Social Fabric:

Sustainability and the Social Fabric Clio Padovani, Paul Whittaker, 2017-09-07 While the topic of sustainability in textile manufacture has been the subject of considerable research much of this is limited to a focus on materials and practices and their ecological impact Padovani and Whittaker offer a unique exploration of the textile industry in Europe from the perspective of social sustainability shifting the focus from the materiality of textile production to the industry's relationships with the communities from which the products originate Featuring six in depth case studies from design entrepreneurs artisans and textile businesses around Europe from Harris Tweed in Scotland to luxury woollen mills in Italy Sustainability and the Social Fabric explores how new centres of textile manufacturing have emerged from the economic decline in 2008 responding creatively and producing socially inclusive approaches to textile production Case studies each represent a different approach to social sustainability and are supported by interviews with industry leaders and comparisons to the global textile industry Demonstrating how some companies are rebuilding the local social fabric to encourage consumer participation through education enterprise health and wellbeing the book suggests innovative business models that are economically successful and also in turn support wider societal issues Essential reading for students of textiles fashion design and related subjects this book will demonstrate how a business ecosystem that focuses on inclusive growth and social innovation can lead to sustained mutual benefit for textile industries and their local communities **The Social Fabric**

James F. Short, 1986 **Social Fabrics of the Mind** Michael Chance, 2015-06-19 Originally published in 1988 this book outlines a new evolutionary paradigm for understanding human society and mental structure originating from the editor's work in primate ethology It is supported and further elaborated by the contributors Chance argues that two modes of social interaction the agonistic and hedonic underlie social life and corresponding mentality In the agonistic mode we are concerned with self security and our attention is much taken up with being accepted by a group This mode is based on a recently discovered state of inhibited braked mental arousal Social behaviour is either authoritarian or authority subservient and has a tendency to control or be controlled It curbs intelligence and restricts personality development In the hedonic mode we are freer to form a network of personal relationships that are typically mutually supportive The hedonic mode leads to the development of self confidence and a relaxed empathic and collaborative personality with intelligence enhanced The volume will still be of interest to all concerned with human affairs including those working in ethology primatology anthropology social psychology psychiatry and political sociology *The Social Fabric: American life from 1607 to 1877* John H..

Cary, 1995 **The Social Fabric** John H. Cary, 1987 **Architecture and Leadership** Mark Roberson, Alicia Crumpton, 2022-12-12 From cathedrals to cubicles people go to great lengths and expense to design their living and working environments They want their spaces to be places where they enjoy being reflecting who they are and what they care about The resultant environments in turn become loud albeit unvoiced leaders for people occupying those corresponding spaces The

design and use of work and living spaces typifies and thematizes expectations for the group Essentially the architecture of rooms buildings and cities creates cultures by conveying explicit and implicit messages This is evident when people approach and walk into St Basil s Cathedral in Moscow the Forbidden City in Beijing the Sydney Opera House in Sydney Australia the Jewish Museum in Berlin or the Rothko Chapel in Houston to name some examples While leaders oftentimes lack the resources to have their spaces mirror the greatest architectural achievements of the world they are in a position to use the art and science of architecture at whatever scale is available to their advantage The creative and intentional use of space and place advances and promotes cherished values and enhances organizational effectiveness This book explores the essence of good architecture and establishes relevant connections for leaders and managers to strategically design and use the organizational workplace and space to support their mission and purpose and create aesthetically meaningful work environments It equips leaders to be culturally astute on what defines good architecture and to incorporate principles of beauty in their leadership practices accordingly and will be of interest to researchers academics professionals and students in the fields of leadership organizational studies and architecture theory and practice

China's Development Michel Aglietta, Guo Bai, 2013 China is entering a phase where deep structural changes will arise throughout society These multi fold processes will be intertwined in a globalized world impacted by the transformation of capitalism in the aftermath of the financial crisis and under the threat of severe environmental damage Focussing on sustainability this book explores the future of China in light of the successful reforms undertaken in the last thirty years It combines Chinese economic history and up to date macroeconomic theory in order to show how economic transformations and institutional changes are intertwined in developing capitalism under state sovereignty The book is divided into three parts Part 1 analyses the structural changes ahead drawing on the knowledge of the causes of the demise of imperial China and of the social disruptions due to political warfare in the 20th century Part 2 examines the reasons why the last thirty years of reform were successful and why the present growth regime will undergo a dramatic mutation in future decades Part 3 seeks to address the question what type of political economy can support the purpose of achieving harmonious society China s Development will be of interest to students and scholars of Chinese economics politics history and development

Neighborhoods, People, and Community Roger Ahlbrandt, 2013-03-09 This book focuses on neighborhoods and the people living in them It describes differences among neighborhoods in terms of their social and institutional structure attitudes of the residents quality of life and the characteristics of the residents The book is based on the results of a survey of almost 6 000 residents living throughout the city of Pittsburgh As such it provides the basis for examining groups of people as well as whole neighborhoods The communal aspects of urban living are discussed in Chapters 1 and 2 attachment toward the neighborhood in Chapter 3 importance of religion life cycle and race in Chapter 4 various aspects of individual social support systems and neighborhood social fabric in Chapters 5 6 and 7 the contextual aspects of the neighborhood environment in Chapters 8 and

9 and the implications for urban policy in Chapter 10 The results of the analysis described in the book provide a detailed understanding of differences in the structure and composition of urban neighborhoods and they show why some groups of people are drawn into their neighborhoods whereas others rely more upon the wider community to meet a variety of needs The analysis provides the framework in which to address the implications for urban policy particularly with respect to mental health prevention and neighborhood and community renewal **Microeconomic Theory** Frederic S.

Lee, 2017-11-20 Microeconomic Theory A Heterodox Approach develops a heterodox economic theory that explains the economy as the social provisioning process at the micro level Heterodox microeconomics explores the economy with a focus on its constituent parts and their reproduction and recurrence their integration qua interdependency by non market and market arrangements and institutions and how the system works as a whole This book deals with three theoretical concerns Due to the significance of the price mechanism to mainstream economics a theoretical concern of the book is the business enterprise markets demand and pricing Also since heterodox economists see private investment consumption and government expenditures as the principal directors and drivers of economic activity a second theoretical concern is business decision making processes regarding investment and production government expenditure decisions the financing of investment the profit mark up and the wage rate and taxes Finally the third theoretical concern of the book is the delineation of a non equilibrium disaggregated price output model of the social provisioning process This book explores the integration of these various theories with a theoretical model of the economy and how this forms a theory that can be identified as heterodox microeconomics It will be of interest to both postgraduates and researchers The Sociology of Food and Agriculture Michael Carolan, 2016-02-12 In this second edition of The Sociology of Food and Agriculture students are provided with a substantially revised and updated introductory text to this emergent field The book begins with the recent development of agriculture under capitalism and neo liberal regimes and the transformation of farming and peasant agriculture from a small scale family run way of life to a globalized system Topics such as the global hunger and obesity challenges GM foods and international trade and subsidies are assessed as part of the world food economy The final section concentrates on themes of sustainability food security and food sovereignty The book concludes on a positive note examining alternative agri food movements aimed at changing foodscapes at levels from the local to the global With increased coverage of the financialization of food food and culture gender ethnicity and justice food security and food sovereignty the book is perfect for students with little or no background in sociology and is also suitable for more advanced courses as a comprehensive primer All chapters include learning objectives suggested discussion questions and recommendations for further reading to aid student learning
