Van de Velde,2013-12-17 Mathematics is playing an ever more important role in the physical and biological sciences provoking a blurring of boundaries between scientific dis ciplines and a resurgence of interest in the modern as well as the classical techniques of applied mathematics This renewal of interest both in research and teaching has led to the establishment of the series Texts in Applied Mathe matics TAM The development of new courses is a natural consequence of a high level of excitement on the research frontier as newer techniques such as numerical and symbolic computer systems dynamical systems and chaos mix with and reinforce the traditional methods of applied mathematics Thus the purpose of this textbook series is to meet the current and future needs of these advances and encourage the teaching of new courses TAM will publish textbooks suitable for use in advanced undergraduate and beginning graduate courses and will complement the Applied Mathematical Sciences AMS series which will focus on advanced textbooks and research level monographs

Preface A successful concurrent numerical simulation requires physics and math ematics to develop and analyze the model numerical analysis to develop solution methods and computer science to develop a concurrent implemen tation No single course can or should cover all these disciplines Instead this course on concurrent scientific computing focuses on a topic that is not covered or is insufficiently covered by other disciplines the algorithmic structure of numerical methods

*Unruly Penelopes and the Ghosts* Eva Darias-Beautell,2012-08-06 This collection of essays studies the cultural and literary contexts of narrative texts produced in English Canada over the last forty years It takes as its starting point the nationalist movement of the 1960s and 70s when the supposed absence or weakness of a national sense became the touchstone for official discourses on the cultural identity of the country That type of metaphor provided the nation with the distinctive elements it was looking for and contributed to the creation of a sense of tradition that

has survived to the present In the decades following the 1970s however critics artists and writers have repeatedly questioned such a model of national identity still fragile and in need of articulation by reading the nation from alternative perspectives such as multiculturalism environmentalism neo regionalism feminism or postcolonialism These contributors suggest that the artistic and cultural flowering Canada is experiencing at the beginning of the twenty first century is to a great extent based on the dismantlement of the images constructed to represent the nation only forty years ago Through their readings of representative primary texts their contextual analysis and their selected methodological tools the authors offer a tapestry of alternative approaches to that process of dismantlement Together they read as an unruly Penelopiad their unravelling readings self consciously interrogating Canada s lack of ghosts
