Social Justice And Third World Education:

Social Justice and Third World Education Timothy J. Scrase, 2021-12-12 First Published in 1997 In much of the comparative education literature questions of educational inequality and lack of educational opportunity in the developing world stand as perplexing complex and difficult problems Yet while inequality in education remains one of the most researched and written about topics in the discipline the question of social justice and its relationship to education remains implicit This volume aims to reverse this trend to make the issue of social justice both in theory and practice central and explicit

Economic Planning and Social Justice in Developing Countries Ozay Mehmet, 2014-05-12 First published in 1978 this book was written at a time when belief was high in Western guided economic development of the emerging countries The success of Marshall Plan in war torn Europe generated a US led optimism that with generous inflows of aid and technical assistance the Third World could be won over in the Cold War The author's direct experience as a young academic economist in Cyprus Malaysia Uganda and Liberia led him to question this general optimism the reality on the ground in the developing world did not seem to match Western optimism Theories and blueprints made in the West did not fit the requirements of developing countries Higher production and better income distribution were inseparable twin objectives of developing nations That meant production of a higher national output must at the same time promote social justice Investment must create adequate jobs so that new entrants into rapidly expanding labor force could be gainfully employed Yet the dominant Western theories of development at the time in particular the Trickle Down Theory of Growth prescribed Growth First Distribution Later strategy Similarly Import Substitution Industrialization theories were emphasized at the expense of export led growth Dualistic Growth theories preached urban biased anti rural development This book was written as a rebuttal of such faulty theorizing and misguided professional technical assistance and the book's message is no less valid today than in the 1970s

Third World Education Anthony R. Welch, 2002-05-03 This book debunks the argument that quality in education can only be achieved by limiting or trading off equality The quality of schooling is a major issue for Third World nations across the globe However there is no single measure which is universally accepted Whether it is as some economists might argue an issue of the number of desks per classroom or one of national sovereignty is widely disputed Defining equality in education becomes increasingly difficult in an era of globalization in which there exists a wide gap between rich and poor both within and between nations In the context of an international move towards New Right politics and neo liberal economic ideologies both the quality and equality of education are imperiled This book argues that any worthy definition of quality education must include the interests and participation of the underprivileged
