Al-Shanti, 2015-12-04 *Evolution and Mineralization of the Arabian Nubian Shield Volume 3* presents the exploration for mineral resources in the Precambrian basement terrain underlying large areas of the Middle East This book discusses the geological investigations of the tectonic evolution structure and metallogenesis of the Arabian Nubian Shield Organized into three parts encompassing 13 chapters this volume begins with an overview of the chronologic scheme for the evolution of the southern part of the Arabian Shield and provides evidence of its genesis at a convergent plate

margin between blocks of oceanic lithosphere This text then examines the granitic crust with associated calc alkaline volcanics of Pan African age Other chapters consider the isotopic ages for the rocks of the Egyptian basement complex This book discusses as well the distribution form and variety of intrusive activity in the Jiddah Rabigh Wadi Al Quaha area The final chapter deals with the properties of igneous rocks from Jordan This book is a valuable resource for geologists

Proterozoic Geology L. Gordon Medaris,1983 **The Physical Geography of the Mediterranean** Jamie Woodward,2009-05-07 This volume explores the climates landscapes ecosystems and hazards that comprise the Mediterranean world It traces the development of the Mediterranean landscape over very long timescales and examines modern processes and key environmental issues in a wide range of settings The Mediterranean is the only region on Earth where three continents meet and this interaction has produced a very distinctive Physical Geography This book examines the landscapes and processes at the margins of these continents and the distinctive marine environment between them Catastrophic earthquakes explosive volcanic eruptions and devastating storms and floods are intimately bound up within the history and mythology of the Mediterranean world This is a key region for the study of natural hazards because it offers unrivalled access to long records of hazard occurrence and impact through documentary archaeological and geological archives The Mediterranean is also a biodiversity hotspot it has been a meeting place for plants animals and humans from three continents throughout much of its history The Quaternary records of these interactions are more varied and better preserved than in any other part of the world These records have provided important new insights into the tempo of climate landscape and ecosystem change in the Mediterranean region and beyond The region is unique because of the very early and widespread impact of humans in landscape and ecosystem change and the richness of the archaeological and geological archives that chronicle this impact This book examines this history and these interactions and places current environmental issues in long term context Contributors Ramadan Husain Abu Zied Harriet Allen Jacques Blondel Maria Carmen Llasat James Casford Marc Castellnou Andrew Goudie Andrew Harding Angela Hayes Tom Holt Babette Hoogakker Philip Hughes Jos Lelieveld John Lewin Francisco Lloret Francisco Lopez Bermudez Mark Macklin Jean Margat Anne Mather Fr d ric M dail Christophe Morhange Clive Oppenheimer Jean Palutikof Gerassimos Papadopoulos Josep Pi ol David Pyle Jane Reed Neil Roberts Eelco Rohling Iain Stewart Stathis Stiros John Thornes Chronis Tzedakis John Wainwright **Geological Exploration in Murzuq Basin** D. Worsley,2000-12-19 The Murzuq Basin is a large intracratonic sag basin located in southwestern Libya Exploration efforts started in this vast and remote Saharan region already in 1957 and 60 exploratory wells have been drilled to date resulting in over 20 discoveries with around 4 000 million barrels of oil in place Most discoveries have been made in Ordovician sandstone reservoirs sourced by hot shales of the Lower Silurian Tanezzuft Formation Oil is already being produced and exported from the area but the basin s total hydrocarbon potential is still poorly understood Recent exploration especially the major discovery and initial development of the Giant Elephant Field has greatly

increased interest for the area's potential. Many petroleum geologists and companies now believe that the basin may well develop into a new major hydrocarbon province which will significantly contribute to Europe's energy needs in the next decades. This book presents papers from a conference held at Sebha University on the eastern margins of the Murzuq Basin in September 1998. The book continues an ongoing series of presentations of the geology of Libya but the 25 contributions herein mostly centre on the Murzuq Basin itself and on nearby areas. There are still many unresolved questions in terms of geological and hydrocarbon exploration in these difficult desert areas but the papers herein will hopefully present a first comprehensive overview of an exciting frontier exploration region. About half of the papers are directly related to hydrocarbon exploration and to source rock and reservoir development but a wide variety of other features are also described ranging from palaeontology and biostratigraphy to ore geology and water resources covering the entire geological column from the Precambrian to the Holocene. The book concludes with a bibliography covering all geological aspects of this challenging but very promising frontier area.

Geology of North America—An Overview Albert W. Bally, Allison R. Palmer, 1989. Summaries of the major features of the geology of North America and the adjacent oceanic regions are presented in 20 chapters. Topics covered include concise reviews of current thinking about Precambrian basement, Phanerozoic orogens, cratonic basins, passive margin geology of the Atlantic and Gulf Coast regions, marine and terrestrial geology of the Caribbean region and economic geology.

The Geology of the Arabian-Nubian Shield Zakaria Hamimi, Abdel-Rahman Fowler, Jean-Paul Liégeois, Alan Collins, Mohamed G. Abdelsalam, Mohamed Abd El-Wahed, 2021-07-30. This richly illustrated book reviews the geology, tectonics and mineralization of the Arabian Nubian Shield (ANS) in 27 chapters. It starts with an examination of the ANS lithospheric scale features, explores Mesoproterozoic units and deals with the ANS oceanic stage. Arc volcanism and plutonism, post-collision basins and volcanics are discussed as well as the younger granitoid magmatism and the deformation history of the ANS. The book provides information on ANS glacial stages and late magmatism. Chapters are devoted to review the transition between ANS and the reworked continent to its south. Finally, it discusses how ANS structures influenced the overall East African Rift System.

Biogeography and Ecology in South America E.J. Fittkau, J. Illies, H. Klinge, G.H. Schwabe, 2012-12-06. With Biogeography and Ecology in South America as the general theme, a total of twenty-nine contributions by thirty authors is offered here in two volumes, being volumes 18 and 19 of the *Monographiae Biologicae*. Most of these discussions deal with decidedly specialist themes and the editors have been particularly concerned to ensure that the authors enjoyed the greatest possible freedom in the preparation of their work in order that different points of view and interpretations together with some questions of controversy may be clarified. This also applies of course to the several chapters in which general themes—geographical substance, climate, geology, vegetation—amongst others are discussed. Since the amount of material available is too great to enable one to aspire to a presentation of the complete biogeographical and ecological picture, this procedure seems expedient. However, these two volumes could well

be regarded as being a preparatory work for just such a complete description Each of the separate technical contributions refers to the continent as a whole in order to characterise it as such from the viewpoint of the specialist For this reason it was necessary to forgo special discussions of particular regions or types of landscape although South America of all places is remarkably rich in unique regional phenomena the altiplano of Peru and Bolivia the relict forests of Fray Jorge the shrub formations of Tierra del Fuego the lakes of the High Andes for example
