Christianity Encountering World Religions (Encountering Mission) Terry C. Muck, Frances S. Adeney, 2009-04-01. The current religious climate poses unique challenges to those engaged in mission. Thus the authors of this book propose a new yet very biblical model for interacting with people of other faiths. They term this model giftive mission as it is based on the metaphor of free gift. We bear the greatest gift possible, the gospel message. Adopting this perspective not only has the potential for greater missionary success but also enables us to more closely imitate God's gracious activity in the world. The core of the book explores eleven practices that characterize giftive mission. Each practice is illustrated through the story of a figure from mission history who embodied that practice. Further discussion shows how to incorporate these practices in specific mission settings.

Marketization Himadri Roy Chaudhuri, Russell W. Belk, 2020-05-13. This book critically examines marketization, a phenomenon by which market processes are institutionalized and marketing increasingly pervades all areas of our everyday life. It presents a number of theories, frameworks and empirical studies highlighting how the phenomenon of marketization affects the 21st century consumer. The book also contests the traditional understanding of markets, offering a more comprehensive treatment of marketization and a fresh perspective on the dynamics of markets and the institutions that control everyday consumption practices. This book is an ideal resource for academics, reflective practitioners and policy makers interested in formulating appropriate change strategies in the face of the globalization that affects emerging markets so profoundly. This well-crafted research book is a valuable addition to the sparse literature on theories of marketization. The authors refigure the existing theories more broadly and present compelling evidence and insights into market phenomenon such as marginality, alternative market forms and consumer identity.

The Self in the West and East Asia Jin Li, 2024-08-26. From the fraught world of geopolitics to business and the academy, it's more vital than ever that Westerners and East Asians understand how each other thinks. As Jin Li shows in this groundbreaking work, the differences run deep. Li explores the philosophical origins of the concept of self in both cultures and synthesizes her findings.

with cutting edge psychological research to reveal a fundamental contrast Westerners tend to think of the self as being as a stable entity fixed in time and place East Asians think of the self as relational and embedded in a process of becoming The differences show in our intellectual traditions our vocabulary and our grammar They are even apparent in our politics the West is more interested in individual rights and East Asians in collective wellbeing Deepening global exchanges may lead to some blurring and even integration of these cultural tendencies but research suggests that the basic self models rooted in long standing philosophies are likely to endure The Self in the West and East Asia is an enriching and enlightening account of a crucial subject at a time when relations between East and West have moved center stage in international affairs **Gifts**
