Situations Philosophiques:

A History of Philosophy in the Twentieth Century Christian Delacampagne, 2001-11-05 In *A History of Philosophy in the Twentieth Century* Christian Delacampagne reviews the discipline's divergent and dramatic course and shows that its greatest figures even the most unworldly among them were deeply affected by events of their time From Ludwig Wittgenstein whose famous *Tractatus* was actually composed in the trenches during World War I to Edmund Husserl and Martin Heidegger one who found himself barred from public life with Hitler's coming to power the other a member of the Nazi party who later refused to repudiate German war crimes From Bertrand Russell whose lifelong pacifism led him to turn from logic and mathematics to social and moral questions and Jean Paul Sartre who made philosophy an occasion for direct and personal political engagement to Rudolf Carnap a committed socialist and Karl Popper a resolute opponent of Communism From the Vienna Circle and the Frankfurt School to the contemporary work of philosophers as variously minded as Jacques Derrida Jürgen Habermas and Hilary Putnam The thinking of these philosophers and scores of others cannot be understood without being placed in the context of the times in which they lived **Chiasmi International 17 Aa.**

Psychoanalysis Mary Edwards, 2022-10-20 Western philosophical orthodoxy places many aspects of other people's lives outside the scope of our knowledge Demonstrating an alternative to this view however this book argues that Jean Paul Sartre's application of his unique psychoanalytic method to Gustave Flaubert is the culmination of his project to show that it is possible to know everything there is to know about another person It examines how Sartre aims to revolutionize our way of thinking about others by presenting his existential psychoanalysis as the means to knowledge of both ourselves and others By so doing it highlights how his determination to solve the longstanding philosophical conundrum about other minds drives him not only to incorporate insights from Descartes Hegel Husserl Freud Marx and Beauvoir into his philosophy but also to supplement and enhance his philosophy through the development and application of a new form of psychoanalysis Sartre's Existential Psychoanalysis integrates for the first time Sartre's psychoanalysis into his overarching philosophical project By offering a critical interrogation of the role his psychoanalytical studies played in the development of his existentialism Mary Edwards uncovers the overlooked philosophical significance of his existential psychoanalysis and brings it into a new and productive dialogue with current research in the fields of philosophy psychology and psychotherapy **Cognitive**

Architecture Deborah Hauptmann, Warren Neidich, 2010 Noo politics is most broadly understood as a power exerted over the life of the mind reconfiguring perception memory and attention This volume unites specialists in political and aesthetic

philosophy neuroscience sociology and architecture and presents their ideas for re thinking the city in terms of neurobiology and Noo politics The book examines the relationship between information and communication calling for a new logic of representation and shows how architecture can merge with urban systems and processes to create new forms of network that empower the imagination and change our cultural landscape **Claude Lévi-Strauss** Christopher Johnson,2003-02-27

L vi Strauss is one of the major intellectual figures of the twentieth century His theory of structuralism has been influential not only in anthropology but across the entire field of the humanities and social sciences This book looks at the formative period of his career from the 1940s to the early 1960s where he attempts to define both his own place in anthropology and the place of anthropology in the wider context of the human sciences in France Through a close reading of key texts Christopher Johnson provides an introduction to key aspects of L vi Strauss thought at the same time posing more general questions concerning the construction of theory and the different modes of conceptualization that inform theory Johnson looks at the ideological and autobiographical dimensions of L vi Strauss work and demonstrates how the impact of structuralism as an intellectual movement has clearly been greater than the sum of its theoretical parts **Society 5.0**

Bruno Salgues,2018-08-21 Following the rapid development of connected technologies which are now highly sophisticated and spread across the globe Society 5 0 has emerged and brought with it a dramatic societal shift In 1998 Kodak the world leader in photographic film had 170 000 employees It thus seemed unthinkable that just 3 years later the majority of people would stop taking photographs to paper film and that Kodak would have disappeared These are the stakes of this new society that is taking shape This book which does not seek to critique current politics management or marketing literature aims to fight against the excesses of this often misunderstood Society 5 0 and to present the ideas and associated technologies that comprise it all working towards societal improvement Among these technologies artificial intelligence robotics digital platforms and 3D printing are undoubtedly the most important and thus receive the greatest focus Chromatikon 4 Michel

Baiasu,2011-08-26

This book challenges the view of the relationship between Kant's and Sartre's practical philosophies arguing that Kant was one of Sartre's most significant predecessors. The book identifies several fundamental theses of Sartre's practical philosophy and shows Sartre to be closer to Kant in this respect than many contemporary Kantian theories are. The Memory of the World Ted Toadvine, 2024-05-14 Advancing a phenomenological approach to deep time. Our imagination today is dominated by the end of the world from sci-fi and climate fiction to actual predictions of biodiversity collapse, climate disruption, and the emergence of the Anthropocene. This obsession with the world's precarity. The Memory of the World contends, relies on a flawed understanding of time that neglects the past and present with the goal of managing the future. Not only does this mislead sustainability efforts, it diminishes our encounters with the world and with human and nonhuman others. Here Ted Toadvine takes a phenomenological approach to deep time to show how our apocalyptic imagination forgets the sublime and uncanny dimensions of the geological past and far future. Guided by original readings of Maurice Merleau-Ponty, Emmanuel, Levinas, Jacques Derrida, Jean-Luc Nancy, and others, he suggests that reconciling our embodied lives with the memory of the earth transforms our relationship with materiality, other forms of life, and the unprecedented future. Integrating insights from phenomenology, deconstruction, critical animal studies, and new materialism, The Memory of the World argues for a new philosophy of time that takes seriously the multiple pleated and entangled temporal events spanning cosmic, geological, evolutionary, and human durations.
