Transcultural English Studies Frank Schulze-Engler,Sissy Helff,2009 What is most strikingly new about the transcultural is its sudden ubiquity Following in the wake of previous concepts in cultural and literary studies such as creolization hybridity and syncretism and signalling a family relationship to terms such as transnationality translocality and transmigration transcultural terminology has unobtrusively but powerfully edged its way into contemporary theoretical and critical discourse The four sections of this volume denote major areas where transcultural questions and problematics have come to the fore theories of culture and literature that have sought to account for the complexity of culture in a world increasingly characterized by globalization transnationalization and interdependence realities of individual and collective life worlds shaped by the ubiquity of phenomena and experiences relating to transnational connections and the blurring of cultural boundaries fictions in literature and other media that explore these realities negotiate the fuzzy edges of ethnic or national cultures and participate in the creation of transnational public spheres as well as transcultural imaginations and memories and finally pedagogy and didactics where earlier models of teaching other cultures are faced with the challenge of coming to terms with cultural complexity both in what is being taught and in the people it is taught to and where target cultures have become elusive The idea of locating culture and literature exclusively in the context of ethnicities or nations is rapidly losing plausibility

throughout an English speaking world that has long since been multi rather than monolingual Exploring the prospects and contours of Transcultural English Studies thus reflects a set of common challenges and predicaments that in recent years have increasingly moved centre stage not only in the New Literatures in English but also in British and American studies

Changing European Identities Glynis Marie Breakwell, Evanthia Lyons, 1996 The political structure of Europe has changed and continues to do so The changing allegiances of the populations of Europe pose problems and challenges for social psychological theory Changing European Identities explores these issues using social identity theory and alternative models such as alienation theory and representational identity theory It provides a highly topical and relevant context for exploring the validity and limits of current theories Providing a valuable new perspective on people's reactions to change in Europe it will be useful for advanced scholars in psychology and other social and political sciences The Development of the Social Self Mark Bennett, Fabio Sani, 2004-07-31 Drawing upon the perspective of social identity theory The Development of the Social Self is concerned with the acquisition and development of children's social identities In contrast to previous work on self development which has focused primarily on the development of the personal self this volume makes a case for the importance of the study of the social self that is the self as defined through group memberships such as gender ethnicity and nationality A broad range of identity related issues are addressed such as ingroup identification conceptions of social identities prejudice and the central role of social context Based on contributions from leading researchers in Europe Australia and the US the book summarises the major research programmes conducted to date Furthermore the closing chapters provide commentary on this research as well as mapping out key directions for future research With a unique focus encompassing both social and developmental psychology The Development of the Social Self will appeal to a broad spectrum of students and researchers in both disciplines as well as those working in related areas such as sociology and child development *An Introduction to Social Constructionism* Vivien Burr, 2006-07-13 An invaluable clear guide to social constructionism for all perplexed students who want to begin to understand this difficult area Introduction to Social Constructionism is a readable and critical account of social constructionism for students new to the field Focusing on the challenge to psychology that social constructionism poses Vivien Burr examines the notion of personality to illustrate the rejection of essentialism by social constructionists This questions psychology's traditional understanding of the person She then shows how the study of language can be used as a focus for our understanding of human behaviour and experience This is continued by examining discourses and their role in constructing social phenomena and the relationship between discourse and power However the problems associated with these analyses are also clearly outlined Many people believe that one of the aims of social science should be to bring about social change Vivien Burr analyses what possibilities there might be for change in social constructionist accounts She also addresses what social constructionism means in practice to research in the social sciences and includes some guidelines on doing discourse analysis *Cities' Identity Through Architecture and Arts*
