The Imminent Collapse of America and of the Whole Western Civilization Angelo Bertolo,2012-09 In the 5000 years of the history that we know great empires grew and fell according to certain patterns that repeat themselves like laws of nature The USA rose and grew to prominence in the world reached its zenith in 1945 with the military victory and with the atom bomb but is not destined to stay there forever The book tries to draw the attention to the signs of decadence that match the patterns of the decadence of previous empires in history and the patterns of growth of progress in other cultural milieus very few pundits in America and in the western media in general seem to be aware of this fact The birth rates keep diminishing in America and are very low in Europe In other civilisations the birth rates have been high and those countries count more in the world today politically and economically than a few generations ago In addition the irrational and passionate attitude of those peoples including the aggressive suicidal attitude with religious and political connotations is a sign of progress for them Those people who are in favour of family planning programs and of a more relaxed morality are acting against the general interests of their countries **Marketing Death** Cheris Shun-ching Chan,2012-03-22 How do companies sell life insurance in a country where death is a taboo subject In Marketing Death Cheris S C Chan explores both how and why the life insurance industry has managed to emerge in China a country with an entrenched cultural stigma against the very topic of death Drawing on extensive ethnographic fieldwork and engaging with current scholarship Chan

explores the processes and micro politics by which foreign and domestic companies have negotiated local cultural resistance and created a market in spite of it In doing so she asks larger questions about how different societies view and value life and death what is meant by cultural values how they interact with a set of fragmented cultural tools to compellingly organize individuals practical daily lives and how the market is influenced by them Chan tells a story not just of the emergence of the Chinese life insurance industry but of the dynamic relationships between culture and markets local norms and foreign influences in one of the world s fastest growing economies *Marketing Death* is the first book to offer a sociological analysis of the emergence of a life insurance market outside of a European or American context Through in depth study of the expansion of an industry whose unique product gambling on one s own sudden death has always met with a measure of resistance but never more so than in China Chan provides a new lens for understanding how modern capitalist enterprises are diffused to regions with disparate cultural traditions *The Promise of the New and Genealogies of Education Reform* Julie
