Property, Social Structure, and Law in the Modern Middle East Ann Elizabeth Mayer, 1985-01-01 For too long the study of law and society in the modern Middle East has been left to specialists in narrow subcategories of law or the social sciences Property Social Structure and Law in the Modern Middle East lays the groundwork for a new field of scholarship in which analysis of the social dimensions of law and the legal dimensions of social structure are integrated It

offers the stimulus of a variety of new models of scholarship by a distinguished international group of contributors whose work shares a common focus on regimes of property in the societies of the modern Middle East. The case studies examine the regulations of many kinds of property in relation to the social structures of selected Middle Eastern communities from the eighteenth century to the present. Most of the societies studied are subjected to pressures for rapid modernization and adjustment to major economic transformations. The book features comparisons of property rights and relations under regimes of Islamic and customary law as well as modern statutory law. Highlighted are new patterns of intervention by modern Middle Eastern states to alter traditional regimes of property and to transform the accompanying social structures. Their implications for development are also considered. The book's notes and bibliographies constitute a valuable resource for anyone interested in further research.

Amini Islanders: Social Structure and Change K.P. Ittaman, 2003-06

Transformation of forms of Indian temples takes place through a dual process: time as well as space. These two patterns of transformation through time and while representing time in space reflect one another closely. Both are processes of emergence, expansion and proliferation which simultaneously imply differentiation and fusion, growth from the dissolution into unity. One of the richest traditions of temple building that India has produced took shape in the 7th century A.D. centred in what is now the state of Karnataka and lasted until the 13th. This was one of the two main branches of Dravida or Southern temple architecture giving rise to such famous temples as the Virupaksa, Pattadakal, Ellora and the Hoysaleswara at Halebidu. These are analysed along with more than 250 other buildings in this monumental study that for the first time explains the Karnataka Dravida tradition as one continuous coherent development. The book, with its numerous analytical drawings, will be welcomed for the way it shows how to look at these great monuments and makes their complex architecture accessible. It is clearly shown how the formal structure of a temple makes concrete the idea of manifestation of the transmutation of the eternal and infinite into the shifting multiplicity of existence and the reabsorption of all things into the limitless unity from which they have come.
