Social Dynamics Of The Life Course Transitions Institutions And Interrelations:

Social Dynamics of the Life Course Walter R. Heinz, Victor W. Marshall, In the last two decades research on the life course has successfully combined and integrated different and rather isolated fields of social concerns such as the labor market family solidarity education employment retirement and social policy It has also developed a special focus on crucial problems of sociological research which includes the understanding of micromacro phenomena the dynamics of social change and international comparisons Contributors to this volume take an international comparative approach in applying the life course theoretical framework to issues of work and career Life course research focuses on the relationship between institutions and individuals across the life span and illuminates the impact of modernization on the shaping of biographies Industrial service societies are characterized by historically new contingencies of living arrangements and biographies These contingencies differ according to the extent to which life course patterns are regulated by social institutions In the continental European context institutional frameworks continue to define the timing and sequencing of transitions across the life course In less regulated market societies like the United States and Great Britain biographies and living arrangements are shaped more by the interaction of markets social networks and individual decisions In active welfare states institutional resources and rules continue to mediate the effects of social change on the life course What the editors and contributors to this fine compendium anticipate is a change on the cultural level toward more equality This trend supports young people and women in particular in their expectations concerning an egalitarian relationship This expectation is not taken for granted from the point of view of the male partner but has to be negotiated in decisionmaking processes as an issue that concerns the couple as a unit Thus the way in which people interact is profoundly impacted by the values and goals of equity demands Walter R Heinz is professor of sociology and social psychology and director Graduate School of Social Sciences University of Bremen Victor W Marshall is professor of sociology and director of the Institute on Aging University of North Carolina at Chapel Hill Carolina

Social Dynamics of the Life Course Walter R. Heinz, Victor W. Marshall, 2003 In the last two decades research on the life course has successfully combined and integrated different and rather isolated fields of social concerns such as the labor market family solidarity education employment retirement and social policy It has also developed a special focus on crucial problems of sociological research which includes the understanding of micromacro phenomena the dynamics of social change and international comparisons Contributors to this volume take an international comparative approach in applying the life course theoretical framework to issues of work and career Life course research focuses on the relationship between institutions and individuals across the life span and illuminates the impact of modernization on the shaping of biographies Industrial service societies are characterized by historically new contingencies of living arrangements and biographies These contingencies differ according to the extent to which life course patterns are regulated by social institutions In the continental European context institutional frameworks continue to define the timing and sequencing of

transitions across the life course In less regulated market societies like the United States and Great Britain biographies and living arrangements are shaped more by the interaction of markets social networks and individual decisions In active welfare states institutional resources and rules continue to mediate the effects of social change on the life course What the editors and contributors to this fine compendium anticipate is a change on the cultural level toward more equality This trend supports young people and women in particular in their expectations concerning an egalitarian relationship This expectation is not taken for granted from the point of view of the male partner but has to be negotiated in decisionmaking processes as an issue that concerns the couple as a unit Thus the way in which people interact is profoundly impacted by the values and goals of equity demands Walter R Hein is professor of sociology and social psychology and director Graduate School of Social Sciences University of Bremen Victor W Marshall is professor of sociology and director of the Institute on Aging University of North Carolina at Chapel Hill Carolina

Family Dynamics over the Life Course Janeen Baxter, Jack Lam, Jenny Povey, Rennie Lee, Stephen R. Zubrick, 2022-10-19 This open access book examines how families and other social institutions interact to shape outcomes over the life course It considers how to use research evidence to reduce social disadvantage through translation of evidence to support public policies and programs The chapters focus on key life course stages such as early child development adolescence emerging adulthood parenting marriage relationships and ageing as well as examining experiences and outcomes for selected social groups such as Indigenous children migrants and refugees and gay lesbian and bisexual groups The book presents evidence using high quality and recent data With a focus on Australia the volume provides new insights into how context shapes life course pathways and outcomes and a contrast to work that typically focuses on Europe and the United States It will be of value to anyone interested in understanding how family background and life course pathways influence social disadvantage

Life Course, Work, and Labour in Global History Josef Ehmer, Carola Lentz, 2023-09-18 This multidisciplinary volume offers unique perspectives across the globe and throughout the centuries on the complexity of the nexus between work and the life course For industrialized regions from Germany and Western Europe to China and Japan it questions the widespread notion of an overall growing working life course instability since the 1970s For unindustrialized or industrializing regions from West Africa to state socialist East Central Europe as well as for transnational and transcontinental labour migrations it shows the enormous influence of the extended family and wider kin on individual pathways into and out of work For early modern Europe India and China and up to twentieth century state socialism and to current welfare states it stresses and concretizes the crucial impact of age and gender for both societal labour relations and individual work related decision making With all chapters based on original research the volume reflects a close cooperation between historians anthropologists and sociologists Its multidisciplinary approach finds expression in its methodological plurality reaching from archival research and sophisticated statistical analyses to biographical interviews and participant observation This mix allows to grasp the interaction between societal change and individual agency

Sociological Life Course Research Matthias Wingens, 2022-08-04 This introductory book provides an insight into sociological life course research and informs about its theoretical assumptions analytical concepts and main results Sociological life course research like biographical research has developed into an independent and fruitful field of research since the end of the 1960s It is true that half a century earlier in their famous study of The Polish Peasant in Europe and America 1918 20 Thomas and Znaniecki had already used life records to examine the connection between social change social structures and the life histories of individuals However such a research perspective was supplanted by other methodological conceptual approaches to empirical social research for over fifty years It was not until the 1960s that sociological interest in life course and biographical theoretical issues reawakened Today life course research is considered one of the most important conceptual innovations in sociology in recent decades The content The life course as a social construction What is life course research The life course as an institution Collective life courses generations cohorts and social change Structures of the life course Life course research a conceptual perspective Life course research quo vadis The author Prof Dr Matthias Wingens teaches sociology at the University of Bremen Bremen International Graduate School of Social Sciences BIGSSS

Social Networks and the Life Course Duane F. Alwin, Diane H. Felmlee, Derek A. Kreager, 2018-03-06 This volume engages the interface between the development of human lives and social relational networks It focuses on the integration of two subfields of sociology social science the life course and social networks Research practitioners studying social networks typically focus on social structure or social organization ignoring the complex lives of the people in those networks At the same time life course researchers tend to focus on individual lives without necessarily studying the contexts of social relationships in which lives are embedded and linked to one another through social networks These patterns are changing and this book creates an audience of researchers who will better integrate the two subfields It covers the role of social networks across the life span from childhood and adolescence to midlife through old age

Towards an Interdisciplinary Perspective on the Life Course René Levy, Paolo Ghisletta, Jean-Marie Le Goff, Dario Spini, Eric Widmer, 2005-11-17 Despite the well established consensus on the need for an interdisciplinary research paradigm to understand the unfolding of human lives within their social context existing empirical research rarely embraces this belief This volume aims at examining the feasibility and hurdles of interdisciplinarity specific to given research fields by bringing together leading North American and European researchers in sociology psychology social psychology and social demography all highly concerned with fostering an interdisciplinary perspective for the study of the human life course The contributions are organized along four major axes three of them substantive agency and structure transitions and biographical re constructions and one methodological methodological innovations leaving ample leeway for the contributions to address the specific gains and difficulties of empirical interdisciplinary research within their particular domain The editors introduce the volume by discussing general features theoretical linkages and transversal substantive

themes of interdisciplinarity in life course research Likewise the volume is ended by the editors conclusions based on the contributions they single out major challenges and difficulties for the interdisciplinary study of the life course together with some promising research meant to address such difficulties and improve current knowledge about the life course The volume speaks to both experienced scholars and graduate students of the life course Advanced scholars will benefit from the latest in life course research domains and from a comprehensive overview of life course methodologies Graduate students of the life course will find in the book an original introduction to many empirical aspects of life course research and to the application of innovative methods to various research settings as well as rich bibliographical references from the research literature in English German and French

A Life-Course Perspective on Migration and Integration Matthias Wingens, Michael Windzio, Helga de Valk, Can Aybek, 2011-07-14 Over the last four decades the sociological life course approach with its focus on the interplay of structure and agency over time life course perspective has become an important research perspective in the social sciences Yet while it has successfully been applied to almost all fields of social inquiry it is much less used in research studying migrant populations and their integration patterns This is puzzling since understanding immigrants integration requires just the kind of dynamic research approach this approach puts forward any integration theory actually refers to life course processes This volume shows fruitful cross linkages between the two research traditions A range of studies are presented that all apply sociological life course concepts to research on migrants and migrant groups in Europe The book is organized thematically indicating different important domains in the life course Using a wide variety of methodological approaches it covers both quantitative studies based on population census data and survey material as well as qualitative studies based on interviews Attention is paid to the life courses of those who migrated themselves as well as their offspring The studies cover different European countries relating to one national context or a particular local setting in a city as well as cross country comparisons Overall the book shows that applying the sociological life course approach to migration and integration research may advance our understanding of immigrant settlement patterns as well as further develop the life course perspective

The Life Course Stephen J. Hunt, 2017-09-16 Dramatic social transformation in Western society over recent decades has had a profound impact on the way the life course is studied While people continue to experience the implications of class gender ethnicity and of course age they are more than ever able to take personal control of their own lives The Life Course considers how in a diverse and uncertain world the previously predictable stages of life are no longer fixed but increasingly open to change Focusing on continuities and change this book looks not only at the different phases of life but also at the transformation of a number of closely related social institutions such as the family education and the workplace Recognising that the established cradle to grave view is now outdated the trajectory from infancy and youth to later and end of life is followed not as a stable object of study but as a starting point for critical analysis This second edition offers an essential overview of the sociology of the life course incorporating both contemporary and

conventional perspectives It calls upon current theorising around the life course as well as on up to date empirical research data This thought provoking text is relevant to researchers and students of life course studies and sociology as well as to those in nursing social work and related caring professions

Divergence and Convergence in Education and Work

Vibe Aarkrog, Christian Helms Jørgensen, 2008 Are the educational systems in Europe becoming more similar or more different This book deals with the issue of divergence and convergence in relation to systems learning environments and learners in vocational educational training VET 18 VET researchers from eight countries contribute to the examination of divergence and convergence at three levels At the national level this volume deals with the following questions What are the consequences of the European policies that aim at converging the VET systems in Europe What is the impact of globalization on the national systems At the level of institutions the central issue concerns the relation between learning environments What is the coherence between school based education and learning in the work place and how can they connect Finally at the third level of the learners and their identities the focus is on the role of vocational educational training in the formation of biographies and identities The book thus covers the central issues on the agenda in relation to future vocational education
