His face is marked with several scratches and abrasions, particularly around the eyes and on the cheek, suggesting a recent battle or accident. The lighting is dramatic, with strong shadows and highlights that emphasize the texture of his skin and the intensity of his gaze.

Security 2.0 Charles Hauss,2015-09-28 Today international security issues are slowly being reconsidered through the lens of human security which refers to a combination of political economic social nutritional environmental physical health and personal safety issues When first mentioned in 1994 the concept of human security represented a significant first step in understanding that security dilemmas could no longer be seen as purely geopolitical phenomena that revolve around the nation state This book explains the progress made toward human security since then and the steps that remain to be taken to achieve it fully It begins by addressing how the nation state is both the source and the solution of security problems in the world before demonstrating how the meaning of security itself is being reconsidered and traditional approaches are being challenged Building on the concept of human security the book looks at how we are slowly moving toward large scale political and social change It argues that it is time for a security 2 0 approach different from the traditional models of national security Thus Security 2 0 addresses new challenges and their political responses pointing toward alternatives to what is referred to as permanent war It highlights such themes as cooperation the multi dimensionality of security issues and the continuing pressures towards democratization global markets and multilevel governance and how these contribute today to make a safer world Further it shows how environmental threats global corporations identity issues and international regimes such as the EU are also fostering a fundamental rethinking of the concept of security Including a variety of perspectives and written in a
