The Power In Our Hands Neighbourhood Based World Shaking:

The Well-Connected Community Alison Gilchrist, 2019-09-18 There is growing recognition in practice and policy of how networking contributes to the vitality and cohesion of community life and civil society The Well Connected Community provides theoretical insights and practical guidance for people working with and for communities This updated edition takes account of the changing political and economic context including rising social inequalities and community tensions It considers new approaches to well being such as social prescribing and the use of social media for local and global organising This model of community development explains and promotes networking as a skilled and strategic intervention and provides recommendations for good practice

The well-connected community Gilchrist, Alison, 2009-07-22 Since the publication of the first edition of The well connected community there has been a growing recognition in practice and policy of how networks contribute to the vitality of community life and civil society Government policy has increasingly emphasised the need to involve communities in decision making while social capital is increasingly associated with health low levels of crime educational achievement and a strong sense of community The well connected community aims to strengthen and extend informal networks support partnership working across boundaries and promote social cohesion It explores the concept of community in relation to patterns of interaction social identity and mutual influence advocating a new model of community development that promotes networking as a skilled and strategic intervention and providing recommendations for good networking practice This fully updated second edition includes new ideas drawn from recent research on social capital and the policy context for community practice reflecting the increasing emphasis on community engagement and empowerment Recent case studies and examples have been added throughout The well connected community is aimed at practitioners trainers policy makers and managers working with communities or responsible for community participation strategies both in the UK and internationally Academics will also find it a useful source for teaching and research

Revolutions in Development Inquiry Robert Chambers, 2012-05-04 Robert Chambers returns with a new book that reviews together for the first time some of the revolutionary changes in the methodologies and methods of development inquiry that have occurred in the past forty years and reflects on their transformative potential for the future This book breaks new ground by describing and analysing the evolution of a sequence of approaches Starting with the dinosaurs of large scale multi subject questionnaire surveys and the biased visits and perceptions of rural development tourism and urban based professionals there follows a look at the explosive proliferation of methodologies and methods of recent years These include rapid rural appraisal RRA participatory rural appraisal PRA and dramatic developments in the still largely unrecognized fields of participatory numbers and statistics and of participatory mapping and GIS Chambers shows how these can empower local people and provide rigorous and valid substitutes for some more traditional methods of inquiry Also presented is a repertoire for offsetting the biases of the urban trap which has become so serious for officials and aid agency staff Importantly

Chambers points out that we are now in a different space methodologically from a few years ago. He makes the case that participatory methodologies evolved through creative and eclectic pluralism can be a transformative wave for the future as drivers of personal, professional and institutional change. This book is for all who are concerned with development regardless of profession, discipline or organization who seek to be abreast of the revolutionary breakthroughs in approaches and methods of inquiry of recent years and what Chambers calls their unlimited potentials. Published with IDS. The Community Planning Handbook Nick Wates, 2010-09-23. Growing numbers of residents are getting involved with professionals in shaping their local environment and there is now a powerful range of methods available from design workshops to electronic maps. The Community Planning Handbook is the essential starting point for all those involved: planners and local authorities, architects and other practitioners, community workers, students and local residents. It features an accessible how-to style, best practice information on effective methods and international scope and relevance. Tips, checklists and sample documents help readers to get started quickly, learn from others' experience and to select the approach best suited to their situation. The glossary, bibliography and contact details provide quick access to further information and support.

Participatory Pathways Rajiv Balakrishnan, 2007. Contributed articles, some of which have been previously presented in a seminar and in two journals.

Promoting Participation: Law Or Politics? David Campbell, 2012-07-23. The authors argue for constitutional reform which would facilitate British citizens' effective participation in the making of the decisions that set the basic pattern of their collective life. They assert that this failure of the British Constitution is unacceptable.

A Planner's Encounter with Complexity Elisabete A. Silva, 2016-03-16. Spatial planning is about dealing with our everyday environment. In *A Planner's Encounter with Complexity* we present various understandings of complexity and how the environment is considered accordingly. One of these considerations is the environment as subject to processes of continuous change, being either progressive or destructive, evolving non-linearly and alternating between stable and dynamic periods. If the environment that is subject to change is adaptive, self-organizing, robust and flexible in relation to this change, a process of evolution and co-evolution can be expected. This understanding of an evolving environment is not mainstream to every planner. However, in *A Planner's Encounter with Complexity* we argue that environments confronted with discontinuous, non-linear, evolving processes might be more real than the idea that an environment is simply a planner's creation. Above all, we argue that recognizing the complexity of our environment offers an entirely new perspective on our world and our environment, on planning theory and practice and on the raison d'être of the planners that we are. *A Planner's Encounter with Complexity* is organized into 17 chapters. It begins with the interplay of planning and complexity from the perspective of contemporary planning theory. It continues by critically assessing planning theory and practice in the light of the interdisciplinary debate regarding complexity thinking. As the book progresses, it positions itself ever closer to the perspective of complexity thinking, looking at the planning discipline from the outside in, clarifying the facets of complexity and its

importance in planning Finally conceptual and theoretical developments towards more applied examples are identified in order to see the interplay of planning and complexity in practice This book emphasizes the importance of complexity in planning clarifies many of the concepts and theories presents examples on planning and complexity and proposes new ideas and methods for planning

Architecture, Participation and Society Paul Jenkins, Leslie Forsyth, 2009-09-10 How can architects best increase their engagement with building users and wider society to provide better architecture Since the mid 1990s government policy has promoted the idea of greater social participation in the production and management of the built environment but there has been limited direction to the practising architect Reviewing international cases and past experiences to analyze what lessons have been learnt this book argues for participation within other related disciplines and makes a set of recommendations for architectural practices and other key actors

Ground Rules in Humanitarian Design Alice Min Soo Chun, Irene E. Brisson, 2015-06-15 Delve deep into the complex issues surrounding humanitarian design Ground Rules in Humanitarian Design establishes essential foundations for thinking about humanitarian design and its role in global change Outlining a vital framework for designing for impoverished and disaster stricken communities this informative guide explores the integration of culture art architecture economy ecology health and education Experts on land health water housing education and planning weigh in with best practices and critical considerations during the design process and discussion of the environmental considerations and local materials skills will broaden your understanding of this nuanced specialty Richly illustrated this guide combines graphic documentation of projects maps and data tracking developments from Asia Africa and the Americas to underscore the complexities of this emerging and evolving field The ambition to provide humanitarian architecture for areas in acute need is driving design innovation worldwide among both practitioners and educators This book provides an indispensable resource for those engaged in the search for the sustainable inclusion of cultural code and compassion as a technology for design innovation Learn how to approach the problem of humanitarian design Understand the cultural factors that play into development Develop a new framework for planning post disaster design See how humanitarian design is pushing the industry forward While still in college students are being given the opportunity to directly participate in programmes that provide vital facilities for communities abroad While these international initiatives remain largely ad hoc this book provides parameters for engagement and establishes best practices for approaching these projects with a global perspective With expert insight and practical strategies on the ground Ground Rules in Humanitarian Design is an essential resource for architects at any level

Reviving Democracy Barry Knight, Rajesh Tandon, 2012-05-23 The aim of this text is to analyze the conditions for a good society and from extensive international research to show how citizens can be put at the centre of the political process This has enormous importance for future policy which the authors explore With support from the Commonwealth Foundation the book sets out to change the current political consensus and demonstrate the route forward to sustainable development
