Socioeconomic Determinants Of Regional Mortality Differences In Europe:

Socioeconomic Determinants of Regional Mortality Differences in Europe Jeroen Johannes Anthonius Spijker, 2004 The objective of this thesis is to assess the importance of socioeconomic and other factors on mortality differences across Europe over time and between regions to determine which factors should be incorporated into future mortality scenarios When possible Regional Mortality Differences in Germany Eva U.B. Kibele, 2012-10-01 Regional mortality differences are one dimension of health inequalities but its trends and determinants in Germany are widely unknown This book examines and illustrates patterns of regional mortality in Germany with focus on small area differentials and their changes over time It identifies explanatory factors at individual and regional level Mortality differences between eastern and western Germany exist but small area mortality differentials are often greater Though the main spatial mortality patterns remain this study provides evidence that some distinct changes in the small area mortality patterns in Germany especially among women occurred within a short period of time Mortality inequalities at younger ages and in behavior related causes as well as differences in socioeconomic conditions contribute strongly to regional mortality differences in Germany The book shows that the complex interplay between individual and regional level mortality risk factors requires a multidimensional approach to reduce regional mortality inequalities

Macro-economic Determinants of International Migration in Europe Roel Peter Wilhelmina Jennissen, 2004 Discusses macro economic determinants of international migration in Europe *International Handbook of Adult Mortality* Richard G. Rogers, Eileen M. Crimmins, 2011-02-18 This handbook presents a comprehensive and up to date overview of unprecedented substantive theoretical methodological and statistical developments and insights and an in depth examination of trends and patterns in adult mortality around the world With over two dozen chapters and more than 50 authors this volume draws from top international mortality experts to provide one of the best overviews of life expectancy extant The book documents remarkable gains in life expectancy which stand out as one of the most important accomplishments of the twentieth century Individuals in more developed countries can expect to live longer now than ever before especially the Japanese who enjoy record setting life expectancies The book also explores unfortunate declines in life expectancy in selected countries brought on by such factors as infectious diseases accidents suicides and homicides and political and economic conflict and turmoil This book synthesizes the wealth of mortality information available clearly articulates the central findings to date identifies the most appropriate datasets and methods currently available illuminates the central research questions and develops an agenda to address these research questions The authors carefully examine central factors related to mortality including health behaviors socioeconomic status social relations biomarkers and genetic factors The book will prove especially relevant to researchers students and policy makers within social and health sciences who want to better understand international trends and patterns in adult mortality

Mathematical Demoeconomy Yuri S. Popkov, 2014-04-02 This monograph aspires to lay the foundations of a new

scientific discipline demoeconomics representing the synthesis of demography and spatial economics This synthesis is performed in terms of interaction between population and its economic activity The monograph appears a unique research work having no analogs in scientific literature Demoeconomic systems are studied involving the macrosystems approach which combines the generalized entropy maximization principle and the local equilibria principle Demoeconomic systems operate in an uncertain environment thus and so the monograph develops the methodology and technique of probabilistic modeling and forecasting of their evolution

Culture, Risk and HIV/AIDS Among Migrant and Mobile Men in Goa, India Ajay Bailey, 2008 *International Migration and the Future of Populations and Labour in Europe* Marek

Kupiszewski, 2013-02-11 The changes of populations are determined by fertility mortality and migration On the national level international migration is a factor of increasing demographic economic social and political importance This book addresses the debate on the impact of international migration and economic activity on population and labour force resources in future It presents a study conducted for 27 European countries looking 50 years ahead 2002 2052 An extended discussion of theories and factors underlying the assumed evolution of the components of change and economic activity is included as well as a detailed analysis of the historical trends These theoretical and empirical considerations lead to defining scenarios of future mortality fertility economic activity and international migration which have been fed into a projection model producing various future population dynamics and labour force trajectories In addition simulations have been made to estimate the size of replacement migration needed to maintain selected demographic and labour market parameters in the countries of Europe The results presented in this book allow researchers governments and policy makers to evaluate to what extent various migration and labour market policies may be instrumental in achieving the desired population and labour size and structures The secondary purpose of this volume is to reveal the methodology and argumentation lying behind a complex population forecasting and simulation exercise which is not done frequently but is critical for the assessment of the forecasts and also valuable from a purely didactic point of view
