

THE SOCIAL PSYCHOLOGY OF AGGRESSION

Thoroughly revised and updated, this third edition offers a comprehensive and up-to-date overview of the social psychology of aggression, covering all the relevant major theories, individual differences, situational factors, and applied contexts.

Understanding the causes, forms, and consequences of aggression and violence is critical for dealing with these harmful forms of social behaviour. Addressing a range of sub-topics, the first part deals with the definition and measurement of aggression, presents major theories, examines the development of aggression and discusses individual and gender differences in aggressive behaviour. It covers the role of situational factors in eliciting aggression and the impact of exposure to violence in the media. The second part examines specific forms and manifestations of aggression, including chapters on aggression in everyday contexts and in the family, sexual aggression, intergroup aggression, and terrorism. The new edition also includes additional coverage of gender differences, gun violence, and terrorism, to reflect the latest research developments in the field.

Also discussing strategies for reducing and preventing aggression, this book is essential reading for students and researchers in psychology and related disciplines, as well as practitioners and policy makers.

Barbara Krahe is Professor of Social Psychology at the University of Potsdam, Germany. She was awarded the German Psychology Prize for her work on aggression in 2015 and has served as President of the International Society for Research on Aggression.

Human Aggression Robert A. Baron, 2013-04-17 also many newer lines of research to which I will return below are represented in various chapters And finally I have included a separate unit on methods for the study of aggression a feature that I believe to be unique to the present volume In these ways I have attempted to produce a text that is as broad and eclectic in coverage as I could make it While the present volume grew in part out of my desire to produce what I thought might prove to be a useful teaching aid it also developed out of a second major motive During the past few years a large number of new and to me exciting lines of investigation have emerged in rapid order These have been extremely varied in scope including among many others such diverse topics as the effects of sexual arousal upon aggression the impact of environmental factors e g heat noise crowding upon such behavior interracial aggression and the influence of heightened self awareness Despite the fact that such topics have already generated a considerable amount of research they were not to my knowledge adequately represented in any existing volume Given this state of affairs it seemed to me that a reasonably comprehensive summary of this newer work might prove both useful and timely
