## **The God Gene How Faith Is Hardwired Into Our Genes:**

The God Gene Dean H. Hamer, 2005-09-13 The overwhelming majority of Americans believe in God this conviction has existed since the beginning of recorded time and is shared by billions around the world In The God Gene Dr Dean Hamer reveals that this inclination towards religious faith is in good measure due to our genes and may even offer an evolutionary advantage by reducing stress preventing disease and extending life Popular science at its best The God Gene is an in depth fully accessible inquiry into research that can change the way we see ourselves and the world around us Written with balance integrity and admirable scientific objectivity this is a book for readers of science and religion alike Fascinating A compelling case that spirituality very well may be part and parcel of our genetic structure Los Angeles Times Challenges some basic assumptions we may have and certainly goads us into reflection about human nature The News Observer

**The Miracles of the Bible Viewed Differently** Maximilian Ledochowski, 2024-08-12 Did Jesus Christ really rise from the dead or did the lance thrust accidentally save his life Did the Mother of God become virgin with child or did a mistranslation turn the young woman into the virgin Mary How could Jesus walk on water and is there an explanation for the miraculous multiplication of bread Is it possible that the blind the mute the paralysed or the lepers are suddenly healed Why do we like to believe in miracles so much How do miracles come about in the first place The physician Dr Maximilian Ledochowski gets to the bottom of these and many other questions and tries to explain the miracles of the Bible with modern knowledge

**Evolution and the Big Questions** David N. Stamos, 2011-09-23 Evolution and the Big Questions David N Stamos s Evolution and the Big Questions delivers what its title promises you get to look at all of the issues such as race and ethics and religion that make the study of evolution so interesting and more than just a science The book is written in a clear and friendly manner and deserves a very wide readership Michael Ruse Florida State University This provocative text considers whether evolutionary explanations can be used to clarify some of life s biggest questions It offers a lively informative and timely look at a wide variety of key issues facing all of us today including questions of race sex gender the nature of language religion ethics knowledge consciousness and ultimately the meaning of life Some of the questions examined are Did evolution make men and women fundamentally different Is the concept of race merely a social construction Is morality including universal human rights a mass delusion Can religion and evolution really be harmonized Does evolution render life meaningless Designed for students and anyone with an interest in the relationship between evolutionary heritage and human nature the text takes an interdisciplinary approach and offers direction for further reading and research Each chapter presents a main topic together with discussion of related ideas and arguments from various perspectives Along the way it poses life s biggest questions pulling no punches and presenting a challenge to thinkers on all levels

**Yoga, Meditation, and Mysticism** Kenneth Rose, 2016-09-08 Contemplative experience is central to Hindu yoga traditions Buddhist meditation practices and Catholic mystical theology and despite doctrinal differences it expresses itself in suggestively similar meditative landmarks in each of

these three meditative systems In Yoga Meditation and Mysticism Kenneth Rose shifts the dominant focus of contemporary religious studies away from tradition specific studies of individual religious traditions communities and practices to examine the contemplative universals that arise globally in meditative experience Through a comparative exploration of the itineraries detailed in the contemplative manuals of Theravada Buddhism Pata jalian Yoga and Catholic mystical theology Rose identifies in each tradition a moment of sharply focused awareness that marks the threshold between immersion in mundane consciousness and contemplative insight As concentration deepens the meditator steps through this threshold onto a globally shared contemplative itinerary which leads through a series of virtually identical stages to mental stillness and insight Rose argues that these contemplative universals familiar to experienced contemplatives in multiple traditions point to a common spiritual mental and biological heritage Pioneering the exploration of contemplative practice and experience with a comparative perspective that ranges over multiple religious traditions religious studies philosophy neuroscience and the cognitive science of religion this book is a landmark contribution to the fields of contemplative practice and religious studies

Christian Ideals in British Culture D. Nash, 2013-05-07 This book offers a challenge to conventional histories of secularisation by focusing upon the importance of central religious narratives These narratives are changed significantly over time but also to have been invested with importance and meaning by religious individuals and organisations as well as by secular ones

**Editing the Soul** Everett Hamner, 2017-09-28 Personal genome testing gene editing for life threatening diseases synthetic life once the stuff of science fiction twentieth and twenty first century advancements blur the lines between scientific narrative and scientific fact This examination of bioengineering in popular and literary culture shows that the influence of science on science fiction is more reciprocal than we might expect Looking closely at the work of Margaret Atwood Richard Powers and other authors as well as at film comics and serial television such as Orphan Black Everett Hamner shows how the genome age is transforming both the most commercial and the most sophisticated stories we tell about the core of human personhood As sublime technologies garner public awareness beyond the genre fiction shelves they inspire new literary categories like slipstream and shape new definitions of the human the animal the natural and the artificial In turn what we learn of bioengineering via popular and literary culture prepares the way for its official adoption or restriction and for additional representations By imagining the connections between emergent gene testing and editing capacities and long standing conversations about freedom and determinism these stories help build a cultural zeitgeist with a sharper more balanced vision of predisposed agency A compelling exploration of the interrelationships among science popular culture and self Editing the Soul sheds vital light on what the genome age means to us and what s to come

Religion Today Ross Aden, 2012-10-05 Religion Today introduces students to key concepts in religious studies through a compelling problem solving framework Each chapter opens with a contemporary case study that helps students engage in current religious issues explore possible solutions to difficult religious problems today and learn key themes and concepts in

religious studies To enhance student learning a free Student Study Guide is available for download from Rowman Littlefield The Study Guide features chapter summaries definition quizzes for students to test themselves on key terms and possible learning activities

*Explaining the Holocaust* Mordecai Schreiber, 2015-04-16 Seventy years after it took place the Holocaust committed against the Jews of Europe during World War II continues to cast a giant shadow over humankind Man's inhumanity to man is not a thing of the past Genocidal action is still commonplace around the globe Has humankind learned the lessons of the past Is the human race doomed to live in a perpetual state of war and self destruction Explaining the Holocaust shows how given the right circumstances human beings can lose their humanity Does that mean that the ethical teachings of the major religions are wishful thinking This book tackles two questions that continue to be asked by people everywhere Why did a highly civilized nation like Germany in the middle of the twentieth century commit the most heinous crime in all of human history And if indeed there is a loving God who made a covenant with the people of Israel why were millions of innocent peaceful Jews dehumanized starved tortured and systematically murdered Explaining the Holocaust spares no one in discussing the enormity of the evil But it also shows how the divine spark in human beings did not die during those years of darkness and why we still have a glimmer of hope

The Faith Charles W. Colson, Harold Fickett, 2008 Addresses modern world questions about the Christian religion and its tenets drawing on historical events and present day anecdotes to illustrate its joyful aspects while explaining the faith's embrace of the example and message of Jesus

The Belief of an Unwilling to believe Michael Murauer, 2025-06-10 Against all dogmatic ideologies What can a philosophical life orientation look like in our time Why should we favour it over a religious life orientation The future belongs to philosophy not to religions or secular ideologies With this fundamental statement Michael Murauer places himself in the tradition of Enlightenment thinking The philosopher and physician who sees no acceptable alternative to a rational debate on philosophical and especially moral issues is aware that at the end of such a debate there are no absolute truths but well founded value judgements as presented here in a wide range of topics The Belief of an Unwilling to believe constantly balances on the edge between systematic philosophical treatise and personal confession measuring itself against the current state of thought This book attempts to summarise the philosophical criticism of ideologies taking into account the world view developed by modern science while at the same time offering orientation and help for life on the basis of philosophical thought adequate to modernity

**Science and Religion in Dialogue** Melville Y. Stewart, 2009-12-01 This two volume collection of cutting edge thinking about science and religion shows how scientific and religious practices of inquiry can be viewed as logically compatible complementary and mutually supportive Features submissions by world leading scientists and philosophers Discusses a wide range of hotly debated issues including Big Bang cosmology evolution intelligent design dinosaurs and creation general and special theories of relativity dark energy the Multiverse Hypothesis and Super String Theory Includes articles on stem cell research and Bioethics by William Hurlbut who served on President Bush's

BioethicsCommittee      **Neuroscience and Religion** Volney P. Gay,2009-01-01 This is a unique set of multidisciplinary reflections on how the neurosciences shape our understanding of religious experience and religious institutions Twelve scholars and scientists assess how advances in the neurosciences affect our traditional sense of mind self and soul

Culturally Incorrect Rod Parsley,2009-04-08 Parsley exposes the failure of the current generation of believers to engage the culture present a relevant gospel and lead influence through service and paints a vivid picture of the cost and implications of that failure Parsley explains how the culture wars have entered a new critical phase for the United States and discusses the areas in which this war is being fought Cultural Scientific Geopolitical Media and Academia He presents an understanding of the paradigms assumptions and values that animate the humanist secularist and neo pagan enemies of Christianity in America and offers a strategy for winning this war what he calls a New Great Awakening and how evangelism social action and the engagement of culture fit into that plan      Language of Terror Wesley Kendall,Joseph M.

Siracusa,Kevin Noguchi,2015-03-06 Building on the emerging field of biopolitics of security this research monograph demonstrates that political speech can be crafted to manipulate segments of the voting population who are inherently predisposed to being receptive to certain language The authors who come from both political science and behavioral neuroscience examine how the human brain reacts to expressions of political ideology regarding terrorism They apply these reactions to specific forms of political communication many of which are designed to elicit a desired response in creating support for a policymaker s agenda By comparing and contrasting a variety of case studies they demonstrate how similar acts accompanied by starkly different political language can create cognitive dissonance in the minds of the electorate and influence policy choices Each chapter analyzes the content of a speech its assimilation by different political groups and two case studies For example the case of Luis Posada Carriles a Cuban exile and former CIA agent responsible for the bombing of a Cuban airliner in 1976 is examined alongside that of Mohamed El Megrhi the Libyan intelligence officer convicted of the bombing of Flight 103 over Lockerbie Scotland in 1988 This unique study uses new research in neuropsychology to demonstrate how the American public s response to various policies on terrorism is manipulated highlighting the impact of ideological speech regarding terrorism the language of terror      *The Soul in the Brain* Michael R. Trimble,2007-04-17 In this provocative study Michael R Trimble M D tackles the interrelationship between brain function language art especially music and poetry and religion By examining the breakdown of language in several neuropsychiatric disorders he identifies brain circuits that are involved with metaphor poetry music and religious experiences Drawing on this body of evidence Trimble argues that religious experiences and beliefs are explicable biologically and relate to brain function especially of the nondominant hemisphere Inspired by the writings and reflections of his patients many of whom have epilepsy psychosis or affective disorders Trimble asks how the human species so enamored of its own logic and critical facilities has held from the dawn of civilization strong religious beliefs and a reverence for the arts He explores topics such as the phenomena of

hypergraphia and hyper religiosity how religious experiences and poetic expression are neurologically linked with our capacity to respond to music and how neuropsychiatric disorders influence behaviors related to artistic expression and religiosity by disturbing brain function With the sensitivity of a dedicated doctor and the curiosity of an accomplished scholar Trimble offers an insightful analysis of how the study of people with paradigmatic neuropsychiatric conditions can be the cornerstone to unraveling some of the mysteries of the cerebral representations of our highest cultural experiences **A Human Creation** W. R. Frederick, 2022-07-05 A Human Creation challenges god belief under several disciplines History shows that humanity's need for the supernatural is rooted in the ancient past and that subsequent religious scriptures are poor proof of any god's existence wrought with myth fabrication and textual error Evolution is supported by the evidence not a divine intervention or design The brain your mind can make you a believer and society culture and power politics can enforce belief The physics of the universe show that there is no need for a god to arrive at today's reality while life's existence was a natural certainty All of this means that humans fabricated their gods to satisfy their needs and fears

*Religion and Psychiatry* Peter Verhagen, Herman M. Van Praag, Juan José Lopez-Ibor, John Cox, Driss Moussaoui, 2012-02-27 Religion and spirituality is very much alive and shapes the cultural values and aspirations of psychiatrist and patient alike as does the choice of not identifying with a particular faith Patients bring their beliefs and convictions into the doctor patient relationship The challenge for mental health professionals whatever their own world view is to develop and refine their vocabularies such that they truly understand what is communicated to them by their patients Religion and Psychiatry provides psychiatrists with a framework for this understanding and highlights the importance of religion and spirituality in mental well being This book aims to inform and explain as well as to be thought provoking and even controversial Patiently and thoroughly the authors consider why and how when and where religion and spirituality are at stake in the life of psychiatric patients The interface between psychiatry and religion is explored at different levels varying from daily clinical practice to conceptual fieldwork The book covers phenomenology epidemiology research data explanatory models and theories It also reviews the development of DSM V and its awareness of the importance of religion and spirituality in mental health What can religious traditions learn from each other to assist the patient Religion and Psychiatry discusses this as well as the neurological basis of religious experiences It describes training programmes that successfully incorporate aspects of religion and demonstrates how different religious and spiritual traditions can be brought together to improve psychiatric training and daily practice Describes the relationship of the main world religions with psychiatry Considers training policy and service delivery Provides powerful support for more effective partnerships between psychiatry and religion in day to day clinical care This is the first time that so many psychiatrists psychologists and theologians from all parts of the world and from so many different religious and spiritual backgrounds have worked together to produce a book like this one In that sense it truly is a World Psychiatric Association publication Religion and Psychiatry is recommended

reading for residents in psychiatry postgraduates in theology psychology and psychology of religion researchers in psychiatric epidemiology and trans cultural psychiatry as well as professionals in theology psychiatry and psychology of religion
