Gray,2008-06-01 There s a saying in Brooklyn that if you come from my part of town you re from around the way Around the Way Girls 5 like its predecessors is a fast paced look at the lives of some street smart women who think they know it all but are about to get the lessons of their lives In Tysha s Keepin It in the Family Diamond Essence and Chanel are three motherless high priced hookers and their father Dallas Collins is their pimp At what point will his daughters finally get the courage to band together and break loose from being Daddy s little girls In Mark Anthony s So Seductive best friends Cinnamon and Simone use their exotic looks and voluptuous bodies to lure men into numerous one night stands However these one night stands don t end up in passionate sex instead with the help of two henchmen they end up in violent robberies In Erick S Gray s Pound Cake we bring you to Coney Island where four friends deal with the daily life of growing up in one of deadliest parts of the borough Pound Cake a beautiful fiery nineteen year old

is the ring leader of the pack Her homegirls are her family and people in the streets know not to mess with Pound Cake or her family When a local hustler impregnates and then abuses Minnie the youngest in the group Pound Cake won't stand for it She's going to make him pay

Teaching School Mathematics: Pre-Algebra Hung-Hsi Wu; 2016-06-29 This is a systematic exposition of a major part of the mathematics of grades 5 to 8 excluding statistics written specifically for Common Core era teachers It differs from other books for teachers in that the mathematics is correct in the sense that all the concepts are clearly and correctly defined and a grade appropriate explanation that is proof is given for every assertion For example it gives a precise definition of percent and explains how to use the definition to do all the standard problems about percent in an entirely routine manner It also gives a leisurely explanation for negative times negative is positive Another key feature is an intuitive introduction to plane geometry via rotations translations reflections and dilations that instead of treating these transformations as merely fun activities shows how they make sense of the usual geometric topics in middle school including congruence similarity length area and volume In short the readers will find in this volume a clear explanation of whatever was once puzzling to them in the mathematics of grades 5 to 8

Saklofske, Sybil B. G. Eysenck, This uniquely authoritative collection of original papers with contributions from over twenty countries provides a rare insight into research and applied programs in the study of individual differences in children and adolescents worldwide While delinquency proves to be one of the most common areas of interest a wide range of cognitive personality and social characteristics are examined and the use of the Eysenck Personality Questionnaire in many studies allows uniform comparisons to be made between countries The editors have not only overcome the language barriers which hitherto have made such information virtually inaccessible to the English speaking world They have also succeeded in bringing together studies from developed and developing countries East and West to present a global picture of adolescent and child psychology In particular the book highlights the general and specific cultural influences on child development and adolescent psychology in different countries and reflects the social and research concerns of the countries and cultures represented The authors comprise a cross section of professionals in the social and behavioral sciences working in university and clinical settings While North America is well represented by six chapters including Puerto Rico as is Europe particular efforts were made to obtain contributions from Eastern Europe Asia and Africa At the time this book was developed information exchange with eastern European countries was most difficult It is very exciting to present chapters from Hungary Lithuania Romania Russia and Yugoslavia The inclusion of articles from Japan Korea Singapore Sri Lanka and Uganda also add another dimension to studies of individual differences in children Contributions from Australia Israel and New Zealand also allow the book to take on much more of an international perspective on topics ranging from delinquency fears and motivation to intelligence personality and assessment issues This volume provides a plethora of international perspectives on the study of children It will be essential to sociologists psychologists educators and child study specialists
