The Genesis Of Values:

The Genesis of Values Hans Joas, 2001-04-01 Public and intellectual debates have long struggled with the concept of values and the difficulties of defining them With The Genesis of Values renowned theorist Hans Joas explores the nature of these difficulties in relation to some of the leading figures of twentieth century philosophy and social theory Friedrich Nietzsche William James Max Scheler John Dewey Georg Simmel Charles Taylor and J rgen Habermas Joas traces how these thinkers came to terms with the idea of values and then extends beyond them with his own comprehensive theory Values Joas suggests arise in experiences in self formation and self transcendence Only by appreciating the creative nature of human action can we understand how our values arise The Origin of Values Michael Hechter, Lynn Nadel, Richard E. Michod, 1993-01-01 Although values play a leading role in nearly every explanatory theory in the broad realm of the social and behavioral sciences very little multidisciplinary research material on values is available Addressing this need the editors bring together distinguished social scientists psychologists and biologists who collaboratively explore fundamental questions about values What are the determinants of social values taboos and ideologies What are the determinants of individual values What is the nature of motivations and rewards Is there an evolutionary basis for the development of values **Effect** Brian P. Hall, 2006-08-01 What are your values What impact do they have on your personal growth your family life your professional life The Genesis Effect is a groundbreaking exploration of the relationship between values and growth Bringing twenty years of research to his subject Dr Brian P Hall shows how human spiritual and institutional growth are interconnected and form a dynamic whole The author explains how values develop when a person s internal images and ideas interact with the external world The Genesis Effect is the growth that takes place when these values create transformations in ourselves in others and in the organizations we belong to The Genealogy of Values Edward Andrew, 1995 Until the time of Karl Marx and John Stuart Mill philosophers generally held economics to be an integral element of moral philosophy These days the language of values moral aesthetic and cognitive dominates philosophic discourse even though contemporary philosophers rarely hold economics to be integral to moral philosophy Examining the thought of Friedrich Nietzsche and the art of Marcel Proust Edward Andrew provides the first sustained critical analysis of values discourse an analysis that deconstructs its content and its form The Sacredness of the Person Hans Joas, 2013-02-19 What are the origins of the idea of human rights and universal human dignity How can we most fully understand and realize these rights going into the future In The Sacredness of the Person internationally renowned sociologist and social theorist Hans Joas tells a story that differs from conventional narratives by tracing the concept of human rights back to the Judeo Christian tradition or alternately to the secular French Enlightenment While drawing on sociologists such as mile Durkheim Max Weber and Ernst Troeltsch Joas sets out a new path proposing an affirmative genealogy in which human rights are the result of a process of sacralization of every human being According to Joas every single human being has increasingly been viewed as sacred He

discusses the abolition of torture and slavery once common practice in the pre 18th century west as two milestones in modern human history The author concludes by portraying the emergence of the UN Declaration of Human Rights of 1948 as a successful process of value generalization Joas demonstrates that the history of human rights cannot adequately be described as a history of ideas or as legal history but as a complex transformation in which diverse cultural traditions had to be articulated legally codified and assimilated into practices of everyday life The sacralization of the person and universal human rights will only be secure in the future warns loas through continued support by institutions and society vigorous discourse in their defense and their incarnation in everyday life and practice **Pragmatism and Literary Studies** Do We Need Religion? Hans Joas, 2015-11-17 The old assumption that modernization leads to Winfried Fluck, 1999 secularization is outdated Yet the certainty that religion is an anthropological universal that can only be suppressed by governments is also dead Thus it is now a favorable moment for a new perspective on religion This book takes human experiences of self transcendence as its point of departure Religious faith is seen as an attempt to articulate and interpret such experiences Faith then is neither useful nor a symptom of weakness or misery but an opening up of ways of experience This book develops this basic idea contrasts it with the thinking of some leading religious thinkers of our time and relates it to the current debates about human rights and universal human dignity The Philosophical Review Jacob Gould Schurman, James Edwin Creighton, Frank Thilly, Gustavus Watts Cunningham, 1915 An international journal of general philosophy **The Performativity of Value** Steve Sherlock, 2013-12-18 The Performativity of Value On the Citability of Cultural Commodities addresses the increased commodification of language in the U S cultural economy The marketing of cultural commodities in formats such as websites videos movies books online games or television episodes as distributed across a wide range of technological devices means that language is moving across situational contexts to an unprecedented degree Just as authors quote or paraphrase sources in the construction of a text subjects cite the commodified words images and works of others as they construct their social identities Steve Sherlock discusses how consumer citational practices generate demand for those cultural commodities which align the self with particular subcultural groups By re citing the exchange value frame within which language itself has acquired an economic worth consumer citational practices have become performative of the U S cultural economy In order to describe this process the book extends the work of Judith Butler on the performativity of gender to the performativity of exchange value as well as to the performativity of subcultural values The book also develops a critique of the increasing commodification of language in the contemporary economy Sherlock follows Butler in developing a model of performativity based on Jacques Derrida's work particularly regarding the citability of language into new situational contexts Derrida's critique of the metaphysics of presence in Western philosophy and culture is extended toward a critique of the assumed presence of exchange value in the cultural marketplace The book also incorporates the work of the Bakhtin Circle into this framework especially their insight into how everyday utterances which

report on the words of others become a site for the re negotiation of values between self and others. The re citational process used in contemporary identity construction can thus either re cite the current cultural economy or resist it The Performativity of Value contributes to themes examined in social theory social psychology literary theory continental philosophy and cultural studies and thus will be of interest to students and scholars working in those areas Marxism and Morality Nicholas Churchich, 2022-04-28 Not himself a Marxist Dr Churchich has nevertheless won plaudits for this book from those committed to the philosophy It is they acknowledge thoroughly researched well reasoned and balanced in its argument even if that argument is one with which Marxists are bound to disagree being based on the premise that ethical theories must ultimately rest on metaphysical and psychological preconceptions rather than on some imaginary empirical facts The declared aim of this work is to present a full exposition of Marx s and Engels ideas on morality and ethics and to indicate some of their errors and weaknesses Unlike other studies of this subject Churchich analyses all major aspects of morality dealing not only with the writings of Marx himself but also with the works of most writers who have commented on Marxist morality and ethics Marx himself intended to produce a work on social morality but did not manage to do so This book will therefore and without doubt become the standard work on his view of the subject Superior to anything else on the topic written by non Marxists it is clearer on some aspects of Marx s view than the work of some Marxist writers Churchich makes obvious for instance how great was Althusser's mistake in arguing that there is not a grain of normative ethics in mature Marx Yet the author's objectivity allows him also to find values among the ethical arguments of Marx and Engels making this a book which both Marxists and concerned Anglicans would find useful as a criticism of some current social trends It also sounds a cautionary note for those who argue that the collapse of bureaucratic socialism in the former Soviet Union means the end of Marxism too this is by no means Dr Churchich s view **Concepts and Values in Biodiversity** Dirk Lanzerath, Minou Friele, 2014-01-23 Biodiversity may refer to the diversity of genes species or ecosystems in general These varying concepts of biodiversity occasionally lead to conflicts among researchers and policy makers as each of them require a customized type of protection strategy This book addresses the questions surrounding the merits of conserving an existing situation evolutionary development or the intentional substitution of one genome species or ecosystem for another Any practical steps towards the protection of biodiversity demand a definition of that which is to be protected and in turn the motivations for protecting biodiversity Is biodiversity a necessary model which is also useful or does it carry intrinsic value Debates like this are particularly complex when interested parties address it from different conceptual and moral perspectives Comprised of three parts each complemented by a short introductory paragraph this collection presents a variety of approaches to this challenge The chapters cover the perspectives of environmental scientists with expertise in evolutionary environmental biology systematic zoology and botany as well as those of researchers with expertise in philosophy ethics politics law and economics This combination facilitates a truly interdisciplinary debate by highlighting hitherto unacknowledged implications that inform

current academic and political debates on biodiversity and its protection The book should be of interest to students and researchers of environment studies biodiversity environmental philosophy ethics and management Complexity and the Experience of Values, Conflict and Compromise in Organizations Ralph Stacey, Douglas Griffin, 2008-03-20 What role do values play in organizational life How do they shape the efficiency and effectiveness of organizational change This volume examines what we actually mean when we use the term values and what it means to act according to values in ordinary everyday life The contributors to this volume provide an exposition of the circular relationship between values conflict and compromise It can be said that current research lacks a thorough exploration of what we actually mean by human values and what it means to act according to values in ordinary everyday life in organizations This is what the chapters in this volume seek to address through the reflections of organizational practitioners on their ordinary work in organizations Covering subject areas such as organizational theory and behaviour and organizational analysis as well as the sociology of work and industry this book will appeal to researchers and practitioners alike Human Resource Management in Sport and Recreation P. Chelladurai, 2006 The second edition of this ground breaking text continues to guide students toward a greater understanding of human resource management in the sport and recreation environment Human Resource Management in Sport and Recreation Second Edition provides future practitioners with a solid foundation in research and application of human resource management for success in the sport industry With more than 30 years of experience in management of human resources Dr Packianathan Chelladurai provides an understanding of the dynamics of human resources and management bringing into focus the three divergent groups of people who constitute human resources in sport and recreation organizations paid professional workers volunteers and the clients themselves Dr Chelladurai goes on to match managerial processes with individual differences among those three groups Human Resource Management in Sport and Recreation Second Edition merges the fields of human resource management and the sport industry in an easy to read manner Its updated references examples and studies reflect the increased growth interest and complexity in human resource management in sport in recent years This new edition places a greater emphasis on managerial competencies the strategic importance of human resource management and the implications of organizational justice. There is also a new chapter on internal marketing a concept that has not been addressed adequately in a sport context but deserves attention as sport and recreation organizations better understand the importance of human resource management This new chapter details the potential impact of internal marketing and outlines its uses Student comprehension is aided by several special elements including Viewpoint sidebars providing quotes and findings from experts and researchers Review sidebars highlighting key points and practical sidebars detailing applications of research or problems that practitioners must be aware of The book also includes learning objectives summaries key terms and end of chapter activities Part I outlines the unique and common characteristics of the three groups in human resources Part II focuses on differences among people and how the differences

affect behavior in sport and recreation organizations. This part covers human resource issues related to abilities personality values and motivation among the three sets Part III explores significant organizational processes in the management of human resources Included are chapters on organizational justice job design staffing and career considerations leadership performance appraisal reward systems and internal marketing Finally part IV discusses two significant outcomes expected of human resource practices satisfaction and commitment Human Resource Management in Sport and Recreation Second Edition will guide students understanding of key concepts in human resources in the sport and recreation industry In doing so it will prepare them for a career in that industry The Value Orientations of Buddhist and Christian **Entrepreneurs** Gábor Kovács, 2020-07-30 This book is a comparative analysis of the value orientations of Buddhist and Christian entrepreneurs and how these values impact business The chapters review and analyze the concepts of Buddhist economics and the social teaching of the Roman Catholic Church The value orientations of Buddhist and Christian entrepreneurs are described by irreducible core values that correspond to the ontological conception the procedural dimension and the other directedness of a spiritual value commitment in business The book includes the reflections of Buddhist and Christian entrepreneurs about business spirituality profit the temporal perspectives of business and stakeholder management The cases testify that a spiritual value orientation can contribute to creating genuine ethical commitment The findings and the examples can encourage business scholars and practitioners to stop considering ethics as an instrument in the service of profit and serve as inspiration for integrating spirituality into business in a profound way This book will be of interest to scholars studying business ethics workplace spirituality and faith at work Values - Politics -Religion: The European Values Study Regina Polak, Patrick Rohs, 2023-07-18 This open access book analyses the international data of the European Values Study EVS 1990 2017 with a focus on the impact of religious on political values from empirical as well as theoretical perspectives i e sociology political and cultural studies philosophy ethics theology and the law It interprets results from interdisciplinary perspectives including the viewpoints of social ethics sociology and cultural studies law and practical theology In the political and public as well as media debates of the European Union the recourse to above all European and also Christian values has played a central and controversial role in the field of politics and religion for several decades This collection is a contribution to a qualified discourse on values in Europe by providing empirical hermeneutical and ethical criteria for a responsible use of the concept of values In addition to a comparison of political value systems in Western and Eastern Europe and the possible role of religion in this context the book also deals with topics such as f i solidarity economics and values value formation and law and values Additionally specific population groups such as the socio culturally marginalized strata are examined more closely Besides current scientific analyses and interpretations of interest to researchers from various disciplines this book also offers valuable impulses and suggestions for various multipliers in political civil society and religious organisations as well as a sound overview for graduate students Team

Ouotient Douglas Gerber, 2019-01-15 The fundamentals of Team Ouotient TO is based on a 10 year study with 108 teams from Fortune 500 and other global companies on the essential elements of High Performance Teams Using numerous case studies from the companies with which he has worked Douglas describes how he helped to turn mediocre and even dysfunctional teams into High Performance and WINNING teams with measurable results Perceiving Truth and Value Markus Mühling, David Andrew Gilland, Yvonne Förster, 2019-11-11 The theme of this volume is the question of value perception It is discussed from different philosophical psychiatric theological and anthropological perspectives The thesis that unites all the papers is the recognition that we live in a relational dynamic world in which we primarily perceive and that to dissolve values from facts is fundamentally misleading both in theory as in life The contributions are the outcome of an energetic conference in 2016 where the problems at stake were rigorously discussed. The results are presented here and they have an explicit order and are strictly related It opens with basic questions and observations then critical opinions and objections come into play after which the outline of a larger theory of value perception is presented and at the end some concrete examples from material practices are drawn Values and Valuing in Mathematics Education Yüksel Dede, Gosia Marschall, Philip Clarkson, 2024-02-22 This book is a follow up to Values and Valuing in Mathematics Education Scanning and Scoping the Territory 2019 Springer This book adds a critical emphasis on practice and fosters thinking concerning positive mathematical well being engagement teacher noticing and values alignment among a range of critical notions that intersect with values and valuing Values and valuing play a key role in many aspects of education such as assessment planning classroom interactions choosing tasks and general well being What one values and finds important in the learning and teaching of mathematics operates within the intersection of all social cognitive and affective aspects of school pedagogy making values a significant holistic factor in education The chapters explore potential teaching strategies that enhance the understanding of the central place of values in mathematics itself as a subject as well as how values impact how mathematics is used withinsociety This book includes examples of strategies for facilitating students meaningful engagement with and conscious learning of values when engaging in mathematical thinking and doing Radical Axiology Hugh P. McDonald, 2021-11-08 This book treats values as the basis for all of philosophy an approach distinct from critiquing theories of value and far rarer First Philosophy the effort to justify the foundations for a system of philosophy is one of the main issues that divide philosophers today McDonald's philosophy of values is a comprehensive attempt to replace philosophies of existence being experience the subject or language with a philosophy that locates value as most basic This transformation is a radical move within Western philosophy as a whole since it has never been done in such a thoroughgoing way Hugh P McDonald makes a comprehensive case against first philosophy as metaphysical by mounting a case against all metaphysical systems of philosophy Radical Axiology A First Philosophy of Values is a fresh start for a rebirth of philosophy While other movements debate the death of philosophy this book radically re evaluates the direction of philosophy by discovering values

at the basis of all philosophy This reorientation addresses the question of what the love of wisdom can mean for us today **Atlantic Coast of Long Island Jones Inlet to East Rockaway Inlet, Long Island Beach, Nassau County** ,1998
