Social Constructionist Psychology Nightingale , David,Cromby , John,1999-09-01 This work explores the growing conviction that dominant trends in social constructionism are inadequate or incomplete and risk preventing social constructionism from maturing into a viable and coherent body of theory method and practice **Social Constructionism** Vivien Burr,2024-11-15 The fourth edition of this seminal work introduces students to social constructionism Using a variety of examples from everyday experience and from existing research in areas such as personality sexuality and health it clearly explains the basic theoretical assumptions of social constructionism Drawing on a range of empirical studies the book clearly defines the various approaches to social constructionist theory and research and explores the theoretical and practical issues they raise It presents and analyses key debates such as the nature and status of knowledge truth reality and the self in an accessible style The new edition has been updated with relevant and contemporary references to aid understanding of key theoretical and methodological issues The author additionally utilises new illustrative examples from research and contemporary life such as the MeToo movement BlackLivesMatter and Post Truth politics The updated work has also been expanded to include an extended discussion of affect and embodiment and a number of exercises to help illustrate important concepts Social Constructionism extends and updates the material covered in previous editions and will be an invaluable and informative resource for undergraduate and postgraduate students of Psychology Sociology Education and other related disciplines **The Cambridge Handbook of Political Psychology** Danny Osborne,Chris G. Sibley,2022-02-24 The Cambridge Handbook of Political Psychology provides a comprehensive review of the psychology of political behaviour from an international perspective Its coverage spans from foundational approaches to political psychology including the evolutionary personality and developmental roots of political attitudes to contemporary challenges to governance including populism hate speech conspiracy beliefs inequality climate change and cyberterrorism Each chapter features cutting edge research from internationally renowned scholars who offer their unique insights into how people think feel and act in different political contexts By taking a distinctively international approach this handbook highlights the nuances of political behaviour across cultures and geographical regions as well as the truisms of political psychology that transcend context Academics graduate students and practitioners alike as well as those generally interested in politics and human behaviour will benefit from this definitive overview of how people shape and are shaped by their political environment in a rapidly changing twenty first century **Place Attachment** Lynne C. Challenging Entrepreneurship Research Hans Landstrom, Annaleena Parhankangas, Alain Fayolle, Philippe Riot, 2016-06-10 The growth of entrepreneurship research has been accompanied by an increased convergence and institutionalization of the field In many ways this is of course positive but it also represents how the field has become mainstream with the concomitant risk that individual scholars become embedded in a culture and incentive system that emphasizes and rewards incremental research questions while reducing the incentives for scholars to conduct challenging research This book challenges this status quo from accepted theories methodologies and paradigmatic assumptions to the relevance or lack of for contemporary practice and the impact of key journals on scholars directions in entrepreneurship research An invited selection of the younger generation of scholars within the field of entrepreneurship research adopt a critical and constructive posture on what has been achieved in entrepreneurship research the main assumptions which underly it but also open up new paths for creative entrepreneurship research in the future This is a must read for all scholars educators and advanced students in entrepreneurship research

Decentralization in Environmental Governance Christian Zuidema, 2016-10-04 Decentralization in Environmental Governance is a critical reflection on the dangers and risks of governance renewal warning against one sided criticism on traditional command and control approaches to planning The book formulates the arguments that support when and how governance renewable might be pursued but this attempt is not just meant for practitioners and scholars interested in governance renewal It is also useful for those interested in the challenge of navigating a plural landscape of diverse planning approaches which are each rooted in contrasting theoretical and philosophical positions The book develops a strategy for making argued choices between alternative planning approaches despite their theoretical and philosophical positions It does so by revitalizing the idea that we can contingently relate alternative planning approaches to the circumstances encountered It is an idea traced to contingency studies of the mid and late 20th century reinterpreted here within a planning landscape dominated by notions of uncertainty complexity and socially constructed knowledge This approach called Post contingency is both a theoretical investigation of arguments for navigating the theoretical plurality we face and an empirical study into renewing environmental governance Next to its theoretical ambitions Decentralization in Environmental Governance is practical in offering a constructive critique on current processes of governance renewal in European environmental governance
