Social Gains From Female Education A Cross National Study:

Social Gains from Female Education K. Subbarao, Laura Raney, 1993-01-01 **Desired Fertility and the Impact of Population Policies** Lant Pritchett, Lawrence H. Summers, 1994 **Gender, Education and Development** Christine Heward, Sheila Bunwaree, 1999 This book grounds the education of women and girls in the realities of their lives and experience in diverse areas of the developing world The case studies range from the Arakambut of Peru to the changing experience of racialized education in South Africa The contributors take issue with the World Bank's view that the education of girls and women is important primarily as a cost effective mechanism for making women more economically productive

Women, Education and Development in Asia Grace C.L. Mak, 2017-12-12 This reissue 1996 examines four interrelated aspects of schooling for women in ten Asian countries the development experience of a country and how it affects education and women's status the types of educational opportunities available to women if the greater exposure to education results in greater participation in the public sphere the impact of education and economic participation on women's domestic status **Interculturalism, Society and Education** , 2010-01-01 In no part of the world today is the concept of intercultural exchange a novelty and in many parts of the world it has even been a long tradition Nevertheless recent globalization forces have combined to accelerate many aspects of migration and intercultural confrontation As a result we see an emerging world society in which intercultural mixing and conflict are salient characteristics rather than being exceptional situations or embryonic phases of societal development The need for intercultural education and for intercultural dialogue in various forms has become universal All people have an obligation to participate in and take responsibility for world peace balanced sustainable development and democratic dialogue to create the capacity to live together Persistent and increasingly complex patterns of population movement with all of the societal ramifications that accompany them demand consideration of ways in which different societies respond to issues of intercultural education and dialogue both historically and currently Interculturalism Society and Education contains contributions that explore comparative and international case studies ranging from accounts of educational problems impacting specific immigrant groups in Europe socio educational programs and projects in Africa and Asia comparative analyses of citizenship education issues in selected countries and a global overview of different patterns of the interculturalism society education nexus This volume offers a sampling of the multiplicity of intercultural forms around the world useful for policy makers and educators across the spectrum of institutions and organizations that strive to open paths for positive intercultural exchange through education **Bridges and Barriers** Eddie Williams, 2014-06-03 Recent decades have seen sub Saharan Africa decline in both economic and human terms The rich North has responded with a barrage of well publicized initiatives from pop concerts to international commitments on debt relief aid trade and good governance Among the complex of factors necessary to sustain economic and human development education receives little media coverage although it is crucial However education must be effective This book

argues that in Anglophone Africa education is not effective because of the use of English rather than children's first languages both as the medium of instruction and also as the language in which children are first taught to read. Research is presented from Malawi and Zambia countries with contrasting language policies using evidence from tests in English and African languages, small group discussions and classroom observation. The findings show that English medium policies in Africa do not give students any advantage in English over first language policies while the use of English discriminates against girls and rural children. The book concludes that much education in Africa is a barrier rather than a bridge to learning because of the prevailing language ideology which has resulted in massive over estimation of the value of English. While appropriate language policies alone will not solve education and development difficulties in Africa they do have a positive contribution to make. The evidence presented here suggests they are failing to make that contribution. **Borrower Ownership of Adjustment Programs and the Political Economy of Reform** John H. Johnson, Sulaiman S. Wasty, 1993-01-01

China has done much to reform its price system, achieve macroeconomic stability and restore growth. Nevertheless, price distortions remain in three key areas. This study suggests further price reforms for the energy, grain and transport sectors. It explains why energy price adjustments should have only a modest effect on consumer prices but a highly positive effect on the economy. It discusses why China may have to reduce consumer subsidies to achieve the necessary reforms for grain prices. The study describes what the government must do to strengthen commodity markets, generate competition and make allowances for seasonal price variations. China's transport sector has been a critical development bottleneck. The paper reviews tariff adjustments and other reforms that would modernize the transport system and help it meet growing demand. These reforms also would encourage energy conservation and help integrate the national economy.

Raising the Productivity of Women Farmers in Sub-Saharan Africa Katrine Anderson Saito, Hailu Mekonnen, Daphne Spurling, 1994. World Bank Discussion Paper 230. Based on four country studies and extensive household surveys, this paper documents the breakdown of traditional farming systems in Sub-Saharan Africa and its implications for the role of women in agriculture. **Korean Industrial Policy** Danny M. Leipziger, Peter A. Petri, 1993. The World Bank is changing the way it does business in the energy sector. This Policy Paper is one of two that outlines the Bank's new policies for the sector. The review was prompted by concern about the effects of power generation on the environment and on populations that may be resettled to make way for projects. Another stimulus was the macroeconomic reality of fewer investment resources in many countries. And many developing countries are becoming more receptive to reforming the way energy is produced and consumed. This paper credits the public monopoly approach of the last 30 years with facilitating expansion of power supplies, capturing technical economies of scale and making effective use of scarce managerial and technical skills. Nonetheless, it recommends several new policies to improve the performance of the electric power sector in developing countries. These reforms will guide future Bank activities in the sector. Bank loans for electric power will go first to countries clearly

committed to improving the performance of their power sectors The Bank will also discourage subsidies on energy prices and will encourage private investment in utilities And it will provide financing to help the least developed countries import power where local generation is not practical The efficiency of production and use of electric power in developing countries is examined in a companion paper Energy Efficiency and Conservation in the Developing World The World Banks Role The World Bank s Role in the Electric Power Sector is also available in Spanish La funcion del Banco Mundial en el sector de la electricidad Politicas para efectuar una reforma institucional regulatoria y financiera eficaz ISBN 0 8213 2451 9 Stock No 12451 7 95 Price code 007 Spanis **Exporting High-value Food Commodities** Steven Jaffee,Peter Gordon,1993-01-01 The economic integration of the European Community EC and its implications for Sub Saharan Africa are examined in this anthology
