Making Citizenship Work Rodolfo Rosales, 2022-08-24 Making Citizenship Work seeks to address questions of how a community reaches a place where it can actually make citizenship work A second question addressed is What does citizenship represent to different communities Across thirteen chapters a collection of experts traverse multiple disciplines in analyzing citizenship from different points of access Each chapter revolves around the premise that empowerment of communities and individuals within the community comes in different forms and is governed by multiple needs and visions Authors utilize case studies to demonstrate the different roles that communities from a broad sector of our society adopt to accomplish constructing democratic processes that reflect their goals needs and cultures Concurrently authors address the structural obstacles to the empowerment of communities arguing that the democratic process does not and cannot accommodate the diverse communities of society within a single universalistic model of citizenship They conclude that fundamentally citizenship is not simply a legal right an obligation a state of rights but a practice an action on the behalf of community Making Citizenship Work challenges conventional thinking about politics while also encouraging readers to go beyond the box that deters us from visualizing a human society It is an ideal book for undergraduate and graduate courses in political science sociology history social work and Ethnic Studies

Constructing Twenty-First Century Socialism in Latin America S. Motta, M. Cole, 2014-06-05 In *Constructing Twenty First Century Socialism The Role of Radical Education* Motta and Cole explore the role of the politics of knowledge and pedagogy in the reinvention of socialism for the twenty first century Through a critical analysis of Brazil Colombia and Venezuela they deconstruct the mechanisms of neoliberal control as an epistemological project of monologue closure and violence against all others The authors develop an affirmative engagement with the traditions practices and politics which seek to challenge this closure through the policies of the counter hegemonic government of Venezuela the struggles of social movements in Brazil and Colombia and the daily resistance of critical educators working in formal educational settings in all three countries This mapping and analysis not only contribute to struggles for alternatives to capitalism in Latin America but are translatable to other contexts The book theorizes that with the exhaustion of neoliberalism it is time to pedagogize the political and politicize the pedagogical in order to create worlds beyond capitalism

Building Cosmopolis John S. Partington, 2017-03-02 Alongside his reputation as an author H G Wells is also remembered as a leading political commentator of the late nineteenth and early twentieth centuries *Building Cosmopolis* presents the worldview of Wells as developed between his student days at the Normal School of Science 1884 1887 and his death in 1946 During this time Wells developed a unique political philosophy grounded on the one hand in the theory of Ethical Evolution as propounded by his professor T H Huxley and on the other in late Victorian socialism From this basis Wells developed a worldview which rejected class struggle and nationalism and embraced global co operation for the maintenance of peace and the advancement of the human species in a

world society Although committed to the idea of a world state Wells became more antagonistic towards the nation state as a political unit during the carnage of the First World War He began moving away from the position of an internationalist to one of a cosmopolitan in 1916 and throughout the inter war period he advanced the notion of regional and ultimately functional world government to a greater and greater extent Wells first demonstrated a functionalist society in *Men Like Gods* 1923 and further elaborated this system of government in most of his works both fictional and non fictional throughout the rest of his life Following an examination of the development of his political thought from inception to fruition this study argues that Wells s political thoughts rank him alongside David Mitrany as one of the two founders of the functionalist school of international relations an acknowledgement hitherto denied to Wells by scholars of world government theory

Behind the Myths John Pickard, 2013-02-26 There has never been a more important time for a study of the social economic and political origins of Judaism Christianity and Islam the three important world religions that share a common root This book adopts a Marxist that is a materialist view of human development so it takes as its starting point the idea that gods angels miracles and other supernatural phenomena do not exist in the real world and therefore cannot be taken as explanations for the origin and rise of these faiths It looks instead at the material conditions at appropriate periods in antiquity and the social and economic forces that were at work to outline the real foundations of these three doctrines In doing so it challenges the historicity of key figures like Moses Jesus and Mohammed This is a unique book that draws on the research knowledge and expertise of hundreds of historians archaeologists and scholars to create a new synthesis that is both coherent and completely based on a materialist world outlook It is a book written by an unbeliever for other unbelievers as a contribution to a discussion among atheists and secularists as to the real origins of the so called Abrahamic faiths It will be a revelatory read even to those already firmly of an atheist or secularist persuasion underpinning their nonreligious views and it will provide a valuable resource for all those who might be coming to question the hold that organized religion has had on human society
