Comparing Post-Soviet Legislatures Joel M. Ostrow,2000 One dilemma facing new or newly independent states such as those of the former Soviet Union is how to design effective legislatures when political parties are weak and fragmented or even nonexistent In this book Joel M Ostrow develops a comparative institutional framework to explain marked differences in behavior across three post Soviet legislatures the Russian Supreme Soviet the Russian State Duma and the Estonian legislature He argues that these differences in ability to manage political conflict can be explained in large measure by the design of the legislatures Most significant is the choice of whether and how to include parties or partisan factors Legislatures are an omnipresent component of modern democracy Ostrow s comparative institutional design confirms the presumption of many political scientists that parties are essential for legislative consensus building However it also reveals that parties may have paradoxical effects on a legislature s performance In following the budget process in Russia and Estonia Ostrow explores the consequences that different institutional designs have had on post Soviet legislatures He has found that how parties are included may determine how capable a legislature is at managing political conflict both internally and with the executive branch of the government The author was present at many of the committee hearings and legislative sessions he describes and his firsthand observations and interviews with committee members enhance his analysis **Municipal Fiscal Stress, Bankruptcies, and Other Financial Emergencies** Tatyana Guzman,Natalia Ermasova,2022-11-30 It is difficult to find someone who has not heard about the Puerto Rico Detroit Michigan or Orange County California bankruptcies While guides for responsibly managing government finances exist problems often originate not because of poor financial reporting or financial deficiencies but because issues external to financial wellbeing arise such as economic demographic political legal or even environmental factors Exacerbating the problem there is not much advice in the existing literature on how to act when municipalities face financial struggles Filling this important gap this book explores fiscal health and fiscal hardships municipal defaults and bankruptcies and many other aspects to help guide local governments during fiscal distress Fiscal hardships negatively affect the quality and availability of public goods and services and consequently the wellbeing of residents and businesses living and working in distressed municipalities Turned off streetlights unmaintained public parks

potholes inconsistent garbage pickup longer response time from emergency services and multiple other issues that residents of the struggling municipalities deal with lead to higher crime rates lower quality of K 12 education dangerous road conditions lower housing values outmigration of wealthier population and numerous other problems The COVID 19 pandemic put additional unprecedented pressure on municipal finances nationwide In this book authors Tatyana Guzman and Natalia Ermasova evaluate distressed cities and municipalities and provide practical recommendations on improving their financial conditions What are conditions and signs to look for to not to find yourself in similar situations What can be done if your municipality is already experiencing fiscal hardships What are the consequences of fiscal misfortunes How does one exit a fiscal emergency This book answers these and other questions and serves as a guide to fiscal health and prosperity for U S municipal governments students and researchers in public finance and general public management fields **Handbook of**

Local Government Fiscal Health Helisse Levine,Jonathan B. Justice,Eric Anthony Scorsone,2012 Fiscal health of local governments and municipalities has remained an important issue since the crises of the 1970s in places like New York Philadelphia and Cleveland More recently the bankruptcy of Orange County California raised the possibility of a different type of financial failure than earlier ones The beginning of the 21st century has witnessed two major economic bubbles including the dotcom and housing bubbles These economic cycles combined with increasing health care pension and other structural costs continue to challenge the fiscal viability of many jurisdictions In particular the economic and financial crisis of 2007 2008 is likely to result in potentially serious fiscal challenges for local jurisdictions **Downsizing the Federal Government** Vernon D Jones,2016-07-01 The main focus of downsizing has shifted from the private to the public sector The cutbacks began in the Department of Defense Now the goal is a federal civilian workforce reduction of 12 percent by the year 2000 This pioneering study looks at the management of workforce reductions in the public sector both in theory and in practice Three case studies of the Defense Logistics Agency the Bureau of Reclamation and the Food and Drug Administration illustrate the organizational managerial and human dimensions of attempting to improve performance with reduced resources The author draws on extensive interviews with senior executives and middle managers in the three agencies at the General Accounting Office the Office of Personnel Management and the National Performance Review the Senior Executives Association and the Federal Managers Association and scholars and researchers In a larger sense this work pushes the boundaries of knowledge concerning organizational change and makes a significant contribution to organization theory It offers important new insights not only for public sector managers but for organization theorists and management specialists whose work on downsizing has been presumed but not shown to be applicable to the public sector
