original poetry the author leads us to inner worlds shaped partly by the New England countryside tracking shifts in the region's nature infrastructure and people while sharing observations on borders and climate catastrophe that reverberate globally Dykstra condenses signs of urban expansion economic division and battles over democracy into an innovative meditation With a dynamic approach to form musicality and scope Dissonance explores ways of experiencing regional landscapes and imagined communities in the twenty first century Through her extended sequence of prose poems photographs and lyric fragments Dykstra merges clips from documents and dialogues with observations drawn from two local libraries and her daily walks down a dirt road through Vermont's foothills As she moves down this public road which lies within the nation's federally designated hundred mile border zone she finds a daily convergence of tensions Dissonance asks how poetry can unsettle impressions of a place and how that process in turn disturbs impressions of self of others and of time itself Dissonance is the recipient of the third annual Phoenix Emerging Poet Book Prize Evolving God Barbara J. King, 2017-04-21 The author of How Animals Grieve contends that religion is a consequence of primate evolution in this brilliant book Booklist starred review Religion has been a central part of human experience since at least the dawn of recorded history. The gods change as do the rituals but the underlying desire remains a desire to belong to something larger greater most lasting than our mortal finite selves But where did that desire come from Can we explain its emergence through evolution Yes says biological anthropologist Barbara J King and doing so not only helps us to understand the religious imagination but also reveals fascinating links to the lives and minds of our primate cousins Evolving God draws on King s own fieldwork among primates in Africa and paleoanthropology of our extinct ancestors to offer a new way of thinking about the origins of religion one that situates it in a deep need for emotional connection with others a need we share with apes and monkeys Though her thesis is provocative and she s not above thoughtful speculation King s argument is strongly rooted in close observation and analysis She traces an evolutionary path that connects us to other primates who like us display empathy make meanings through interaction create social rules and display imagination the basic building blocks of the religious imagination With fresh insights she responds to recent suggestions that chimpanzees are spiritual or even religious beings and that our ancient humanlike cousins carefully disposed of their dead well before the time of Neandertals Her interpretations result in a provocative hypothesis about the evolution of spirituality The Dallas Morning News Your Inner Zoo Belinda Recio, 2022-01-11 What might we learn about our own human natures from the friskiness of a young goat the focus of a hawk the transformation of a butterfly or the hibernation of a bear How can animals through their natural and cultural histories offer us ideas that could help us better understand ourselves navigate a relationship or change an aspect of our lives Do the animals that we admire or fear reveal something about us What about the animals who appear in our dreams visions and creative inspirations These are some of the questions addressed in Your Inner Zoo A Guide to the Meaning of Animals and the Insights They Offer Us You can use Your Inner Zoo to explore yourself through animals to approach animals
