E. Downs,Donna O. Kerner,Stephen P. Reyna,2019-07-19 Originally published in 1991 This volume explores the combination of political and economic forces that influence different levels of food supply The book begins with a discussion of famine theories ranging from cultural ecology to neo Marxism Following this survey is a series of essays by anthropologists geographers economists and development practitioners that explores the role of Western institutions in African famine analyzes famine in particular countries and documents the relationship between famine and gender This book takes an unusually broad look at famine by including analyses of countries where hunger has rarely been studied and by examining African famine from both African and Western perspectives Its concluding proposals for eradicating famine make innovative and provocative contributions to current global debates on food and nutrition The Deepest Wounds Thomas D. Rogers,2010-11-01 In *The Deepest Wounds* Thomas D Rogers traces social and environmental changes over four centuries in Pernambuco Brazil s key northeastern sugar growing state Focusing particularly on the period from the end of slavery in 1888 to the late twentieth century when human impact on the environment reached critical new levels Rogers confronts the day to day world of farming the complex

fraught and occasionally poetic business of making sugarcane grow. Renowned Brazilian sociologist Gilberto Freyre, whose home state was Pernambuco, observed monoculture slavery and latifundia but principally monoculture they opened here in the life, the landscape and the character of our people the deepest wounds. Inspired by Freyre's insight, Rogers tells the story of Pernambuco's wounds, describing the connections among changing agricultural technologies, landscapes and human perceptions of them, labor practices and agricultural and economic policy. This web of interrelated factors, Rogers argues, both shaped economic progress and left extensive environmental and human damage. Combining a study of workers with analysis of their landscape, Rogers offers new interpretations of crucial moments of labor struggle, casts new light on the role of the state in agricultural change and illuminates a legacy that influences Brazil's development even today. **Grains** Bill

Winders, 2016-11-01. Grains, particularly maize, rice and wheat, are the central component of most people's diets but we rarely stop to think about the wider role they play in national and international policy making as well as global issues like food security, biotechnology and even climate change. But why are grains so important and ubiquitous? What political conflicts and economic processes underlie this dominance? Who controls the world's supply of grains and with what outcomes? In this timely book, Bill Winders unravels the complex story of feed and food grains in the global economy. Highlighting the importance of corporate control and divisions between grains such as who grows them and who consumes them, he shows how grains do not represent a unitary political and economic force. Whilst the differences between them may seem small, they can lead to competing economic interests and policy preferences with serious and on occasions violent geopolitical consequences. This richly detailed and authoritative guide will be of interest to students across the social sciences as well as anyone interested in current affairs. *The International Handbook of Political Ecology* Raymond L. Bryant, 2015-08-28. The International

Handbook of Political Ecology features chapters by leading scholars from around the world in a unique collection exploring the multi-disciplinary field of political ecology. This landmark volume canvasses key developments, topics and issues. *Third World Women and the Politics of Feminism* Chandra Talpade Mohanty, Russo, Lourdes Torres, 1991-06-22. The essays are provocative and enhance knowledge of Third World women's issues. Highly recommended. Choice. The book challenges assumptions and pushes historic and geographical boundaries that must be altered if women of all colors are to win the struggles thrust upon us by the new world order of the 1990s. *New Directions for Women*. This surely is a book for anyone trying to comprehend the ways sexism fuels racism in a post-colonial, post-Cold War world that remains dangerous for most women. Cynthia H. Enloe, provocative analyses of the simultaneous oppressions of race, class, gender and sexuality, a powerful collection. Gloria Anzaldúa, a propels third world feminist perspectives from the periphery to the cutting edge of feminist theory in the 1990s. Aihwa Ong, a carefully presented wealth of much needed information. Audre Lorde, it is a significant book. The Bloomsbury Review, excellent. The non-doctrinaire approach to the Third World and to feminism in general is refreshing and compelling. *World Literature Today*, an excellent collection of essays examining Third World feminism. *The Year's Work in Critical and Cultural Theory*.

These essays document the debates conflicts and contradictions among those engaged in developing third world feminist theory and politics Contributors Evelyn Accad M Jacqui Alexander Carmen Barroso Cristina Bruschini Rey Chow Juanita Diaz Cotto Angela Gilliam Faye V Harrison Cheryl Johnson Odim Chandra Talpade Mohanty Ann Russo Barbara Smith Nayereh Toohidi Lourdes Torres Cheryl L West Nellie Wong *European Affairs*, 2001 **At Risk** Piers Blaikie, Terry Cannon, Ian Davis, Ben Wisner, 2014-01-21 The term natural disaster is often used to refer to natural events such as earthquakes hurricanes or floods However the phrase natural disaster suggests an uncritical acceptance of a deeply engrained ideological and cultural myth At Risk questions this myth and argues that extreme natural events are not disasters until a vulnerable group of people is exposed The updated new edition confronts a further ten years of ever more expensive and deadly disasters and discusses disaster not as an aberration but as a signal failure of mainstream development Two analytical models are provided as tools for understanding vulnerability One links remote and distant root causes to unsafe conditions in a progression of vulnerability The other uses the concepts of access and livelihood to understand why some households are more vulnerable than others Examining key natural events and incorporating strategies to create a safer world this revised edition is an important resource for those involved in the fields of environment and development studies
