Societal Adaptation To Climate Variability And Change:

Societal Adaptation to Climate Variability and Change Sally M. Kane, Gary W. Yohe, 2000-05-31 Changes in climate and climate variability have an effect on people's behaviour around the world and public institutions have an important part to play in influencing our ability to respond to and plan for climate risk. We may be able to reduce climate risk by seeking to mitigate the threat on the one hand and by adapting to a changed climate on the other. Another theme of the book is the integrated role of adaptation and mitigation in framing issues and performing analyses. Adaptation costs fall most heavily on the poor and special attention needs to be paid to adaptation by the poorest populations. An integrating framework is also presented to provide the context for an expansive typology of terms to apply to adaptation. The 12 papers collected here use methods from a variety of disciplines and focus on different time frames for decision making from short term to the very long term. Readership: Technically trained readers familiar with the policy issues surrounding climate change and interested in learning the scientific underpinnings of issues related to societal adaptation.

A Framework for Social Adaptation to Climate Change, 2010 **Social-Ecological Systems (SES)** Mohamed Behnassi, Himangana Gupta, Mahjoub El

Haiba, Gopichandran Ramachandran, 2021-07-12 This book contributes to the multidisciplinary debate about social ecological systems (SES) within the perspective of rethinking the nature of interaction between these systems especially in the Anthropocene Era. Most chapters either deliberate on risk dynamics threatening current SES or stimulate thought processes to manage such risks and related negative implications. After analyzing the main drivers of SES vulnerability, the book highlights the shifts to be made to enhance the sustainability and resilience of these systems, mainly the integration and restructuring of governance frameworks, the reorganization of production and consumption systems far from conventional models based on consumerism, the elaboration of mitigation, adaptation, and SDGs implementation measures from a co-benefit perspective, and the consideration of appropriate approaches and paradigms while elaborating and implementing response.
