Education, Work and Social Change in Britain's Former Coalfield Communities Robin Simmons, Kat Simpson, 2022-10-17 This edited book presents a range of chapters written by new and established authors drawing on a range of different perspectives and traditions to critically analyse education work and social change in the former coalfields Historically coal was one of Britain's major industries employing over a million men at its peak But mining was more than an occupation it was a way of life for those living and working in coalfield communities Work leisure family

relations and other dimensions of social life were centred upon the coal industry and its related institutions such as trade unions working men s clubs and welfare institutes These communities have however undergone significant social and economic change over time not least in terms of the pain and suffering associated with the Great Strike of 1984 85 the successive waves of pit closures which took place thereafter and the eventual demise of the coal industry The book will be of interest to academics drawing on sociology social policy history geography and other subject disciplines *Working and Caring over the Twentieth Century* J. Participation, Marginalization and Welfare Services Aila-Leena Matthies,Lars Uggerhøj,2016-05-13 Current debates around participation and marginalization dominate the agenda of many European political forums There is an increasing concern about the stability of social cohesion and a growing number of particular groups of people who are regarded as being at risk of being socially excluded or marginalized This volume goes beyond the surface of public discussions to look at the central role played by welfare services in European societies in either strengthening or hindering participatory citizenship and democracy In current discussions welfare services understood in a broad sense are centrally positioned there are high expectations that welfare services can hinder marginalization and enable participation Yet marginalization is in most cases rooted in the deeper structures of society with economy participation and involvement dependent on political or highly personal factors which are beyond the scope of welfare services This groundbreaking volume posits that participation and marginalization are twin concepts expressing opposing sides of one and the same processes faced by individuals and communities It will be essential reading for social workers sociologists and policy makers throughout Europe

formative impact on governments policies The first half contains studies of social quality based on surveys in the former Soviet Union and sub Saharan Africa while the second half describes the construction of a Decent Society Index for comparing very different countries across the world This book and the index it develops will be of interest both to academics and researchers in sociology politics economics psychology social policy and development studies and to policy makers in government local government and the NGOs
