Virginia Library the world's finest and most complete collection of works by and about Borges Annotation copyright by Book
News Inc Portland OR Borges, Language and Reality Alfonso J. García-Osuna, 2018-11-23 This book brings together the
work of several scholars to shed light on the Argentine author Jorge Luis Borges complex relationship with language and
reality A critical assumption driving the work is that there is as Jaime Alazraki has put it a genuine effort to overcome the
narrowness that Western tradition has imposed as a master and measure of reality in Borges writing That narrowness is in
large measure a consequence of the chronic influence of positivist approaches to reality that rely on empirical evidence for
any authentication of what is real This study shows that in opposition to such restrictions Borges saw in fiction in literature
the most viable means of discussing reality in a pragmatic manner Moreover by scrutinising several of the author's works it
establishes signposts for considering the truly complicated relationship that Borges had with reality one that intimately
associates the real with human perception insight and language Creative Representations of Place Alison
Barnes, 2018-07-11 Cultural geography and the social sciences have seen a rise in the use of creative methods with which to
understand and represent everyday life and place Conversely many artists are producing work that centres on ideas of place
and space and utilising empirical research methods that have a resonance with geographers This book contributes to the
body of literature emerging from such creative approaches to place Drawing together theory and practice from cultural
geography anthropology and graphic design this book proposes an interdisciplinary geo-graphic process for interrogating
and re-presenting everyday life and place A diverse set of research projects highlights participatory and autoethnographic
approaches to the research The sites of the projects are varied encompassing the commercial space of grocery shops cafés
and restaurants the private domestic space of the home and a Scottish World Heritage site The theoretical context of each
project highlights the transferability of the geo-graphic process with place being variously framed within discussions of food
multi-culturalism and belonging home collecting and meaningful possessions and materiality memory and affect Themes in
the book will appeal to researchers working in the creative methods field This book will also be essential supplementary
reading for postgraduate students studying Cultural Geography Experimental Geographies Visual Anthropology Art and
