Archiearinae, Oenochrominae, Geometrinae Axel Hausmann,2021-10-25 The Lepidoptera are without doubt the best known

insect order in today's Europe. Nevertheless, there is still a great lack of knowledge in some groups such as the Geometridae. The northern and central European fauna is relatively well known, but the distribution and bionomics of a number of species are poorly known. This problem is much more marked in southern Europe where no books on Geometridae have been published for nearly a century. Data on the bionomics are frequently unavailable, which makes it difficult to assess environmental threats to the geometrid species. Information on distribution is still grossly incomplete, and many records have been based on misidentifications. These problems are mainly caused by the lack of comprehensive identification literature. The geographical area covered in this series ranges from North Cape to Gibraltar and Malta and from the Atlantic Ocean to the Ural Mountains. Each volume will illustrate the adults of all species and, if possible, also subspecies in photographic colour plates of the highest quality. Sexual dimorphism as well as polymorphism will be illustrated. Most species will be shown at natural size, but some larger groups of small species such as the genera *Idaea* and *Eupithecia* will be shown enlarged.

Covering 100 years of zoological research, the *Handbook of Zoology* represents a vast store of knowledge. *Handbook of Zoology* provides an in-depth treatment of the entire animal kingdom, covering both invertebrates and vertebrates. It publishes comprehensive overviews on animal systematics and morphology and covers extensively further aspects like physiology, behavior, ecology, and applied zoological research. Although our knowledge regarding many taxonomic groups has grown enormously over the last decades, it is still the objective of the *Handbook of Zoology* to be comprehensive in the sense that text and references together provide a solid basis for further research. Editors and authors seek a balance between describing species richness and diversity, explaining the importance of certain groups in a phylogenetic context, and presenting a review of available knowledge and up-to-date references. New contributions to the series present the combined effort of an international team of editors and authors, entirely published in English and tailored to the needs of the international scientific community. Upcoming volumes and projects in progress include volumes on Annelida, Volumes 1-3 Bryozoa, Mammalia, Miscellaneous Invertebrates, Nannomecoptera, Neomecoptera, and Strepsiptera, and are followed later by fishes, reptiles, and further volumes on mammals. Background: The renowned German reference work *Handbook of Zoology* was founded in the 1920s by Professor Willi K. Krenthel in Berlin and treated the complete animal kingdom from single-cell organisms to mammals in eight thematic volumes: Volume I Protozoa, Porifera, Ctenophora, Mesozoa; 1925 Volume II Vermes; 1933-34 Volume III Arthropoda ex Insecta; 1927-1932 Volume IV Arthropoda Insecta; Volume V Solenogastres, Mollusca, Echinodermata; 1925 Volume VI Pisces, Amphibia; 1930 Volume VII Reptilia, Aves; 1931 Volume VIII Mammalia. The Volumes IV Arthropoda Insecta and VII Mammalia continued publication into the present with the most recent contributions in English language. Adapting to the accelerating speed of scientific discovery in the past decades,

the Handbook of Zoology entered a next phase in 2010 In the new edition of the Handbook of Zoology the original eight thematic volumes gave way for smaller and more flexible groupings that reflect the current state of phylogenetic knowledge All subsequent volumes were published in print as well as e book format The Handbook of Zoology is additionally offered as a database the Handbook of Zoology Online which can easily be searched and rapidly updated Original Handbook material ca 28 000 pages has been reordered along taxonomic instead of bibliographical categories and forms the historical basis of this Online Reference Work As a living Online Reference the content is continuously updated and new content added The material can be accessed through taxonomic and subject categories as well as free text with a diversity of linking and search options Faster publication times through online first publication reference and cross linking and make the Handbook of Zoology highly attractive to both authors and users Nota lepidopterologica ,2005 *Mitteilungen der Münchner entomologischen Gesellschaft* Münchner entomologische Gesellschaft,2003
