our understanding of history and sociology Programmed Inequality Mar Hicks, 2018-02-23 This sobering tale of the real consequences of gender bias explores how Britain lost its early dominance in computing by systematically discriminating against its most qualified workers women Harvard Magazine In 1944 Britain led the world in electronic computing By 1974 the British computer industry was all but extinct What happened in the intervening thirty years holds lessons for all postindustrial superpowers As Britain struggled to use technology to retain its global power the nation s inability to manage its technical labor force hobbled its transition into the information age In *Programmed Inequality* Mar Hicks explores the story of labor feminization and gendered technocracy that undercut British efforts to computerize That failure sprang from the government s systematic neglect of its largest trained technical workforce simply because they were women Women were a hidden engine of growth in high technology from World War II to the 1960s As computing experienced a gender flip becoming male identified in the 1960s and 1970s labor problems grew into structural ones and gender discrimination caused the nation s largest computer user the civil service and sprawling public sector to make decisions that were disastrous for the British computer industry and the nation as a whole Drawing on recently opened government files personal interviews and the archives of major British computer companies *Programmed Inequality* takes aim at the fiction of technological meritocracy Hicks explains why even today possessing technical skill is not enough to ensure that women will rise to the top in science and technology fields *Programmed Inequality* shows how the disappearance of women from the field had grave macroeconomic consequences for Britain and why the

Artisans and Politics in Early

Nineteenth-Century London (Routledge Revivals) Iorwerth Prothero, 2013-10-14 First published in 1979 this book was the first full length study of working class movements in London between 1800 and the beginnings of Chartism in the later 1830s The leaders and rank and file in these movements were almost invariably artisans and this book examines the position of the skilled artisan in politics Starting from the social ideals outlook and the experience of the London artisan Dr Prothero describes trade union political co operative educational and intellectual movements in the first forty years of the century Setting a scene of alternating growth and contraction in trade successive hostile governments and the increasing articulation of working class consciousness the author shows that artisans could be no less militant radical or anti capitalist than other groups of working class men

Realism in the Age of Impressionism Marnin Young, 2015-07-24 The late 1870s and early 1880s were watershed years in the history of French painting As outgoing economic and social structures were being replaced by a capitalist measured time Impressionist artists sought to create works that could be perceived in an instant capturing the sensations of rapidly transforming modern life Yet a generation of artists pushed back against these changes spearheading a short lived revival of the Realist practices that had dominated at mid century and advocating slowness in practice subject matter and beholding In this illuminating book Marnin Young looks closely at five works by Jules Bastien Lepage Gustave Caillebotte Alfred Philippe Roll Jean Fran ois Raffa lli and James Ensor artists who shared a concern with painting and temporality that is all but forgotten today having been eclipsed by the ideals of Impressionism Young s highly original study situates later Realism for the first time within the larger social political and economic framework and argues for its centrality in understanding the development of modern art
