The Politics Of Electoral Pressure:

Japan's Nuclear Disaster and the Politics of Safety Governance Florentine Koppenborg, 2023-06-15 In Japan's Nuclear Disaster and the Politics of Safety Governance Florentine Koppenborg argues that the regulatory reforms taken up in the wake of the Fukushima disaster on March 11 2011 directly and indirectly raised the costs of nuclear power in Japan. The Nuclear Regulation Authority resisted capture by the nuclear industry and fundamentally altered the environment for nuclear policy implementation. Independent safety regulation changed state-business relations in the nuclear power domain from regulatory capture to top-down safety regulation which raised technical safety costs for electric utilities. Furthermore, the safety agency's extended emergency preparedness regulations expanded the allegorical backyard of NIMBY demonstrations. Antinuclear protests, mainly lawsuits challenging restarts, incurred additional social acceptance costs. Increasing costs undermined pronuclear actors' ability to implement nuclear power policy and caused a rift inside the nuclear village. Small nuclear safety administration reforms were in fact game-changers for nuclear power politics in Japan. Koppenborg's findings contribute to the vibrant conversations about the rise of independent regulatory agencies, crisis as a mechanism for change, and the role of nuclear power amid global interest in decarbonizing our energy supply. **The politics of housing** Peter Shapely, 2017-10-03 Exploring the politics of housing during 1890-1990, this fascinating study examines the interaction not only of national and local politics but also of local factors such as civic culture, key local players, local discourse, and geographical and demographic problems. This book argues that increasingly tenants acted as consumers of a public service and it questions the way in which notions of consumerism shaped responses to the housing debate. An analysis of the impact of legislation on housing policy in different cities is provided as well as a more detailed account of the politics of housing in Manchester, including the Victorian legacy, the emergence of local government intervention, post-war overspill estates, new system-built flats, and their rapid deterioration, rising tenant anger and protests, and the beginning of a new approach based on consultation and partnerships. The book will be of value to anyone studying urban history, politics, governance, civic culture, social policy, and society. Proceedings of the Federal Electric Railways Commission United States. Federal Electric Railways Commission, 1920 The Political Party as a Social Process ... Viva Belle Boothe, 1923 Proceedings of the Federal Electric Railways Commission Estados Unidos. Federal electric railways commission, 1920 *Electrical Palestine* Fredrik Meiton, 2019-01-15 Electricity is an integral part of everyday life so integral that we rarely think of it as political. In *Electrical Palestine* Fredrik Meiton illustrates how political power, just like electrical power, moves through physical materials whose properties govern its flow. At the dawn of the Arab-Israeli conflict, both kinds of power were circulated through the electric grid that was built by the Zionist engineer Pinhas Rutenberg in the period of British rule from 1917 to 1948. Drawing on new sources in Arabic, Hebrew, and several European languages, *Electrical Palestine* charts a story of rapid and uneven development that was greatly influenced by the electric grid and set the stage for the conflict between

Arabs and Jews Electrification Meiton shows was a critical element of Zionist state building The outcome in 1948 therefore of Jewish statehood and Palestinian statelessness was the result of a logic that was profoundly conditioned by the power system a logic that has continued to shape the area until today World Constitution - A Comparative Study Vishnoo
