research concepts to fully realized designs Rather than rushing initial planning stages or reverse engineering questions from preferred methods it encourages students to challenge unconscious biases around method selection and analysis and provides step by step guidance on choosing a method that is in line with the question being explored Focused on the role of the researcher within research design it stresses the need to consider the theoretical underpinnings of research and not just practical issues when designing a project It provides a sophisticated toolkit to understand The critical issues associated with both qualitative and quantitative methods The approach that works best for specific research questions How design choices can affect practice Perfect for upper undergraduate and postgraduate students this book will instil confidence and good decision making to ensure constructively informed design and practice *How to Do Your Social Research Project Or Dissertation* Tom Clark,Liam Foster,Alan Bryman,2019 For final year social science undergraduates How to do your Social Research Project or Dissertation is the most student led guide to confidently navigate the research process It shares real student and supervisor experiences to help motivate you provides advice for efficient time management and tracks your progress through focused checklists **Handbook of Computational Social Science, Volume 2** Uwe Engel,Anabel Quan-Haase,Sunny Liu,Lars Lyberg,2021-11-10 The Handbook of Computational Social Science is a comprehensive reference source for scholars across multiple disciplines It outlines key debates in the field showcasing novel statistical modeling and machine learning methods and draws from specific case studies to demonstrate the opportunities and challenges in CSS approaches The Handbook is divided into two volumes written by outstanding internationally renowned scholars in the field This second volume focuses on foundations and advances in data science statistical modeling and machine learning It covers a range of key issues including the management of big data in terms of record linkage streaming and missing data Machine learning agent based and statistical modeling as well as data quality in relation to digital trace and textual data as well as probability non probability and crowdsourced samples represent further foci The volume not only makes major contributions to the consolidation of this growing research field but also encourages growth into new directions With its broad coverage of perspectives theoretical methodological computational international scope and interdisciplinary approach this important resource is integral reading for advanced undergraduates postgraduates and researchers engaging with computational methods across the social sciences as well as those within the scientific and engineering sectors **Strategies for Writing a Thesis by Publication in the Social Sciences and Humanities** Lynn P. Nygaard,Kristin Solli,2020-10-12 Responding to the growing popularity of the thesis by publication within doctoral education this book offers practical advice and critical discussion of some of the central choices and challenges that PhD students considering dissertation options face Drawing on current research and informed by extensive experience of working with and running workshops for PhD candidates who write article based dissertations this book gives readers an idea of what writing a thesis by publication entails what its purpose is what the various expectations might be for this emerging genre and what the challenges might be in writing one

Particular emphasis is put on how to put the individual articles together to create a coherent thesis that clarifies the student's individual original contribution. Written primarily for students, *Strategies for Writing a Thesis by Publication in the Social Sciences and Humanities* covers key topics such as how the genre has developed with an emphasis on the role of the narrative introductory text that accompanies the articles, typical rhetorical challenges that writers of such dissertations face, strategies for handling the writing process, specific challenges of demonstrating doctorateness in the thesis by publication, and strategies for addressing them. Institutional variations that the thesis writer should seek clarification on as early as possible, structural elements of the narrative and their main functions, the range of choices that can be made throughout the doctoral journey and thesis writing. This book is a must read for PhD candidates and supervisors new to the genre as well as those involved in directing PhD programmes who are interested in the pedagogical implications of the move towards article-based dissertations. *The Insider Guides to Success in Academia* offers support and practical advice to doctoral students and early career researchers. Covering the topics that really matter but which often get overlooked, this indispensable series provides practical and realistic guidance to address many of the needs and challenges of trying to operate and remain in academia. These neat pocket guides fill specific and significant gaps in current literature. Each book offers insider perspectives on the often implicit rules of the game, the things you need to know but usually aren't told by institutional postgraduate support, researcher development units or supervisors, and will address a practical topic that is key to career progression. They are essential reading for doctoral students, early career researchers, supervisors, mentors, or anyone looking to launch or maintain their career in academia. 1977 *National Science Foundation Authorization*.
