This book brings together the work of several scholars to shed light on the Argentine author Jorge Luis Borges complex
relationship with language and reality A critical assumption driving the work is that there is as Jaime Alazraki has put it a
genuine effort to overcome the narrowness that Western tradition has imposed as a master and measure of reality in Borges
writing That narrowness is in large measure a consequence of the chronic influence of positivist approaches to reality that
rely on empirical evidence for any authentication of what is real This study shows that in opposition to such restrictions
Borges saw in fiction in literature the most viable means of discussing reality in a pragmatic manner Moreover by
scrutinising several of the author s works it establishes signposts for considering the truly complicated relationship that
Borges had with reality one that intimately associates the real with human perception insight and language *Creative*
Representations of Place Alison Barnes, 2018-07-11 Cultural geography and the social sciences have seen a rise in the use of
creative methods with which to understand and represent everyday life and place Conversely many artists are producing
work that centres on ideas of place and space and utilising empirical research methods that have a resonance with
geographers This book contributes to the body of literature emerging from such creative approaches to place Drawing
together theory and practice from cultural geography anthropology and graphic design this book proposes an
interdisciplinary geo graphic process for interrogating and re presenting everyday life and place A diverse set of research
projects highlights participatory and autoethnographic approaches to the research The sites of the projects are varied
encompassing the commercial space of grocery shops caf s and restaurants the private domestic space of the home and a
Scottish World Heritage site The theoretical context of each project highlights the transferability of the geo graphic process
with place being variously framed within discussions of food multi culturalism and belonging home collecting and meaningful
possessions and materiality memory and affect Themes in the book will appeal to researchers working in the creative
methods field This book will also be essential supplementary reading for postgraduate students studying Cultural Geography
