The Politics Of The German Gothic Revival August Reichensperger

Harry Francis Mallgrave

The Politics Of The German Gothic Revival August Reichensperger:

The Politics of the German Gothic Revival Michael J. Lewis, 1993 The author's examination of key buildings of this period is based on Reichensperger's lively and irreverent correspondence with the architects themselves *When Buildings Speak* Anthony Alofsin, 2006 The canonical inventors of International Style have long dominated studies of modern European architecture But in this text Anthony Alofsin broadens this scope by exploring the rich yet overlooked architecture of the late Austro-Hungarian Empire and its successor states **Neo-Gothic Architecture in Mexico** Martin M.

Checa-Artasu, 2025-06-02 Neo Gothic architecture is a global phenomenon observed in Mexico from the 1850s to the mid 20th century even with current examples In Mexico there are more than 500 buildings with some neo Gothic element new parishes and churches large temples examples of exterior decorations beautiful sacred furniture and art inside the temples funerary elements at cemeteries graves mausoleums tombs and civil buildings mansions houses schools hospitals porticoes so on This architecture in Mexico spread in two ways through architecture teaching academies but also thanks to the diffusion of bishops and priests who showed images and engravings for master builders stonemasons and other local artisans to copy Finally they built these buildings many times with the support of the parishioners Also the economic and political elites built mansions and houses in that style to show their wealth and financial and political power Something they also did in their tombs and pantheons since there are many built in that style A book on the characteristics agents and causes of the development of the neo Gothic style in Mexico is pioneering and the first of its kind It is a type of architecture extraordinarily little studied in Mexico A study of these characteristics would be of interest to a sector of the academy interested in the topics of history of architecture art studies on religion and culture in general This book covers a huge gap in knowledge about an architectural style widely spread worldwide and that is widely unknown in Mexico and Latin America and that today is already a cultural heritage to be protected disseminated and valued **The Art of Building** Auke Van Der

Woud, 2017-10-23 This title was first published in 2002 In the second half of the 18th century philosophy provided the fundamental characteristics of architecture The architects of the 19th century then introduced the empirical comparative study of buildings This phenomenon has usually been regarded exclusively in terms of historicism but this is to underestimate the fact that they were architects The problems for which they sought solutions did not belong to the past but were part of their own age or the future The architecture of the past was to the 19th century architect significant to a large degree as a silent witness of a bygone era a representation of beauty Historical architecture provided study material for their inquiries into the aesthetic laws that they hoped would give the 19th century a splendid contemporary architecture The art of building as a way of visibly edifying society was the most important of all the arts with architectural theory showing the way to this lofty purpose This book takes this as a starting point Focusing on place as well as time the text discusses the Dutch architects who contributed to this idea discussing several of the most important but ultimately seeing their activities not as the cause

but the expression of movements that continuously changed the face of architecture The particularly Dutch nature of architecture took visual beauty to result from the visible success of technical intelligence and creativity rather than philosophy and aesthetics The grand 19th century themes discussed in the book are the author suggests somewhat un Dutch originating as they did from an idealist intellectual tradition **Gottfried Semper** Harry Francis Mallgrave,1996-01-01 *Biografie van de Duitse architect en architectuurtheoreticus 1803 1879* *Propaganda and the Jesuit Baroque* Evonne Levy,2004-04-14 This is a subtle intelligent and deeply learned recasting of a whole range of issues central to art history the place of the Baroque in the construction of modern art histories the peculiar aesthetics of propaganda as a distinctively institutional mobilizing of images and forms the role of the Jesuits in constructing and then deconstructing the relation of architectural style and ideology Evonne Levy s careful readings of key monuments in the Catholic Baroque shed light not only on those works but on the whole evolution of art historical understanding and misunderstanding that has made the Baroque so central and problematic for the discipline of art history W J T Mitchell editor of Critical Inquiry and author of Iconology and Picture Theory One of the most original and provocative books in the field of Baroque studies to emerge in the last twenty years *Propaganda and the Jesuit Baroque* at once presents a wealth of new materials and radically rethinks what has long been known about the Jesuit Order as a patron of the arts Through the lens of propaganda Evonne Levy illuminates her subject in an unprecedented way Steven F Ostrow author of Art and Spirituality in Counter Reformation Rome

Envisioning Others: Race, Color, and the Visual in Iberia and Latin America ,2015-10-05 *Envisioning Others* offers a multidisciplinary view of the relationship between race and visual culture in the Spanish and Portuguese speaking world from the kingdoms of Spain and Portugal to colonial Peru and Colombia post Independence Mexico and the pre Emancipation United States Contributed by specialists in Latin American and Iberian art history literature history and cultural studies its ten chapters take a transnational view of what race meant and how visual culture supported and shaped this meaning within the Ibero American sphere from the late Middle Ages to the modern era Case studies and regionally focused essays are balanced by historiographical and theoretical offerings for a fresh perspective that challenges the reader to discern broad intersections of race color and the visual throughout the Iberian world Contributors are Beatriz Balanta Charlene Villase or Black Larissa Brewer Garc a Ananda Cohen Suarez Elisa Foster Grace Harpster Ilona Katzew Matilde Mateo Mey Yen Moriuchi and Erin Kathleen Rowe **Empire Building** Mark Crinson,2013-10-11 The colonial architecture of the nineteenth century has much to tell us of the history of colonialism and cultural exchange Yet these buildings can be read in many ways Do they stand as witnesses to the rapacity and self delusion of empire Are they monuments to a world of lost glory and forgotten convictions Do they reveal battles won by indigenous cultures and styles Or do they simply represent an architectural style made absurdly incongruous in relocation *Empire Building* is a study of how and why Western architecture was exported to the Middle East and how Islamic and Byzantine architectural ideas and styles impacted on the West The

book explores how far racial theory and political and religious agendas guided British architects and how such ideas were resisted when applied and how Eastern ideas came to influence the West through writers such as Ruskin and buildings such as the Crystal Palace Beautifully written and lavishly illustrated Empire Building takes the reader on an extraordinary postcolonial journey backwards and forwards into the heart and to the edge of empire

Style and Solitude Mari Hvattum, 2023-06-06 How modern notions of architectural style were born and the debates they sparked in nineteenth century Germany The term style has fallen spectacularly out of fashion in architectural circles Once a conceptual key to understanding architecture s inner workings today style seems to be associated with superficiality formalism and obsolete periodization But how did style once defined by German sociologist Georg Simmel as a place where one is no longer alone in architecture actually work How was it used and what did it mean In Style and Solitude Mari Hvattum seeks to understand the apparent death of style returning to its birthplace in the late eighteenth century and charting how it grew to influence modern architectural discourse and practice As Hvattum explains German thinkers of the eighteenth and nineteenth century offered competing ideas of what style was and how it should be applied in architecture From Karl Friedrich Schinkel s thoughtful eclecticism to King Maximilian II s attempt to capture the zeitgeist in an architectural competition style was at the center of fascinating experiments and furious disputes Starting with Johann Joachim Winckelmann s invention of the period style and ending a century later with Gottfried Semper s generative theory of style Hvattum explores critical debates that are still ongoing today
