The Politics Of Electoral College Reform:

Electoral College Reform Gary Bugh, 2016-04-29 The United States has not updated the Electoral College system since the Twelfth Amendment was ratified in 1804 despite public opinion polls showing a majority of Americans are in favor of changing or outright abolishing it So why hasn't the United States reformed this system Electoral College Reform brings together new essays examining all aspects of this crucial debate including the reasons for reform the issues surrounding a constitutional amendment the effect of the Electoral College on political campaigns and the possibilities for extra constitutional avenues to change The authors consider both the Federalists vision of balanced representation and a more democratic and equality based ideal These competing frameworks perhaps more than any other factor account for centuries of American indecision on this key issue By offering an unprecedented and carefully researched analysis of an always controversial subject this volume explores the potential for changing a system that many contend is long overdue **The**

Congressional Research Service, 2014-12-12 The electoral college method of electing the President and Vice President was established in Article II Section 1 of the Constitution as revised by the Twelfth Amendment It provides for election of the President and Vice President by electors who are themselves elected by the voters A majority of 270 of 538 electoral votes is necessary to win For further information on the electoral college system's operations see CRS Report RL32611 The Electoral College How It Works in Contemporary Presidential Elections by Thomas H Neale The electoral college has been the subject of reform proposals since 1800 Constitutional and structural criticisms have centered on several of its features it is not fully democratic providing indirect election of the President it can lead to the election of candidates who win the electoral college but fewer popular votes than their opponents or to contingent election in Congress if no candidate wins an electoral college majority it results in electoral vote under and over representation between censuses and that faithless electors can vote against the people's express choice Legislative and political criticisms include the general ticket system currently used in all states except Maine and Nebraska which is said to disenfranchise voters who prefer the losing candidates in the states various asserted biases that are alleged to favor different states and groups and the electoral college lock which was once claimed to provide an advantage to Republican candidates but is now said to favor Democrats Electoral college reform options include the following end it mend it or leave it alone Proposals to end the electoral college almost always propose direct popular election with the candidates winning the most popular votes nationwide elected Almost all reform proposals would eliminate electors and award electoral votes directly by one of several methods the general ticket system the district system that awards electoral votes on a congressional district and statewide vote basis and the proportional system that awards state electoral votes in proportion to the percentage of popular votes gained by each candidate Despite more than 30

years of legislative activity from the 1940s through the late 1970s proposed amendments never managed to win the constitutionally required two thirds vote in both houses of Congress Since 2004 some of the reforms identified above have been attempted in the states District plan initiatives have been offered in California Pennsylvania Michigan Virginia and Wisconsin Proportional plans have been proposed in Colorado and Pennsylvania Nebraska has considered returning to the general ticket system None of these however has been enacted to date
