The Primitive World and Its Transformations Robert Redfield, 1953 Touches on Arunta and Pitjandadjara world view and ethics *The Primitive World and Its Transformations* Robert Redfield, 1965 **The Primitive World and Its**

Transformations Robert Redfield, 1953 *Anthropologists and the Rediscovery of America, 1886-1965* John S.

Gilkeson, 2010-09-20 This book examines the intersection of cultural anthropology and American cultural nationalism from 1886 when Franz Boas left Germany for the United States until 1965 when the National Endowment for the Humanities was established Five chapters trace the development within academic anthropology of the concepts of culture social class national character value and civilization and their dissemination to non anthropologists As Americans came to think of culture anthropologically as a complex whole far broader and more inclusive than Matthew Arnold s the best which has been thought and said so too did they come to see American communities as stratified into social classes distinguished by their subcultures to attribute the making of the American character to socialization rather than birth to locate the distinctiveness of American culture in its unconscious canons of choice and to view American culture and civilization in a global perspective

The Primitive World and Its Transformations , 1953 *Modernization, Urbanization, and the Urban Crisis* Gino Germani, 1973-01-01 Modernization Urbanization and the Urban Crisis *The Primitive World and Its Transformation* Robert Redfield, 1977 **Social Anthropology** Kevin Jack Riley, Clifford Wilcox, 2017-07-28 Robert Redfield is remembered today primarily as an anthropologist but during his lifetime Redfield s cross disciplinary activity reflected a strong interest in infusing anthropological practice with sociological theory Like a handful of other anthropologists including A R Radcliffe Brown and Bronislaw Malinowski who shared his interests during the 1920s through 1930s his works came to define a new subfield known as social anthropology Redfield was distinct in being one of the first Americans to devote himself seriously to social anthropology a field dominated initially by British scholars He spent his career at the University of Chicago and his anthropology bore the distinct mark of sociology as developed and practiced at that institution Indeed Redfield played a major role in defining what has been called the second Chicago school of sociology This volume brings together Redfield s most important contributions to social anthropology During the 1920s sociology and anthropology constituted a single department at the University of Chicago Although most students concentrated on sociology or anthropology Redfield chose to pursue both fields with equal intensity He adopted as his central interest the leading problematic of the 1920s the study of social change Chicago School sociologists approached social change by examining zones of rapid transition within the city for example areas populated by recently arrived immigrants with the goal of elucidating general principles or dynamics of social transition Redfield s work can be seen as falling into three distinct theoretical categories 1 the study of social change or modernization 2 peasant studies and 3 the comparative study of civilizations Drawing from articles book excerpts and unpublished papers and letters this work presents Redfield s central contributions in each of these areas Seen as a whole this

volume traces Redfield's seminal contributions to the early development of modern anthropology. **Robert Redfield and the Development of American Anthropology** Clifford Wilcox, 2006-01-01 Relying upon close readings of virtually all of his published and unpublished writings as well as extensive interviews with former colleagues and students Robert Redfield and the Development of American Anthropology traces the development of Robert Redfield's ideas regarding social change and the role of social science in American society Clifford Wilcox's exploration of Redfield's pioneering efforts to develop an empirically based model of the transformation of village societies into towns and cities is intended to recapture the questions that drove early development of modernization theory Reconsideration of these debates will enrich contemporary thinking regarding the history of American anthropology and international development The Ceremonial City Robert A. Schneider, 1996-11-25 From public executions to religious processions to political festivities Toulouse's ceremonial life was remarkably rich in the decades prior to the French Revolution In an engaging portrait that conveys this provincial city in all its splendor and misery Robert Schneider explores how Toulouse's civic and community life was represented in the stagings of various ceremonies His inquiry is based on the unpublished diaries of Pierre Barth's a Latin tutor who was both a devout Catholic and a monarchist and who recorded forty years of public activity in ways that reflected the mounting social tensions of his times By analyzing Barth's accounts Schneider demonstrates how the variety of ceremonial forms embodied different ritual dynamics and represented contrasting values The author focuses most intently on the differences between the solemn religious procession which was highly participatory and represented local concerns and the more celebratory festival which vaunted the monarchy and turned the people into passive spectators He examines the theatrical nature of often hastily orchestrated religious parades winding through neighborhood streets then considers the monarchy's use of plazas for staged entertainment particularly for awe inspiring displays of fireworks Schneider argues that the festival proved a successful tool in imposing the symbols of the centralized state on Toulouse's public life but that both the procession and the festival incorporated powerful ceremonial forms that proved politically useful for the Revolution
